

Project Officer – Further Information

The European Space Education Resources Office in the UK (ESERO-UK) is a programme funded by the European Space Agency and the UK Space Agency. ESERO-UK is managed and run by STEM Learning.

The Project Officer will be responsible for project management and reporting across ESERO-UK activities, including teacher CPD, use of teaching resources and other engagements with students, teachers, schools, partners and employers. The role will also include project managing and running events associated with competitions and challenges, such as the UK CanSat Competition. This includes working directly with teachers and young people. The role will also include support with the delivery of our online engagement events: Mars Day and Protecting Our Planet Day.

The Project Officer will work in a team to deliver the best offer for stakeholders, in particular the Space Inspirations Project Officer and the STEM Enrichment Lead, but also the wider STEM Learning team, including colleagues in Marketing and Communications, Finance, Education team and other areas of the business.

The role will involve occasional UK travel for meetings and conferences, and the opportunity to attend one international meeting per year with other ESERO offices across Europe.
