oscar

Preventive care

Preventive care is routine healthcare that includes certain types of immunizations, lab tests, screenings, and other services intended to prevent illness, disease, or other health problems. As long as you see an in-network healthcare doctor or provider, and the care is medically appropriate, you can take advantage of these benefits for \$0.

Oscar Medical coverage is underwritten by Oscar Insurance Company and its affiliates. Administrative Services for all plans provided by Oscar Management Corporation. All insurance policies and group benefit plans contain exclusions and limitations. For availability, costs, and complete details of coverage, contact Oscar at (855) 672-2788.

| Using your Oscar account | 21 |
|--|----|
| Immunizations for children & adolescents | 20 |
| Labs for children & adolescents | 19 |
| Assessments for children & adolescents | 18 |

A service can be considered preventive (\$0) or diagnostic (not \$0)

Depending on why it's performed and how it's coded by your doctor or provider, the same service can be considered either preventive or diagnostic, with different cost implications for you.

| | \$0 Preventive | Diagnostic |
|--|---|--|
| Reason for service | General screenings to ensure that you are healthy and to detect potential health concerns early, when no symptoms are present. | To diagnose specific conditions and/or determining a course of treatment based on your symptoms. |
| Your cost | \$0, at no cost to you. | You'll be responsible for the entire cost—or a share of the cost—depending on your plan. |
| Example 1 Sexually transmitted infection (STI) | You don't have any STI symptoms, but you receive an STI test as part of your annual physical. This is considered preventive, so the test is \$0. | You visit your doctor or provider because you're experiencing itching and burning symptoms, so they give you an STI test. Regardless of the test's outcome, this test is considered diagnostic. This means you're responsible for the entire cost—or a share of the cost. |
| Example 2 Mammogram | You're 40 years old and receive a mammogram annually, even though you aren't experiencing any symptoms related to breast cancer. This is considered preventive, so the mammogram is free. | You felt a lump in your breast and your doctor or provider recommended getting a mammogram. Regardless of the outcome, the mammogram is considered diagnostic. This means you're responsible for the entire cost—or a share of the cost. |

Don't forget: Both preventive and diagnostic services can be performed in the same visit.

If a preventive service is performed during an office visit where it's not the primary purpose of your visit, the preventive service is \$0, but you'll be responsible for the entire cost—or a share of the cost—for the office visit itself depending on your plan.

If new or existing health problems are identified and/or addressed during a preventive care visit, the visit itself and any preventive services performed during the visit will be \$0, but you'll be responsible for the entire cost—or a share of the cost—for any non-preventive services performed during the visit.

Annual physicals and well-woman visits

Every Oscar member has a preventive annual physical covered with a primary care provider in Oscar's network. You should not be asked to pay a copay at your annual physical. Every adult with a female reproductive system also gets a well-woman visit each year, in addition to their annual physical. These can be done with your primary care provider. You should not be asked for a copay at your well-woman visit.

What's not \$0 during my annual physical and/or well-woman visit?

The services below may be included in your annual physical or well-woman visit, but are not preventive. They may be covered by your plan if medically necessary, but you will be responsible for the entire cost—or a share of the cost—depending on your plan. Talk to your doctor or provider about whether or not they think the following tests are necessary at your annual physical.

- All thyroid blood panels
- Complete blood count (CBC)
- Comprehensive metabolic panel or basic metabolic panel
- Complete urinalysis (in-office dipstick is covered)
- Electrocardiograms (EKG/ECG)

- Herpes test (culture or serum)
- Vaginal swabs (yeast, bacterial vaginosis, or trichomonas)
- Venipuncture (drawing blood)
- Vitamin testing: B-12, iron, folate, zinc, K+, vitamin D, etc.

*Make sure to tell your doctor or provider to send your Pap smear and any other labs to Quest Diagnostics to avoid a surprise bill from an out-of-network lab. Questions I have for my doctor or provider before my visit:

What my doctor or provider told me:

Who's considered a primary care provider?

- Family medicine
- Internal medicine
- OB-GYN or gynecologist
- Nurse practitioner
- Physician's assistant
- Primary care

What else do I need to know?

You may also have a new or existing health problem identified and addressed during a preventive healthcare visit, so your provider may bill for a second visit if they spend more time on those issues than expected. In these cases, any preventive procedures will be covered-in-full, and you'll be responsible for a cost-share of any diagnostic procedures according to your plan.

