

# Analytics Launch Services

## What's included in implementation

With Analytics Launch Services, our team helps you implement and adopt Procore Analytics with guided setup and support. This package includes 15 resource hours for foundational configuration, light report modification, and enablement to drive adoption across your organization.

### 01 Power BI Workspace Creation and Report Setup

Whether you are an experienced Power BI user or brand new to the tool, our AIS will deliver a simple guided setup process.

### 02 Report Navigation

During implementation, your AIS will walk you through how to easily navigate our suite of out-of-the-box reports and enable you to quickly find the data your team needs most.

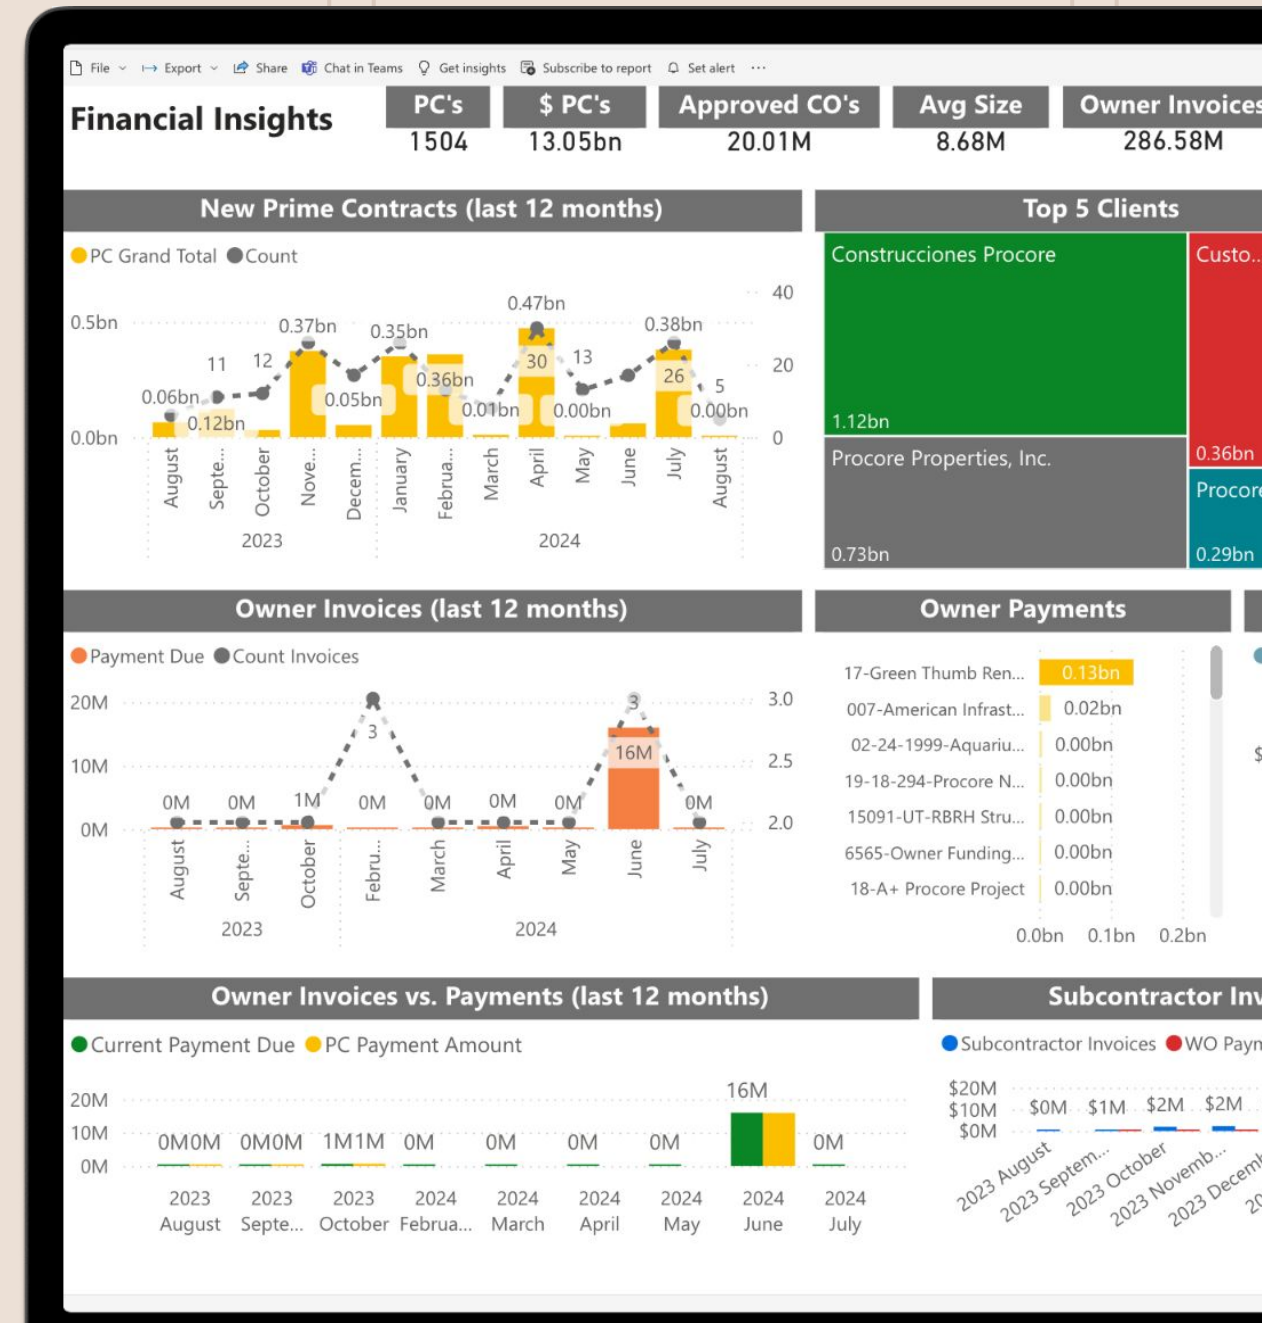

### 03 Minor Modification to Out-of-the-Box Reporting

Make light adjustments to standard reports to better align with your unique business processes and reporting needs.

### 04 Dedicated Procore Expert

Your Analytics Implementation Specialist will work with you on the an outlined Scope of Work that will set your organization up for success.

*\*Access to Power BI not included with Procore Analytics. Customer must purchase separately.*
