Webex Room Bar

Setting a new bar for video meetings

Webex Room Bar is a compact, yet powerful room device providing stunning video, audio and visual collaboration, unparalleled flexibility and inclusive meeting experiences in your focus rooms, huddle spaces and small-to-medium meeting rooms.

With the freedom to join any meeting, optimized camera views, crisp stereo sound, dual-screen support, and seamless USB-C connection, Room Bar is designed to transform your workplace for hybrid work. Video-enable your rooms at scale with a solution that's easy to deploy, engaging to use and more affordable to maintain - creating a connected, intelligent workplace.

Features

- Integrated, codec-powered video bar with flexible mounting

- Dual-screen support

- 12 MP, speaker tracking camera

- Dual stereo speakers

- Noise-cancelling mic array

- External microphone input

- USB-C passthrough

- Third-party video interoperability

- 4K content sharing

- Presence sensors

- Touch control panel

- Unified management & analytics

Have a front-row seat at the table

Available in First Light and Carbon Black color options, Webex Room Bar combines a powerful codec, an intelligent, wide-field-of-view camera, noise-cancelling microphones, dual stereo speakers and robust integrations in a single offering. It was built to infuse more intelligence, reliability and elegance into modern workspaces.

Webex Room Bar offers exceptional video and audio quality, enhanced flexibility and embedded room intelligence in a box, bringing efficiency, productivity and usability to your meeting rooms. Bring dualscreen support, UI consistency and support to join third-party meeting solutions into your meeting rooms, in a cost-effective, manageable and simple way.

Boundless video meetings

Just connect the device with one or two displays and enjoy stunning, full HD video, crisp audio, and 4K content powering collaboration in the huddle room, the executive office or a conference room. Want to video-enable your mid-sized rooms? Simply connect with an external microphone to ensure everyone is clearly heard. Platform is no longer a barrier. Join any meeting on Webex, Microsoft Teams, Zoom or Google Meet with a single tap or using voice commands. Or simply connect your laptop with Room Bar via USB-C for an immersive studio experience.

Unified control and analytics

Room Bar can be deployed as a fully managed, secure IT asset and comes with a single-pane-of-glass view of device and workspace metrics in Control Hub. It's easy to deploy, set up and scale, while providing unified management, diagnostics, analytics and workspace insights across your entire Webex deployment to help keep track of device health, monitor usage and occupancy, and enable better resource planning.

Intelligent meeting rooms

The video bar detects you and wakes up when you enter the room. And can even recognize meeting participants using the power of artificial intelligence. With a 12-element, sophisticated microphone array and AI-powered noise removal, you don't need to worry about unwanted background noises disrupting your session.

With Room Bar, you can make sure everyone is included in the meeting: remote participants can clearly see and hear everyone in the room while in-room members have an have spatial audio and optimized view optimized view when interacting with people on the far end.

Vibrant presentations

Transform your presentations into hybrid collaboration: share 4K content wirelessly, via HDMI or through USB-C to keep the ideas flow and ensure remote participants get the same best experience. Get instant access to whiteboards and annotations shared from other Webex devices or the Webex App.
