Total	€ 1,545,601.82

Weighted average maturity of reserve assets³

1 day

Notes and Definitions

1. *EUROe in circulation* is the total EUROe supply on supported blockchains⁴ on the report date. *Total EUROe supply* is calculated as the cumulative sum of issued less redeemed EUROe. All values are rounded to the nearest cent.
2. *Fair value of assets in EUROe reserve* is the total minimum balances of euro denominated assets held by Membrane Finance Oy with regulated financial institutions⁵ on behalf of EUROe clients on the report date.
3. Cash deposits are assigned a one-day maturity as they are immediately redeemable.
4. Supported blockchains: Arbitrum One, Avalanche (C-Chain), Concordium, Ethereum, Optimism, Polygon PoS, Solana
5. Reserve assets held in financial institutions domiciled in the EEA: Bank Frick (Liechtenstein)
6. Please note that block explorer reported supply values may be equal or less than the total EUROe supply due to factors not related to Membrane Finance Oy or the actual supply of EUROe.
