SMART CONNECTED
HEAT PUMP WATER HEATER

Rheem's range of Heat Pump water heaters are an energy efficient, affordable way to heat water. They use the heat from the surrounding air to heat your water and help reduce your water heating energy consumption compared to a standard electric water heater. They are also an energy efficient alternative for areas where a traditional solar water heater may not be suitable.

Whether you're at home or away, you'll have the power to stay in control - saving energy and never running out of hot water when you need it most.

WHY CHOOSE A RHEEM SMART HEAT PUMP?

Smart water heaters enable remote control, monitoring, and scheduling. They are designed to maximise energy efficiency through customised schedules, usage tracking, and alerts, allowing homeowners to manage comfort and hot water from anywhere.

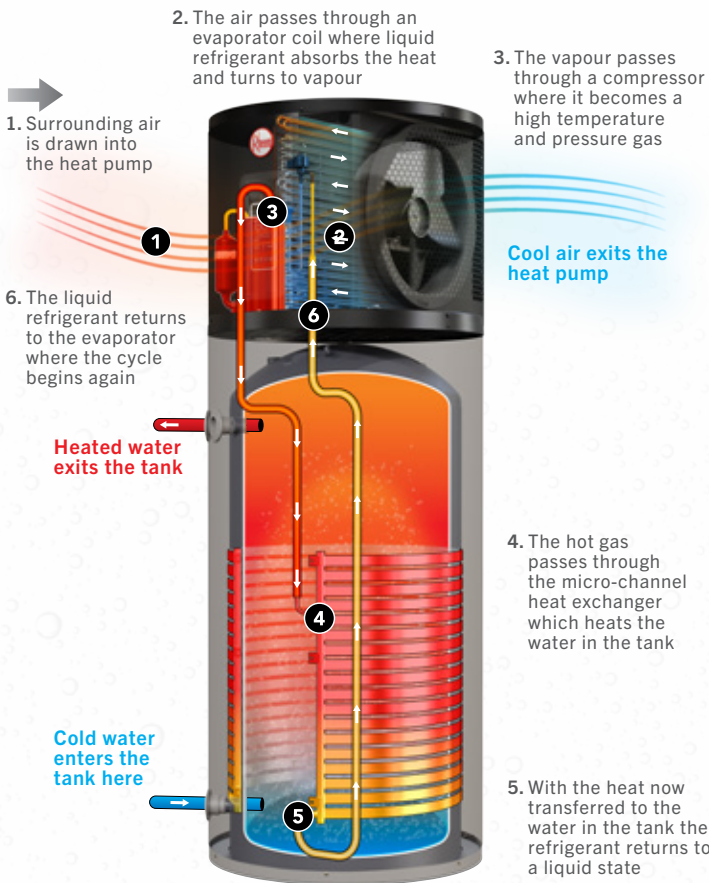

The Rheem AmbiPower® 280L integrated heat pump is a smart, heat pump water heater with Wi-Fi control.

The Wi-Fi range comes in hardwired 2.4kW back-up element and in 1.5kW Plug & Lead model with blue anode option for harsh water conditions.

AmbiPower 280L Heat Pump
Hardwired 2.4kW back-up element
551E280R5NT 2.4kW Wi-Fi
551E280R5NT/BL 2.4kW Wi-Fi / Blue Anode

AmbiPower 280L Heat Pump
Plug & Lead 1.5kW back-up element
551E280R3PT 1.5kW Wi-Fi Plug
551E280R3PT/BL 1.5kW Wi-Fi Plug / Blue Anode

Wi-Fi Enabled
So you can easily take advantage of smart connected technology, through the EcoNet App.

SMARTER HOT WATER
STARTS HERE

Introducing EcoNet™, the integrated Wi-Fi-enabled control for your Rheem smart water heater. Developed by Rheem, EcoNet™ delivers a new level of efficiency, convenience, and comfort in the palm of your hand. Compatible with the latest range of Rheem smart electric and heat pump water heaters, it provides you with greater control of your hot water energy use.

ECONET WORKS IN
4 POWERFUL WAYS

Water Heater Screen
Your water heater control panel.

Smarter Control
Take control of your water heater - anytime, anywhere, from your smartphone.