If a preventive service is provided during an office visit where the preventive service is not the primary purpose of the visit, you'll be responsible for a share of the cost that would ordinarily apply to the office visit.

Please note: Copays may be required if you want to address multiple concerns during an annual exam or well-woman visit, beyond what's included in a standard physical. The doctor or provider may code for a simultaneous visit, which will require a copay. This can also happen if a doctor or provider spends more time than expected addressing these issues.

Where do I send my labs?

Ask your doctor or provider to send your labs to **Quest Diagnostics**, Oscar's preferred partner, to avoid a surprise bill from an out-of-network lab. When you send your labs to Quest Diagnostics you'll be able to see your lab results in your Oscar account online or in the app.

I got billed for a preventive service. What should I do?

If you receive a claim for a preventive service that you think your doctor or provider billed incorrectly, contact your Care Team and they can help sort it out. Keep in mind that your Care Team cannot advise your doctor or provider how to code a service before receiving the claim. If you receive a bill from Quest Diagnostics, you can contact them directly.

Adult assessments

| Service | Who's eligible |
|---|--|
| Alcohol and drug use (screening and counseling) | All adults. |
| Blood pressure check | All adults. |
| Depression screening | All adults. |
| Tobacco use screening | All adults. |
| Interpersonal or domestic violence counseling | All adults. |
| HIV screening and counseling | All adults. |
| Contraceptive education and counseling | All adults. |
| Sexually transmitted infection (STI) counseling | All adults. |
| Obesity screening and counseling | All adults. |
| Diet and physical activity counseling | All adults. |
| Skin cancer prevention behavioral counseling | All adults. |
| Prostate cancer screening | Adults with prostates ages 50 to 69; adults ages 40 to 49 at high risk of developing prostate cancer. Cost share varies by plan. |
| BRCA1 or BRCA 2 counseling (may require prior authorization) | Adults with a personal or family history of breast, ovarian, tubal, peritoneal cancer, or an ancestry associated with BRCA1/2 gene mutation. |
| Breast cancer chemoprevention counseling | Adults with high risk for breast cancer based on your family or personal history. |
| Fall prevention | Exercise interventions to prevent falls in community-dwelling adults over age 65. |

Adult assessments (continued)

| Service | Who's eligible |
|---|--|
| Cholesterol screening (lipid panel) | All adults. |
| Prostate-specific antigen test | Adults with prostates ages 50 to 69; adults ages 40 to 49 at high risk of developing prostate cancer. Cost share varies by plan. |
| Latent tuberculosis (TB) screening | All adults. |
| Chlamydia screening | All adults. |
| Human immunodeficiency virus (HIV) screening | All adults. |
| Type 2 diabetes screening | Adults ages 35 to 75 who have obesity or are overweight. |
| Syphilis | All adults. |
| Hepatitis C virus (HCV) screening | Adults ages 18 to 79. |
| Gonorrheascreening | All adults. |
| Human papillomavirus (HPV) DNA testing | Adults with a cervix ages 21 to 65. |
| BRCA1 or BRCA 2 genetic testing | Adults with a personal or family history of breast, ovarian, tubal, or peritoneal cancer or an ancestry associated with BRCA1/2 gene mutation. |
| Cervical cancer screening or Pap smear | Adults with a cervix ages 21 to 65. |

Which common labs are <u>not</u> considered preventive?

When you receive the following lab work, you may be responsible for the entire cost—or a share of the cost—depending on your plan.

- All thyroid blood panels
- Vitamin testing: B-12, iron, folate, zinc, K+, vitamin D, etc.
- Complete blood count (CBC)
- Comprehensive metabolic panel or basic metabolic panel

- Electrocardiograms (EKG/ECG)
- Herpes test (culture or serum)
- Complete urinalysis (in-office dipstick is covered)
- Venipuncture (drawing blood)
- Vaginal swabs (yeast, bacterial vaginosis, or trichomonas)

Please note: Sometimes doctors and providers may send your tests to a lab that isn't covered by Oscar. Always remember to ask your doctor or provider to send your lab work to Quest Diagnostics, Oscar's preferred lab partner, to avoid a surprise bill.

*Your doctor or provider is responsible for filing a prior authorization with Oscar before proceeding with the test. Once we authorize the test, you're good to go.

