

Cyware Orchestrate

Unleash your SOC with Hyper-orchestration and AI-Powered Automation

Cyware Orchestrate empowers security teams with advanced orchestration and automation capabilities, enabling end-to-end threat response and intelligence-driven workflows, augmented by AI. Built for modern SOCs, Cyware Orchestrate brings together decision-making intelligence, seamless integrations, and real-time incident response, all in one place.

From Problem Points to Actionable Outcomes

Hyper-Orchestration at Scale

Key AI-Powered Capabilities

Cyware Orchestrate powers AI capabilities that enable natural language-driven orchestration, faster response, and intelligent automation across the SOC.

AI Action Node for Threat Actioning

Leverages LLMs for intelligent alert analysis, data normalization, and threat intelligence summarization. Supports multiple AI providers, including OpenAI, Mistral, Meta Llama, Gemini, and Anthropic.

AI-Powered Playbook Builder

Generates full automation workflows from natural language prompts with no coding expertise required, leveraging Cyware's extensive action library.

AI-Powered Custom Code Generator

Auto-generates code blocks for playbooks, removing the need for deep coding expertise and enabling custom threat response logic.

AI-Powered Playbook Runlog Debugger

Identifies playbook failures and surfaces inline step-by-step fixes directly within the run log, resolving incidents without escalation.

Cyware MCP Server

An open-source, server-compliant layer that enables AI-native workflows across Cyware's threat intelligence ecosystem. It allows SOC analysts to trigger actions in Cyware Orchestrate using LLMs, enabling analysts to trigger actions, convert queries into automated playbook executions.

Why Cyware Orchestrate?

Low-Code/No-Code Automation

Simplify security operations at scale with low-code/no-code automation powered by LLM-assisted AI Playbook Builder for rapid workflow creation.

Cloud to On-Premises Orchestration

Unify security across environments through seamless orchestration from cloud to on-premises systems.

End-to-End Automation

Achieve end-to-end automation across cyber, IT, and DevOps workflows to accelerate response and reduce threat dwell time.

400+ Pre-Built Integrations

Leverage 400+ pre-built integrations to connect your security tools, optimize workflows, and boost SOC performance.

A Closer Look at the Cyware Advantage

Capability

Legacy SOAR

Orchestration

Static orchestration without intelligence

Flexibility and Scale

Low scalability across multiple use cases or environments

Interoperability and Integrations

Limited integrations and vendor lock-in

Customizable Playbooks

Standard or default playbooks, pay-per-playbook

Deployment

Limited deployment options

Cyware Orchestrate

Low-code/no-code automation with AI-powered workflow generation and debugging

Engineered for scale across diverse environments

Bi-directional integration with 400+ powerful tools

Unlimited custom playbooks with an extensive library of playbook templates

Deploy anywhere in the cloud or on-premises environment

About Cyware

Cyware is leading the industry in Agentic-powered Operational Threat Intelligence and Collective Defense, helping security teams transform threat intelligence from fragmented data points to actionable, real-time decisions. We unify threat intelligence management, intel sharing and collaboration, with orchestration and automation, eliminating silos and enabling organizations to outmaneuver adversaries faster and more effectively. From enterprises to government agencies and ISACs, Cyware empowers defenders to turn intelligence into impact.
