# Medical Examination and Vaccination Instructions

Now that you are scheduled for an immigrant/K visa interview, you should make arrangements to undergo your medical examination and obtain certain vaccinations. All immigrant and K visa applicants, regardless of age must have a medical examination. United States immigration law also requires immigrant visa applicants to obtain certain vaccinations (listed below) prior to the issuance of an immigrant visa.

You should arrange to undergo your medical examination at one of the designated panel physicians indicated below. Medical examinations conducted elsewhere will not be accepted. The medical examination forms will be generated and completed by the panel physician during the exam. Each person who is examined must present his or her own passport and five visa photographs at the time of the exam. **The medical examination must be completed prior to your visa interview appointment date. Please contact the panel physician where you plan to take your medical examination to learn about the time required to complete the examination.** Once the medical exam is completed, you will receive a sealed medical report. **DO NOT open the envelope as you must bring the sealed medical report to your visa interview. If you are using the e-medical process, you will not receive a sealed medical report. NOTE: You are not permitted to undergo a medical exam unless an interview is scheduled. The validity of your visa is tied to your medical exam's validity.**

Panel physicians who conduct medical examinations of immigrant and K visa applicants are required to verify that applicants have met certain vaccination requirement, or that it is medically inappropriate for an applicant to receive one or more of the following vaccinations: **DT/DTP/DTaP, Td, Polio (OPV/IPV), Measles (or MR or MMR), Mumps (or MMR), Rubella (or MR or MMR), Rotavirus, Hib (Haemophilus Influenzae Type B), Hepatitis A, Hepatitis B, Meningococcal, Varicella, Pneumococcal, Influenza.** If you have already received some or all of the required vaccinations, you should bring your previous vaccination records with you to your medical exam for verification and transfer to your international vaccination record. Physicians at the panel sites listed below can determine which of the listed vaccinations are medically appropriate for you, given your age, medical history, and current medical condition. Only vaccinations verified or administered at the panel sites listed below will be accepted by the consulate.