Imaging and screening procedures for adults

| Service | Who's eligible |
|--|---|
| Colorectal cancer screening (Ex. colonoscopy) | Adults age 45 and older, or younger adults at higher risk due to personal or family history. We cover conscious sedation/analgesia for all members. For individuals at higher risk we also cover general anesthesia. Note that if your colonoscopy is run for diagnostic reasons, you may be responsible for a share of the cost. |
| Lung cancer screening | Adults age 50 and over with a history of smoking. |
| Screening for abdominal aortic aneurysm | Adults age 50 and over with a history of smoking. |
| Breast cancer mammography | Adults age 40 and older, annually. Not all breast imaging procedures may be preventive. Ask your doctor or provider, or contact your Care Team for more details. |
| Osteoporosis, or bone density scan (DEXA) | Adults over age 65, or younger if at high risk. |

Which common labs are <u>not</u> considered preventive?

Any additional tests or services that are not listed above may not be considered preventive. When you receive lab work for these tests, you may be responsible for the entire cost—or a share of the cost—depending on your plan and whether or not the lab work was medically necessary.

Please note: Some imaging procedures, even if done for preventive reasons, may require prior authorization. You or your doctor or provider can contact us regarding these authorization requirements.

Immunizations for adults

| Service | Who's eligible |
|--|---|
| Tdap: tetanus, diphtheria, pertussis (whooping cough) | All adults. |
| Td (tetanus and diphtheria) | All adults. |
| Varicella (chickenpox) | All adults. |
| Human papillomavirus (HPV) | All adults. |
| Measles, mumps, rubella (MMR) | All adults. |
| Pneumococcal (PCV13, PPSV23, or pneumonia) | All adults. |
| Hepatitis A | All adults. |
| Hepatitis B | All adults. |
| Hemophilus influenza B immunization | All adults. |
| Influenza (flu shot) | All adults, once per year. |
| Meningococcal (meningitis), A, C, W, and Y | All adults; Meningococcal B is only preventive if risk criteria are met. |
| Herpes zoster (shingles) | Adults age 50 and over, or adults age 19 and over with a weakened immune system because of disease or treatments. |
| COVID-19 | All adults. |
| RSV vaccine (Abrysvo, Arexvy, and mResvia) | All adults age 60 and over. |

Which common immunizations are <u>not</u> considered preventive?

When you receive the following immunizations you may be responsible for the entire cost—or a share of the cost—depending on your plan.

- Travel vaccines: BCG tuberculosis, typhoid (oral or injection), Japanese encephalitis, rabies, smallpox, malaria prophylaxis pills, yellow fever, etc.
- Allergy shots

Drugs for adults

There are some preventive medications that are classified as Tier 0 and are covered-in-full if they are filled at an in-network pharmacy. To see the tier and your cost share for a specific medication, log in to your account at hioscar.com/member and type your medication name into the search bar. Not all brands, dosages, or varieties of these types of medications may be covered or considered preventive under your plan.

| Service | Who's eligible / limitations |
|---|---|
| Aspirin | \$0 copay for members ages 50 to 59 or members at risk for preeclampsia. |
| Tobacco-cessation medicine | All adults, if approved by the U.S. Food and Drug Administration (FDA), prescribed by a doctor or provider, and filled at a participating pharmacy. |
| Bowel preparation medication | Adults eligible for colorectal cancer screening (colonoscopy). |
| All statins | Adults ages 40 through 75 when medically necessary for primary prevention of cardiovascular disease. |
| Folic acid supplements | Menstruating adults who are planning or capable of pregnancy. |
| Tamoxifen, Raloxifene, or Aromatase inhibitors | Adults age 35 and older for the primary prevention of breast cancer or at increased risk for breast cancer. |
| Contraceptives | All ages for the prevention of pregnancy. |
| Diabetes prevention medication | Adults ages 35 to 70 for prevention of diabetes. |
| HIV prevention medication | Persons who are at risk for acquiring HIV. |

Which common medications are <u>not</u> considered preventive?

When you receive drugs that are not classified as Tier 0 in the formulary list, you may be responsible for the entire cost—or a share of the cost—depending on your plan and whether or not the medication was medically necessary.

Pregnancy

We believe everyone deserves the same attentiveness and care during pregnancy. If you don't identify as female and are giving birth, we're equally committed to supporting your needs. (You deserve it.) We love our LGBTQ+ members and we'll take care of you.

