FEATURES

- **Complete frost protection** – Heat exchange technology protects the system down to freezing -10°C temperatures
- Available in 180L & 300L tank capacities
- **Space saving design** – a complete roof mounted installation featuring a durable, lightweight stainless steel tank
- **Energy Efficient** – can cut energy use by up to 65%^{1,2}
- **Booster** – choice of 6-star continuous flow gas boost or electric element back up to provide hot water in any weather condition
- **Low maintenance** – with no electronics or pumps required, Premier Hiline® will reliably produce efficient hot water day in and day out, in any weather extreme
- Mains Pressure delivers full water pressure to all taps at the same time³
- Eligible for STCs⁴
- 7 Year cylinder Warranty⁵

WHY CHOOSE PREMIER HILINE®?

Rheem Premier Hiline® is an indirect solar water heater specifically designed for environments prone to frost. By using the sun's energy as its primary heating source and heating via the thermosiphon principle, this simple system operates without circulating pumps and electronic controllers. Premier Hiline® models can also reduce water heating energy consumption by up to 65%^{1,2}.

The range includes both 180L and 300L models, using a high efficiency solar collector design. The whole system is installed on your roof, saving space and keeping hot pipework well out of reach of young children.

FROST PROTECTION

Premier Hiline® models feature heat exchange technology, maximising solar gain whilst providing frost protection. Rather than directly heating water, special heat exchange fluid flows through the solar collectors to capture the sun's energy. With its anti-freeze properties, this fluid will prevent freezing in the solar collectors down to -10°C .

STCs

Small-scale Technology Certificates (STCs) are a financial benefit to encourage the installation of solar water heaters provided under a Federal Government legislated scheme.

This map shows the climate Zones within Australia which will define the number of STCs allocated to an approved solar water heater. Your installation may be eligible.⁴

To claim your STC entitlement, simply complete the STC Assignment form. Visit www.rheem.com.au/rebates to download the STC Assignment form.

¹ Energy reduction of up to 65% based on Australian Government Approved TRNSYS simulation modelling and apply when replacing an electric water heater with a Rheem 52H300/2SP solar water heater in zone 3.

² Any financial savings will vary depending upon type of Rheem Solar system installed, orientation and inclination of the solar collectors, type of water heater being replaced, hot water consumption and fuel tariff. Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff.

³ Electric boost models only.

⁴ Eligibility criteria apply.

⁵ Warranty Conditions. 7 years supply on cylinder, 5 years supply on solar collectors, 1 year labour on cylinder and solar collectors, 1 year supply and labour on other parts. Conditions apply. See the Rheem warranty set out in the Owner's Guide & Installation Instructions or view at www.rheem.com.au/warranty Phone 131 031 for details. Materials and specifications are subject to change without notice.