- Take control of your hot water from anywhere with the EcoNet™ App.
- Control in your hand, whether you're home or away.
- Easily adjust settings and modes.
- Monitor hot water availability.
- View live system status.
- All without needing to access the unit outdoors.
- Manage multiple water heaters across different locations.
- Convenient, intuitive, always within reach.

Schedule Tool
Lets you set operating times to maximise hot water energy savings.

Smarter Energy
Save on hot water energy consumption without sacrificing comfort.

- Helps you save on hot water energy consumption.
- Schedule heating times favourable to your energy plan with your energy retailer.
- Or shift your water heater operating time to favourable peak solar generation period to maximise the use of your rooftop solar panels.
- Adjust the stored water temperature. Higher to deliver more usable hot water, lower to help reduce energy use.
- Use the schedule tool in conjunction with the usage reporting feature to help you optimise your hot water operating times while helping you maximise hot water energy savings throughout the year.

Water Heater Screen
With Boost Mode enabled.

Smarter Comfort
Gives you the flexibility to personalise your hot water experience.

- Gives you the flexibility to personalise your hot water experience.
- Adjust water temperature to suit your needs. *When installed with a tempering valve (not supplied), hot water delivered to bathroom or first outlet/s will be limited to a safe 50°C, in accordance with Australian plumbing requirements.*
- **Boost Mode** rapidly recovers hot water supply by temporarily increasing heating performance. Perfect for busy households with high demand.
- Use **Vacation Mode** to save energy while you're away on holidays and you can return home to ready-to-use hot water.

Usage Report Screen
Helps you track your hot water energy consumption.

Smarter Connectivity
Receive alerts & notifications directly to your smartphone.

- Real-time updates so you can check your hot water status at-a-glance for greater peace-of-mind
- Get a clearer picture of your hot water energy use.
- Explore easy-to-read insights in kWh across 24-hour, 7-day, 30-day and 12-month views.
- Historical comparison mode helps you see exactly how your water heater energy usage trends over time.
- It's smart, simple and designed to help you stay in control with confidence.

RHEEM SMART CONNECTED HEAT PUMP WATER HEATER - POWERED BY ECONET™

EASY TO SET UP & SIMPLE TO USE

Connect your Rheem Heat Pump Water Heater to the EcoNet™ App in a few easy steps.

EcoNet®
Technology

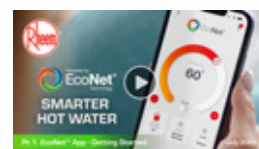

System Requirements

To run the EcoNet App in conjunction with your compatible smart water heater, you'll need:

- An **Apple** smart phone running **iOS Version 16 or later**, or an **Android** smart phone running **Version 12L or later***.
- A **Bluetooth** connection, an **Internet** connection, and **Wi-Fi** network access running on **2.4GHz** or **5GHz**.

Confirm you have a strong Wi-Fi signal on your phone when you are at your water heater. A weak Wi-Fi signal will result in drop-outs and poor performance of the App. You may need to add a range extender or move your router to improve the Wi-Fi performance at your water heater.

Visit the Rheem website to watch the EcoNet™ setup and how-to videos.

*Older versions of iOS and Android may not be compatible with the EcoNet™ App. Update your device to the latest operating system. Some devices may not support the latest operating system, check with your device supplier.

1 Download the EcoNet™ App from the App Store or Google Play

Using your smartphone, download and install the free App via the QR Code, or search for EcoNet™ in the App Store or Google Play.

2 Create an account and follow the prompts to configure EcoNet™

Open the App and select 'Create Account' to register. Follow the prompts in the App to activate the device and connect via Bluetooth.

3 Add your water heater & set up your network connection

In the App, select your product type and enter your home Wi-Fi details. Once connected, you'll be able to monitor and control your system from your phone.

CHOOSE RHEEM FOR UNMATCHED RELIABILITY AND PERFORMANCE

Rheem has been keeping Australians in hot water since 1939. Today, we're the country's largest water heater manufacturer, trusted by generations for reliable performance, local support and smart, sustainable innovation.

We design and build our heat pumps and electric storage water heaters for Australian homes and conditions, and backed by a national network of experts, dealers and service professionals.
