# Cyware Intelligence Suite

Agentic AI-Powered CTI Program-in-a-Box with Native Sandboxing, Sector-Specific Malware Intel, and Dark Web Domain Sightings

The Challenge

Launching or scaling a CTI program can take months of stitching together feeds, enrichment sources, sandboxes, and response tools, often leaving blind spots around malware behaviour, dark-web threats, and credential leaks. Without built-in automation or AI, analysts drown in low-context IOCs and manual workflows that delay response. The Cyware Intelligence Suite was created to eliminate these hurdles and deliver immediate, measurable security outcomes.

The Solution: Cyware Intelligence Suite

The Cyware Intelligence Suite is a fully pre-configured threat intel program that lets security teams bypass months of setup and start detecting and responding to threats within days. Built on the proven Cyware Intel Exchange platform, the Cyware Intelligence Suite offers native sandboxing, curated sectoral and malware infrastructure threat feeds, integrated exposure management, bolstered with Agentic AI so that teams can operationalize threat intelligence rapidly and effectively.

Building a TI Program with CTI-in-a-Box

Cyware Threat Intel Platform	Pre-bundled Feeds and Enrichments	Preconfigured Tags, Rules and Searches
Preconfigured Threat Investigations	Pre-built Integrations	Trained Analyst Available
Compromised Credential Management		Malware Sandboxing

Key Benefits

Accelerated Time-to-Value
Launch your CTI program in days, not months, bypassing the resource-intensive steps of configuring threat feeds, enrichment sources, workflows, and dashboards.

AI-Powered Threat Intelligence and Investigation
Leverage AI agents to profile threats, enrich intelligence, and generate summaries with suggested tags and relationships. Reconstruct attack flows, map activity to MITRE ATT&CK, and anticipate adversary moves.

Single Hub for All Threat-Intel Requirements
Unify your threat intel operations through a centralized platform that incorporates diverse intel sources and covers end-to-end use cases, from ingestion and enrichment to advanced correlation, analysis, threat sharing, exposure management, and automated response.

CYWARE™

Agentic-Powered Threat Intelligence Management

- Profile threats, enrich IOCs, analyze reports
- Auto-summarize intelligence; suggest tags, relationships
- Map attacks to MITRE; predict moves

Intel Operations

- Automate workflows with manual or fully automated action sequences.
- Connect with security tools using prebuilt integrations.
- Auto-run playbooks from Cyware Orchestrate or external platforms.

Native Malware Analysis Sandbox

- Multi-engine sandbox with flexible VM environments
- Auto-extract hashes, network IOCs, ATT&CK TTPs
- Rich artifacts enable faster detection tuning

Threat Intelligence Feeds

- Sector-specific IOCs across critical industries
- Visibility into botnets, phishing domains, and malware infrastructure with Team Cymru feeds
- Cyware-curated OSINT feeds to deliver relevant, actionable intelligence at scale

Exposure Management for Compromised Credentials and Domain Sightings

- Prevent account takeover with automated IAM remediation
- Detect phishing, brand abuse, and domain spoofing early
- Correlate exposures with malware, TTPs, and infrastructure intel

Smart Capabilities. Strong Outcomes.

See Faster, Act Sooner

Sector-aligned feeds and sandboxing deliver contextual threat intel in hours

Automate the Heavy Lifting

AI-driven parsing and enrichment push high-confidence IOCs across security tools.

Simplify & Scale

Unified platform replaces point tools and scales across distributed teams.

About Cyware

Cyware is leading the industry in Agentic-powered Operational Threat Intelligence and Collective Defense, helping security teams transform threat intelligence from fragmented data points to actionable, real-time decisions. We unify threat intelligence management, intel sharing and collaboration, with orchestration and automation, eliminating silos and enabling organizations to outmaneuver adversaries faster and more effectively. From enterprises to government agencies and ISACs, Cyware empowers defenders to turn intelligence into impact.