Assessments for pregnant individuals

| Service | Who's eligible / limitations |
|---|---|
| Routine prenatal visits | All pregnant individuals. The exact number of visits will depend on your practitioner. |
| General physical exam | All pregnant individuals. |
| Social & family history discussion | All pregnant individuals. |
| Expanded counseling on tobacco use | All pregnant individuals. |
| Maternal depression screening | All pregnant individuals. |
| Expanded counseling on tobacco use | All pregnant individuals. |
| Breast-feeding support, supplies, and counseling | All pregnant individuals. Contact Oscar to find in-network options. Out of network consultants will not be covered unless pre-approved by Oscar or you are enrolled in a plan with out of network benefits. |
| Breast pump | All pregnant individuals have one pump per duration of breastfeeding. These must be rented from the hospital, or purchased from an in-network durable medical equipment (DME) vendor. |
| Some maternity-related classes | All pregnant individuals. Contact your Care Team for specific classes. |
| Preeclampsia prevention and screening | Pregnant individuals with high blood pressure. |

Labs for pregnant individuals

| Service | Who's eligible / limitations |
|---|---|
| Iron-deficiency anemia screening | All pregnant individuals. |
| Gestational diabetes screening | All pregnant individuals at 24 weeks of gestation or after. |
| Hepatitis B screening | All pregnant individuals, at first prenatal visit. |
| HIV screening | All pregnant individuals. |
| Rh (D) blood typing and antibody testing incompatibility screening | All pregnant individuals, follow up testing for adults at higher risk. |
| Syphilis screening | All pregnant individuals. |
| Chlamydia screening | All pregnant individuals. |
| Gonorrheascreening | All pregnant individuals. |
| Asymptomatic bacteriuria urinary tract or other infection screenings | All pregnant individuals at the first prenatal visit or at 12 - 16 weeks of gestation. |

Which common pregnancy labs and screenings are <u>not</u> considered preventive?

When you receive the following labs, you may be responsible for the entire cost—or a share of the cost—depending on your plan and whether or not the lab work was medically necessary.

- Genetic testing
- Pregnancy testing (if not related to contraceptive removal)
- Ultrasounds
- Sonograms

Please note: Sometimes providers may send your tests to a lab that isn't covered by Oscar. Always remember to ask your provider to send your lab work to **Quest Diagnostics**, Oscar's preferred lab partner, to avoid a surprise bill.

Immunizations for pregnant individuals

| Service | Who's eligible / limitations |
|-----------------------|------------------------------|
| Tdap immunization | All pregnant individuals. |
| Influenza (flu shot) | All pregnant individuals. |
| RSV vaccine (Abrysvo) | All pregnant individuals. |

Drugs for pregnant individuals

There are some preventive medications that are classified as Tier 0 and are covered-in-full if they are in Oscar's drug formulary list and filled at an in-network pharmacy. To see the tier and your cost share for a medication, log in to your Oscar account at hioscar.com/member and enter the medication name into the search bar. Keep in mind that not all brands, dosages, or varieties of these types of medications may be covered or considered preventive under your plan.

| Service | Who's eligible / limitations |
|------------------------|---|
| Aspirin | Individuals after 12 weeks of gestation who are at high risk for preeclampsia. |
| Folic acid supplements | All persons planning to or who could become pregnant. |
| Prenatal vitamins | See formulary for specific versions. |

Ages 0-18

- Newborns
- Children
- Adolescents

Assessments for newborns

| Service | Who's eligible / limitations |
|---|--|
| Well-child visits | Discuss appointment frequency with your provider. |
| Autism screening | All newborns. |
| Behavioral assessments | All newborns. |
| Blood pressure screening | All newborns. |
| Height, weight, and body mass index measurements | All newborns. |
| Medical history throughout development | All newborns. |
| Obesity screening and counseling | All newborns. |
| Vision screening | All newborns. |
| Gonorrhea prophylactic ocular medication | All newborns, to prevent blindness. |
| Hearing screening | All newborns, one-time test, if they were not tested at the hospital after delivery. |
| Standard metabolic screening panel | All newborns. |
| Enzyme deficiency disease screening | All newborns. |

Labs for newborns

| Service | Who's eligible / limitations |
|---|------------------------------|
| Hemoglobinopathies (Sickle Cell) screening | All newborns. |
| Congenital hypothyroidism screening | All newborns. |
| Phenylketonuria (PKU) screening | All newborns. |

