

Skilled resources for project execution and ongoing support.

Labor constraints impact every area of construction businesses. Technology offers greater efficiency but requires capacity to implement and maintain. Procore's team can help make your digital transformation vision a reality while your in-house team stays focused on their day-to-day work.

Account Configuration

A Procore expert sets up company level and project level configurations within your account based on best practices and your business processes.

Data Entry

Ensure project data is entered into Procore correctly to get your account ready to use quicker.

Historical Data Transfer

Pull in project information from older jobs so it's available for internal benchmarking and analysis.

Data Readiness

Procore's experts work with you to check that data is correct, consistent, and usable to facilitate improved decision making and operational performance.

Report, Template, and Form Creation

Capture and synthesize the right data to provide the insights you need for tracking and decision making.

Workflow Build Out

Execute plans for business process optimization using Procore's workflow engine.

01 Accelerate new initiatives

Overcome hurdles to rollout and reduce the time it takes to see value in the Procore platform.

02 Overcome data transfer backlogs

Leverage the power of reporting by expanding your data capacity. Offload the burden of data entry onto Procore's expert teams.

03 Keep your teams focused on day-to-day

Build in continuity and reduce operational costs and risk by keeping your project teams focused on what they do best.
