

THE DOODLE-ZOOM INTEGRATION

Seamless scheduling meets flawless video conferencing

Now you can automatically include a Zoom link with every meeting you schedule with Doodle. Give your guests the when and the where for every meeting and ensure a smooth scheduling experience start to finish. Increase your show-rates and boost engagement with your team with the latest from Doodle.

“When a no-show happens due to scheduling inefficiencies – simply because an organizer forgot to create a Zoom link and add it into the calendar invite - it can be really frustrating.”

- *Timoteo Canonica,*
Product Manager at Doodle

Set up is easy with the Zoom integration

1. Go to your [Doodle account settings](#).
2. You'll find the Zoom integration among the rest of your account settings on the left side of the page.
3. Connect your Zoom account and watch as Zoom links are automatically added to events you schedule with Doodle.

You have not connected your Zoom account to Doodle.

 [Connect to Zoom](#)

Get started with the Zoom integration and see how you can:

- **Cut down on busy work** - no more manually adding Zoom links to calendar events
- **Save time with automatic updates** - reschedule meetings and Zoom links will update automatically
- **Increase show rates for your meetings** - give your guests or clients both the when and the where

Privacy and Security - Built for Enterprises

Doodle has the privacy and security that modern companies need:

Privacy

With Doodle, your calendar stays private and your invited guests see only the times you mark as free, and nothing else on your schedule.

Security

Our service runs on ISO 27001 compliant AWS infrastructure with Cloudflare DNS, giving you high availability and secure, enterprise-grade servers.

Interoperability

Doodle makes cross-platform calendar scheduling a breeze by providing a common interface for Google Apps, Microsoft Office 365 and many other systems.