Assessments for children & adolescents

| Service | Who's eligible / limitations |
|--|---|
| Behavioral / psychosocial issue counseling | All children and adolescents. |
| Height, weight, and body mass index | All children and adolescents. |
| Medical history | All children and adolescents. |
| Obesity screening and counseling | All children and adolescents. |
| Developmental screening | All children and adolescents. |
| Hearing tests | All children and adolescents. |
| Autism screening | Children at 18 and 24 months. |
| Development screening | Children under age 3, and surveillance throughout childhood. |
| Oral health | Risk assessment for young children. |
| Blood pressure screening | Children age 3 and older. |
| Counseling and fluoride varnish | Children ages 0-6 years, to prevent dental cavities in a primary care setting. |
| Vision screening for amblyopia (lazy eye) | Children ages 3-5 years. (Standard eye exams are not preventive and may be subject to cost sharing.) |
| Obesity Screening | Children age 6 and older. |
| Behavioral counseling to prevent skin cancer | All children and adolescents. |
| Tobacco use counseling | All children and adolescents, interventions including education or counseling to prevent invitation of tobacco use. |
| Depression screening, for major depressive disorder (MDD) | Adolescents ages 12 to 18 years. |
| Alcohol and drug use counseling | All adolescents. |
| Sexually transmitted infection (STI) prevention | Adolescents at higher risk.* |
| HIV Counseling | Adolescents at higher risk.* |

*Adolescents with a personal or family history of STIs and/or HIV.

Labs for children & adolescents

| Service | Who's eligible / limitations |
|---|---|
| Lead | Children at risk for exposure. |
| Lipid disorders (dyslipidemia screening) | Children at higher risk. |
| Hematocrit or hemoglobin | All children and adolescents. |
| Tuberculin testing | Children at higher risk of tuberculosis. |
| Anemia screening | All children and adolescents. |
| Hepatitis C screening | Children at higher risk, including children born to HCV-positive mothers. |
| Chlamydia screening | Sexually active adolescents. |
| Gonorrhea screening | Sexually active adolescents. |
| Human immunodeficiency virus (HIV) | Adolescents at higher risk. |

Immunizations for children & adolescents

Speak with your child's doctor or provider about what immunizations they suggest in what time frames, or if you have questions about immunization side-effects. Ask if they should be on an alternate dosage series, or if they are in a high risk group.

| Service | Who's eligible / limitations |
|---|--|
| Rotavirus | Children ages 0-6 years. |
| Haemophilus influenzae type B | Children ages 0-6 years. |
| HPV (human papillomavirus) | Children age 9 and above. |
| Tdap and Dtap (tetanus, diphtheria and pertussis[whooping cough]) | All children and adolescents. |
| Meningococcal (meningitis) A,C, W, and Y | All children and adolescents, Type B covered for those at high risk. |
| Influenza (flu shot) | All children and adolescents. |
| Pneumococcal (PCV13, PPSV23, or pneumonia) | All children and adolescents. |
| Hepatitis A | All children and adolescents. |
| Hepatitis B | All children and adolescents. |
| Inactivated poliovirus | All children and adolescents. |
| MMR (measles, mumps, and rubella) | All children and adolescents. |
| Varicella (chickenpox) | All children and adolescents. |
| COVID-19 | Children and adolescents, according to the ages and frequency recommended by the ACIP. |
| RSV vaccine (Abrysvo) | Children 19 months and younger. |

Please note: You can find CDC child vaccination recommendation charts at cdc.gov/vaccines/imz-schedules/child-easyread.html.

Access your preventive benefits online using your Oscar account

Speak with your child's doctor or provider about what immunizations they suggest in what time frames.

How to create an account

With an Oscar account, you can view your plan documents and ID card, claims, deductible, and benefits information. You can find additional preventive care information under "Benefits" in your web profile.

To set up an online account, go to hioscar.com/account. You can also call your Care Team at (855) 672-2755 to get instructions on how to set up an account.

Care Team

As an Oscar member, you have access to a dedicated Care Team who can help you navigate your plan and benefits. Your Care Team is made up of Care Guides and nurses, so you can consider them your personal squad of health experts.

You can message your Care Team online or in the Oscar app through your account.

You can also call them at (855) 672-2755. If you are experiencing a life-threatening emergency, please call 911.

For more information on preventive benefits, visit your Documents & Forms page in your online account at hioscar.com/member.
