The Department of Agriculture and Forestry, Office of Agricultural and Environmental Sciences, Structural Pest Control Commission, published a Notice of Intent to promulgate LAC 7:XXV.101, 113, and 117 in the September 20, 2024, edition of the *Louisiana Register* (LR 50:9, 1296-1298). A public hearing for the proposed Rule was held on Monday, October 28, 2024, which solicited comments and testimony, specifically on §117. As a result of its analysis of the comments and testimony received, the department proposes to amend §117 of the proposed Rule. Within §117(H)(2), the department proposes to adopt additions to include the total amount of restricted use pesticide applied per location, per application, and size of area treated with restricted use pesticide (square feet or linear feet) for record keeping for applications of pesticides in the general pest and commercial vertebrate phases. The additional language “restricted use” provides clarification to licensees and permittees regarding record keeping. The previously proposed Rule did not specify the type of pesticide it applied to. No fiscal or economic impact will result from the amendments proposed in this notice.
