PROFILE

I'm a Fullstack Application Developer, creating purposeful and functional applications that go beyond expectations. I've restructured a company-wide testing strategy, and currently hold trainings on front end specializations and techniques.

EXPERIENCE

APPLICATION DEVELOPER

2018 - PRESENT

U.S. BANK

- Lead front end development for 2 Agile teams as a SME across 2 applications.
- Train developers in Git, Unit Testing strategy, E2E Testing strategy, and React.
- Coordinate delivery of products by supporting quarterly releases and on-call.
- Responsible for design and integration of application architecture.
- Identify system dependencies by designing an E2E framework with Cypress.
- Create an accessible product by rewriting apps to be WCAG 2.0 AA compliant.
- Strengthen the codebase by increasing coverage to greater than 90%.

WEB DEVELOPER

2016 - 2018

QUANTUM LEARNING NETWORK

- Developed an integrated payroll information system for site administrators.
- Spearheaded a new staff branding by redesigning staff website for SuperCamp.
- Improved hiring efficiency by developing an employee contracting tool.
