WORTEN LAUNCHES NEW RANGE OF BECKEN WASHING MACHINES

Worten has just launched a new range of Becken brand washing machines that offer technological innovation and efficient performance with low energy consumption.

The new line, called Move Sense, is intended to be a great buy for the consumer in terms of technology, but which also offers all kinds of savings.

The Move Sense range contains innovative technology providing the owners with the greatest comfort as well as saving money, natural resources and the clothes themselves. How?

This new range of A+++ energy class washing machines uses Overjet Clean technology which cuts energy consumption by up to 46% and water consumption by up to 4.1%. These machines are also equipped with an ultra rapid and efficient programme lasting just 12 minutes that provides a complete wash cycle for up to two kilos of clothes.

Some of the Move Sense machines also have a boomerang-shaped side structure that absorbs vibrations more effectively (meaning quieter operation), during the wash and spin cycles.

The Move Sense range also includes machines with a new drum shape that washes the clothes more gently because the openings are pearl-shaped so the fabrics cannot get caught and damaged. The motors on some of the washing machines have a ten-year guarantee.

The new Becken Move Sense range is now on sale in all Worten stores and online www.worten.pt, starting from €329 with loads of up to 9 kilos.

The world is getting more and more Worten.
