

A better primary care experience starts at home but doesn't end there

Primary care helps you stay well and on top of your health. So we make it easy for you to meet with a provider on your terms. Simply log into the Oscar app and our virtual doctor's office comes to you through video, phone or messaging. With Oscar Primary Care, you'll get a team dedicated to you and your health for the long haul. And virtual visits are always \$0.

A whole team is by your side

Your Oscar Primary Care team includes a provider, a nurse, and a medical assistant. When something comes up, there's no need to wait for another appointment, just message your medical team and they'll be in touch.

We'll set you up with the right tools

After your first appointment, we'll send you a vitals kit with a blood pressure cuff for you to keep and use before visits to monitor your heart rate and blood pressure and share results with your provider.

Get in-person care whenever you need it

We know that to get a full picture of your health you'll need in person care. And when that time comes, your provider or team will direct you to the right specialist, lab, or imaging facility in our network. Some screenings and labs are also available to be done right from home — your provider can work with you on your options for in-home or in person care.

Ongoing support for chronic conditions

Your Oscar Primary Care team is here to help you develop a tailored care plan and coordinate your care so you never miss anything.
