

Marketing and Communications Officer

In collaboration with STEM Learning, [ESERO-UK](#) offers support, funding, and services aimed at enhancing the teaching of STEM subjects in schools and colleges, as well as providing enrichment activities for students. ESERO-UK is funded by the [European Space Agency](#) and the [UK Space Agency](#) whose requirements and expectations shape our offer.

In the past year, our campaigns have reached over 180,000 people through *Mars Day* and 142,000 through *Protecting the Planet Day*. As Marketing and Communications Officer, you'll play a key role in expanding this reach even further.

This role is instrumental in ensuring that we hit targets, but most importantly – use the context of space to open doors for young people by delivering engaging, world-class teaching in science, technology, engineering, and mathematics (STEM).
