

ERP Test Environment Launch Services

Choose the right testing environment to help ensure a smooth ERP integration with Procore.

NOTE: All options require purchase of at least one ERP Connector and ERP Launch Services.

Test Project in Your Live Procore Environment

Cost | included at no additional charge

- + Connect your live Procore site to your live ERP data
- + Create a dedicated Test Project with ERP-synced cost codes
- + Easily deactivate the Test Project once testing is complete

Best For: Customers who want a quick, no-cost way to validate an ERP integration in their actual Procore site

Temporary Live Procore Environment for Testing

Cost | \$3,700

- + Separate, live Procore test site connected to test ERP data (*for testing period only*)
- + Fresh environment (not a copy of your current site)
- + Set up the site after ERP connection is established
- + Once testing is completed, the site is decommissioned and the ERP integration is moved to the live Procore site
- + ERP Specialist guides planning, milestones, and live site transition

Best For: Customers who prefer to keep testing and live environments completely separate.

Temporary Sandbox Environment for Testing

Cost | \$3,700

- + Monthly Sandbox copy of your live Procore site connected to test ERP data
- + No initial setup needed — your account data is already there
- + Create new projects in the sandbox to test integration
- + Includes one reconnect after first monthly refresh
- + Once testing is completed, the site is decommissioned and the ERP integration is moved to the live Procore site (Up to two (2) months of testing, depending on timing of refresh).
- + ERP Specialist guides planning, milestones, and live site transition

Best For: Customers who want to test in a duplicate environment without impacting their live site.

Additional Considerations:

- + An extra ERP connector may be needed for concurrent Live + Test connections — consult your Account Executive.
- + Availability of Sandbox + ERP integration may vary by ERP system. Check with the ERP Professional Services team before purchasing.
