

AMBIPOWER[®] Smart 280 Litre Air Sourced Heat Pump Water Heater

EcoNet[™] - Easy Start Guide

EASY TO SET UP & SIMPLE TO USE

Connect your Rheem AmbiPower[®] Smart Heat Pump Water Heater to the EcoNet[™] App in a few easy steps.

System Requirements

To run the EcoNet App in conjunction with your compatible smart water heater, you'll need:

- An **Apple** smart phone running **iOS Version 16 or later**, or an **Android** smart phone running **Version 12L or later***.
- A **Bluetooth** connection, an **Internet** connection, and **Wi-Fi** network access running on **2.4GHz** or **5GHz**.

Confirm you have a strong Wi-Fi signal on your phone when you are at your water heater. A weak Wi-Fi signal will result in drop-outs and poor performance of the App. You may need to add a range extender or move your router to improve the Wi-Fi performance at your water heater.

Look for the QR Code on your water heater, or scan the QR Code here to get started.

Download on the
App Store

GET IT ON
Google Play

1 Download the free EcoNet[™] App

Using your smartphone, scan the QR Code on your water heater or owners guide to download and install the free EcoNet[™] App. Or download it from the App Store or Google Play.

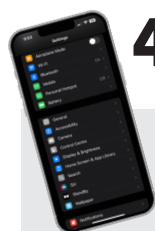

2 Start the EcoNet[™] App

Start the EcoNet[™] App and begin by setting your location, and allowing notifications. Notifications are an important part of the App to help you receive system status notifications and alerts.

3 Create an EcoNet[™] account and set a password

Create your EcoNet[™] account, add your contact details, and set a password. You will receive a confirmation email. Follow the prompts to complete your account set-up.

4 Stand near your water heater with your device in hand.

Stand within 3 metres of your water heater with your device in hand and with Bluetooth turned on. If Bluetooth is not enabled, go to settings and turn it on.

5 Add your water heater to the EcoNet[™] App

Go to the EcoNet[™] home screen and tap on **Add Product** then select your water heater and follow the prompts to connect it to EcoNet[™].

6 Select your Wi-Fi network to complete set-up

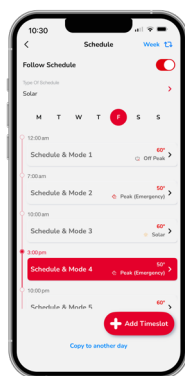

Select your Wi-Fi network and enter your network password. Your water heater is now ready to use with the EcoNet[™] App.

POWERFUL TOOLS TO HELP YOU MANAGE YOUR HOT WATER ENERGY CONSUMPTION AND COST

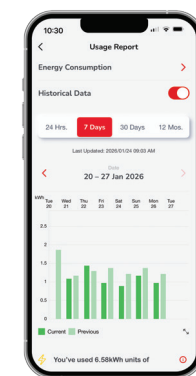

Smartphone Control

Control your hot water from anywhere with the EcoNet[™] App. Whether you're at home or away, EcoNet[™] lets you adjust settings, select modes, monitor hot water availability, and view live system status, all without needing to access the unit outdoors. It's convenient, intuitive, and always within reach.

Custom Scheduling

Take control of when your water heater operates, so you can schedule heating times favourable to your energy plan with your energy retailer, or maximise the use of your rooftop solar PV generated electricity by shifting your water heater operating times to favourable peak solar generation periods, like the middle of the day.

Energy Usage Reports

Get a clearer picture of your hot water energy use. Explore easy-to-read insights in kWh across 24-hour, 7-day, 30-day and 12-month views, so you can see exactly how your water heater energy usage trends over time. It's smart, simple and designed to help you stay in control with confidence.

If you need support with setting up your EcoNet[™] account in Australia, please call us on: **1300 010 163**

*Older versions of iOS and Android may not be compatible with the EcoNet[™] App. Update your device to the latest operating system. Some devices may not support the latest operating system, check with your device supplier.
