

## NexoBrid (anacaulase-bcdb)

### Disclaimer

*Clinical guidelines are developed and adopted to establish evidence-based clinical criteria for utilization management decisions. Clinical guidelines are applicable according to policy and plan type. The Plan may delegate utilization management decisions of certain services to third parties who may develop and adopt their own clinical criteria.*

*Coverage of services is subject to the terms, conditions, and limitations of a member's policy, as well as applicable state and federal law. Clinical guidelines are also subject to in-force criteria such as the Centers for Medicare & Medicaid Services (CMS) national coverage determination (NCD) or local coverage determination (LCD) for Medicare Advantage plans. Please refer to the member's policy documents (e.g., Certificate/Evidence of Coverage, Schedule of Benefits, Plan Formulary) or contact the Plan to confirm coverage.*

### Summary

NexoBrid (anacaulase-bcdb) is a proteolytic enzyme product indicated for non-surgical eschar removal in adults with deep partial thickness (DPT) and/or full thickness (FT) thermal burns. NexoBrid (anacaulase-bcdb) contains bromelain extracted from pineapple stems and provides an alternative to surgical debridement.

- NexoBrid (anacaulase-bcdb) enables selective removal of eschar by proteolytically degrading necrotic tissue while sparing healthy tissue. This allows for wound evaluation and treatment decision making while reducing morbidity compared to surgical excision.
- NexoBrid (anacaulase-bcdb) powder must be mixed with provided gel vehicle prior to application. The prepared gel is applied topically by a healthcare provider to thermal burn wounds at 2g powder + 20g gel per 1% total body surface area (TBSA) involved or 5g powder + 50g gel per 2.5% TBSA involved.

## Definitions

"**Autograft**" is a skin graft from one part of the member's body to another part.

"**Debridement**" is the removal of foreign material and devitalized or contaminated tissue from or adjacent to a traumatic or infected lesion until surrounding healthy tissue is exposed.

"**Eschar**" is the necrotic tissue, slough, and dried exudate that forms an adherent, black, leathery crust on the surface of burned skin.

"**Proteolysis**" is the breakdown of proteins into smaller polypeptides or amino acids by the hydrolytic action of enzymes.

"**Re-epithelialization**" is the process by which epithelial cells migrate across a wound bed to restore the epithelial layer.

"**Selective eschar removal**" is the degradation of eschar while sparing healthy dermal tissue beneath the burn wound.

"**Total body surface area (TBSA)**" is the percentage of total body surface represented by a burn wound or wounds.

## Medical Necessity Criteria for Initial Authorization

The Plan considers NexoBrid (anacaulase-bcddb) medically necessary when **ALL** of the following criteria are met:

1. Prescribed by or in consultation with a burn specialist or plastic surgeon; **AND**
2. The member is 18 years of age or older; **AND**
3. The member has deep partial thickness and/or full thickness thermal burns; **AND**
4. The total body surface area (TBSA) being treated per session does **NOT** exceed 15% TBSA;  
**AND**
5. The **TOTAL** cumulative TBSA being treated with NexoBrid (anacaulase-bcddb) does **NOT** exceed 20% across two treatment sessions; **AND**
6. If a second treatment is clinically indicated, it must take place no less than 24 hours after the initial treatment, but within the next calendar day of treatment (e.g next day only).
7. Documentation provided confirms the following:

- a. The member does not have known hypersensitivity to bromelain, pineapples, papayas or papain; **and**
- b. NexoBrid (anacaulase-bcddb) will **NOT** be administered for treatment of:
  - i. Burns on the face, perineum, or genitalia; **and/or**
  - ii. Burns on the feet of members with diabetes mellitus or on the feet of members with occlusive vascular disease; **and/or**
  - iii. Burns in members with significant cardiopulmonary disease, including inhalation injury; **and/or**
  - iv. Burn wounds where medical devices (e.g., implants, pacemakers, shunts) or vital structures (e.g., large vessels) could become exposed during eschar removal; **and/or**
  - v. Chemical or electrical burns; **and/or**
  - vi. Circumferential burns; **and/or**
  - vii. Wounds contaminated with radioactive and other hazardous substances.

**If the above prior authorization criteria are met, NexoBrid (anacaulase-bcddb) will be authorized as follows:**

- **One 4-hour application per wound site, up to 15% TBSA**
- **A second 4-hour application is allowed 24 hours after the initial application if criteria continue to be met, up to a cumulative 20% TBSA across two treatment sessions.**
- **Additional specifications:**
  - **Treatments performed less than 24 hours after the first treatment are not considered medically necessary**
  - **The second treatment must occur within the next calendar day from the initial treatment (e.g. if first treatment is on Tuesday, the second treatment must be on Wednesday)**
  - **Any treatment more than one calendar day after the initial treatment is not considered medically necessary**

### **Medical Necessity Criteria for Reauthorization**

Reauthorization for additional applications of NexoBrid (anacaulase-bcddb) beyond the initial approval will require documentation that:

1. The additional application does not exceed the maximum total body surface area (TBSA) limits specified in the **Initial Authorization** criteria; **AND**

2. The additional application is medically necessary for **ONE** of the following:
  - a. The wound area is >15% TBSA; **or**
  - b. Multiple wound areas on different body surfaces require additional treatment for logistical reasons such as body position; **or**
  - c. The initial application did not fully remove eschar from the wound area; **AND**
3. The member continues to meet all other **Initial Authorization** criteria.

### Experimental or Investigational / Not Medically Necessary

NexoBrid (anacaulase-bcdb) is considered experimental, investigational, or unproven for any indication or use not outlined in the criteria above.

- The application of a skin substitute, including NexoBrid, is not medically necessary unless the criteria in CG030 Bioengineered Skin and Soft Tissue Substitutes are met.
- Use of NexoBrid outside of the clinical indications and criteria specified in this guideline is considered not medically necessary.
