CYWARE™ | Solution Brief

Cyware Intelligence Suite

Operationalizing Threat Intelligence at Scale

Where CTI Programs Break Down

Fragmented Intel Ecosystem
Feeds, enrichment, and monitoring scattered across tools, with no central hub to correlate them.

Intelligence Without Action
Alert overload and manual workflows stall response, burn out analysts, and widen exposure windows.

Reactive Digital Risk Posture
Dark web, credential leaks, and brand abuse tracked in silos, with no attacker-eye view of your footprint.

Months to Stand Up a CTI Program
Configuring feeds, sandboxes, and response tools drags on for months, delaying outcomes that should be immediate.

The Solution

The Cyware Intelligence Suite is a fully pre-configured, Cyware AI-powered CTI program that lets security teams bypass months of setup and start detecting and responding to threats within days. Built on Cyware Intel Exchange, the Cyware Intelligence Suite offers curated sectoral and vulnerability threat feeds, optional digital risk protection capabilities, integrated exposure management, native malware sandboxing, and continuous monitoring against your priority intelligence requirements, empowering teams to operationalize threat intelligence effectively at scale.

Key Benefits

Operational in Days
Pre-configured intel programs bypass months of tool integration. Start detecting and responding to threats within days of deployment.

Predict & Prevent Posture
Move from a reactive "detect and respond" to a proactive "predict and prevent" posture by unifying DRP signals with global threat intelligence.

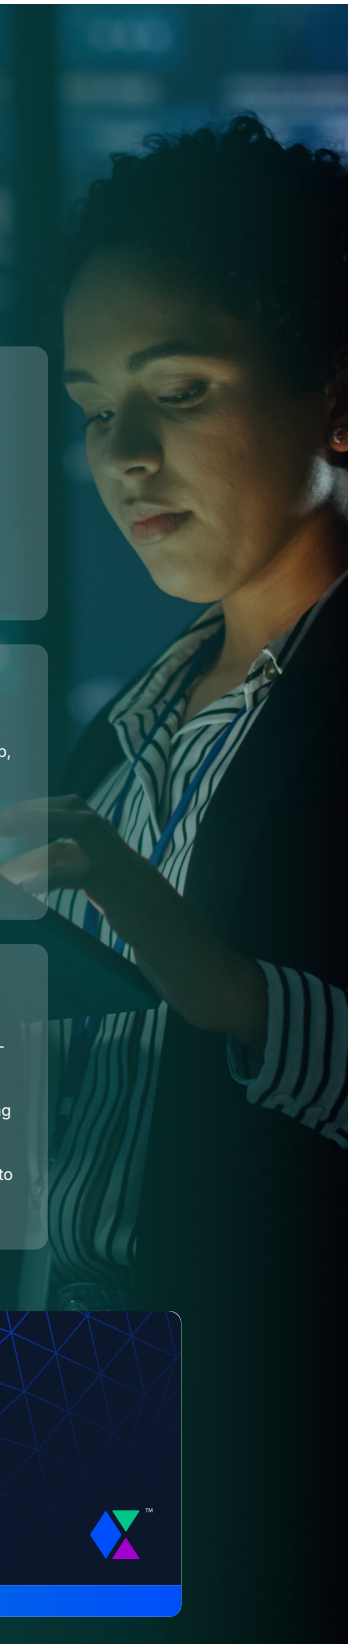
One Platform, Fully Automated
One Cyware AI-powered hub automates enrichment, playbooks, and response, eliminating manual effort and analyst burnout.

Relevance, Not Noise
Cyware AI continuously aligns intelligence with your organization's own priorities, so teams act on what matters instead of sorting through generic feeds.

CYWARE™

What's Available in
Cyware Intelligence Suite

Cyware Intelligence Suite unifies core capabilities into one operational hub. Built on Cyware Intel Exchange, an Agentic AI-powered Threat Intelligence Platform, it spans the full intel lifecycle: ingestion, enrichment, sandboxing, exposure management, with optional digital risk protection, all wired for automated action.



Cyware Threat Intelligence Platform

- Ingest, de-duplicate, and normalize multi-source threat data
- Cyware AI summarizes, enriches, and profiles threats via natural-language AI Analyst chatbot
- The Priority Intelligence Requirement Agent continuously monitors intelligence against priorities that matter

Cyware Threat Intelligence Feeds

- Cyware malware and ransomware threat feeds
- Sector-specific intelligence feeds tailored to industries including healthcare, energy, and finance
- Exploitation-aware vulnerability risk scoring with Cyware Vulnerability Feeds, powered by Securin

Cyware Digital Risk Protection (optional)

- Monitors for brand and domain impersonation, credential leaks, and threats to executives and VIPs
- Agentic AI-driven IntelOps playbooks act on SOCRadar alerts to contextualize and automate response

Cyware Exposure Management

- Compromised Credential Management with full source, timestamp, and risk
- Agentic AI correlates surfaced exposures with active threat campaigns and drives response through rules and playbooks

Cyware Sandbox Service

- Detonates and analyzes malware to extract IOCs and artifacts
- Enriches findings and maps behavior to MITRE ATT&CK for deeper investigation
- Executes within private, isolated communities for full data privacy

Cyware Intel Operations

- Cyware AI auto-generates summaries, tags, metadata, and cross-entity relationships.
- Pre-built connectors extend actioning across 400+ tools, including SIEM, EDR, and firewalls.
- Playbook Builder and Custom Code Generator turn intelligence into automated action.

About Cyware

Cyware helps enterprise cybersecurity teams build platform-agnostic cyber fusion centers by delivering cyber threat intelligence and next-generation security orchestration and automation solutions. As a result, organizations can increase speed and accuracy while reducing costs and analyst burnout. Cyware's Cyber Fusion solutions enable secure collaboration, information sharing, and enhanced threat visibility for MSSPs, enterprises, government agencies, and sharing communities (ISAC/ISAO/CERTs and others) of all sizes and needs.
