

# Outpace Threats with Agentic AI-Powered Threat Intelligence Management

Secure your organization with Cyware's agentic AI powered threat intelligence management solutions that transform cyber threat intelligence into action.

Cyware empowers security teams to operationalize threat intelligence and take real-time action. Our platform unifies threat management, secure collaboration, and automation to help organizations outpace adversaries with speed and precision.

From enterprises and governments to ISACs and critical infrastructure, Cyware solutions are designed to enable defenders to transform intelligence into meaningful, measurable outcomes.

### Our Vision

Build a unified ecosystem where every security team collaborates seamlessly, automates intelligently, and advances collective defense.

### Our Mission

To empower security teams with agentic AI-powered solutions that help transform cyber threat intelligence into coordinated, real-time defense.

## Operationalize Threat Intelligence and Strengthen Collective Defense with Agentic AI-Powered Threat Intelligence Management

### Turn Threat Intelligence into Real-Time Action with Unified Management

Manage the full threat intelligence lifecycle, detect compromised credentials, operationalize out-of-the-box feeds and advisories, and enable seamless collaboration.

### Accelerate Threat Response with Agentic AI and Intelligent Automation

Respond faster using agentic AI, automated playbooks, and intelligence-led, adaptive workflows that orchestrate actions across your entire security stack.

### Collaborate and Share Intelligence Securely Across Your Ecosystem

Exchange threat intelligence in real time across teams, partners, ISACs, and ISAOs to strengthen collective defense.

## The Cyware Product Suite

Powered by

**Cyware AI** | Our Agentic AI Engine

### Cyware Intelligence Suite

Unify your entire CTI program to gain complete visibility and faster decision making through sector specific feeds, agentic AI powered TIP, native malware sandboxing, exposure management, and AI driven workflows in one integrated solution.

### Cyware Intel Exchange

Turn raw threat data into prioritized, actionable intelligence with automated ingestion, enrichment, contextualization, and distribution to the right teams in real time.

### Cyware Orchestrate

Accelerate investigations and reduce manual effort by connecting security tools and automating complex response workflows with generative and agentic AI.

### Cyware Collaborate

Strengthen collective defense by securely sharing, consuming, and coordinating threat intelligence across internal teams, ISACs, ISAOs, and trusted partners with full data control.

### Cyware Respond

Resolve incidents faster and more consistently with AI driven case management that streamlines investigations, coordinates response actions, and maintains complete audit readiness across the SOC.

# The World's Leading Security Teams Trust Cyware

From finance and government to healthcare and energy, organizations rely on Cyware to protect critical sectors. Our people and technology work around the clock to safeguard the digital world.

and more!

## Our platform doesn't just streamline operations, it transforms them.

- Automated Threat Intelligence Enrichment
- Premium Out-of-the-Box Threat Intelligence Feeds
- STIX/TAXII-based Bi-directional Threat Intel Sharing
- Bi-directional Data Sharing Across Security Tools
- Customized and Contextual IOC Scoring
- Compromised Credential Management
- TTP Tracking, Analysis, and Actioning
- Threat Campaign Investigation and Tracking
- Malware Sandbox Analysis and Correlation
- Unstructured Threat Intelligence Operationalization
- Playbook-Driven Threat Intel Actioning
- AI-Powered Threat Intelligence Lifecycle Management
- Analyst-to-Analyst Collaboration and more.

Cyware helps bridge inter-team silos by consolidating the entire SecOps infrastructure into a single pane of glass for delivering unified, automated threat response with centralized threat visibility, analysis, and control

- Former CISO, Arvest Bank Bank

The Cyware platform is easy to navigate, and a simple search of 'finance' is enough to determine whether there are any cyberattacks we need to be aware of.

- Cyber Threat Hunt Specialist, Quilter

We are grateful for the continued partnership with Cyware, which has enabled us to make sense of data faster and act in more precise, impactful ways.

- VP of Operations, MTS-ISAC

## Building a connected cybersecurity ecosystem to operate smarter, respond faster, and defend better.

Cyware integrates with over 400 leading security and IT tools such as SIEMs, SOARs, TIPs, and scanners to enable unified and automated workflows across your stack.

Our global network of channel partners, MSSPs, and technology alliances delivers flexible and scalable solutions to security teams worldwide.

## 400+ Integrations

Across Ingestion and Actioning Tools

and more!

## Compliance Coverage
