

Highlights from our climate change journey

\$3.6B invested in renewable energy and sustainable real estate¹

Net-zero ambition by **2050**

11% reduction in carbon footprint **since 2022**²

2x private markets assets³ reporting real emissions data **since 2022**

\$653M invested in Canadian green bonds

20% target reduction in carbon footprint by 2030 **against 2023 baseline**⁴

Our 2025 stewardship and process targets aim to:⁵

- enhance our climate due diligence
- improve how we engage with investment partners
- strengthen data quality for internally and externally managed assets

NOTE: [Read our 2023-24 TCFD report here.](#)

¹ LEED or BOMA certified.

² Comparing equivalent portfolios between 2022 and 2023. Our overall 2023 carbon footprint figure covers an expanded scope and is therefore not directly comparable.

³ Directly held private equity and infrastructure investments.

⁴ Updated target reflects progress made since 2022 and applies to the new baseline with expanded scope.

⁵ For more information on our targets, see [Our Climate Change Strategy in Action.](#)
