

SOLAMAGIC®

ECO⁺PRO

OUR PROFESSIONAL PRODUCT RANGE

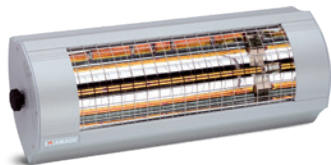

SOLAMAGIC – THE WORLDS BEST PATIO HEATER

Warmth is not exclusively for summer and sunshine – we do not think so anyway. Therefore, it is our mission to create efficient products, which provide you with warmth all year round. Solamagics unique heaters are based upon the most recent and most environment friendly, infrared High-Performance-technologies, which are efficient as well as affordable. Thus, you will get the most value from your outdoor spaces, without having to compromise when it comes to quality.

The Solamagic heaters are not only efficient – they can keep you warm for many years as well. We believe in our product, and we always provide a 5-year warranty on the ECO* PRO-heaters. If you have high standards in terms of aesthetics and functionality, you will get the best solution with a terrace heater from Solamagic.

Solamagic is German quality, thoroughness and diligence on all levels, so you do not have to compromise on anything – not the design either, which we have made elegant and beautiful, so that the heaters always may fit into your outdoor environment.

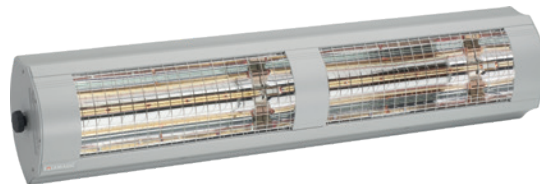

SOLAMAGIC ECO+ PRO

The broad, professional product series, catering to your every need of flexible heating. The Solamagic ECO+ PRO-heaters are 80 % cheaper compared to outdoor gas heating, and up to 42 % more efficient, compared to a standard patio heater. An extensive assortment of models and accessories, flexible mounting options, and with Solamagic HP No-glare®-technology.

- 5-year warranty
- Easy and safe to use
- No installation – just plug in
- No soot or noise
- Can be delivered with an integrated dimming-/control system
- Can be used in any kind of weather
- Manufactured in Germany
- Quality approved by the TÜV
- Long product lifetime of up to 10,000 hours
- Solamagic-patented HP No-glare®-technology
- Residual light: 55-60 LUX
- Newly developed, silver coated W-reflector for improved reflection of heat

SOLAMAGIC ECO+ PRO XL

SOLAMAGIC ECO+ PRO XL is our top performing heater, developed especially for professional use, but of course it can also be used by private persons. It has been developed for use in areas with difficult conditions, where extra power is called for – hence XL. Like the rest of the ECO+ PRO-series, Solamagic ECO+ PRO XL is based on the unique Solamagic technology, but it has the power to deliver just a little extra.

- 5-year warranty
- Easy and safe to use
- Must be installed by an authorized electrician
- No soot or noise
- Can be delivered with an external dimming-/ control system
- Can be used in any kind of weather
- Manufactured in Germany
- Quality approved by the TÜV
- Long product lifetime of up to 10,000 hours
- Solamagic-patented HP No-glare®-technology
- Residual light: 55-60 LUX
- Newly developed, silver-coated W-reflector for improved reflection of heat.

PERFECTING YOUR VALUED OUTDOOR LEISURE TIME

Solamagics unique heaters are based upon the most recent and most environment friendly, infrared technologies, which are heat efficient as well as efficient in terms of economy.

Constant product development

Environment and quality have always been focus-areas for Solamagic. This reflects in our products, which are innovative as well as very energy efficient. Since the beginning in 2006 we have been working hard to improve the efficiency in our heaters and thus to minimize energy consumption. The new and updated ECO+ PRO with High Performance-technology and the powerful ECO+ PRO XL are the result of our efforts.

Thanks to our completely new ECO+ PRO HP No-glare®-technology, the ECO+ PRO delivers an energy efficiency of 100 %. This means, that nearly all energy is converted into heat.

The environment friendly solution

A high performance equals a lower energy consumption, lower costs on electricity and thus less pressure on the environment compared to heaters running on gas, because they emit a lot of CO₂.

Solamagic ECO+ PRO with HP No-glare®-technology is the right choice for you if you want optimized comfort combined with the highest possible degree of eco-friendliness.

Why Solamagic?

Efficient and affordable to operate

No emission of CO₂

No installation

German quality product

See the range of ECO* PRO-heaters
and accessories on page 10-14.

**ECO* PRO XL must always be installed
by an authorized electrician.*

Efficient and affordable heating

- The most efficient outdoor heating
- Low electricity consumption of only 0.14 euro pr. hour
- Quick start – full effect of heating from the first second
- ECO* PRO 2000 covers an area of up to 17 m²
- ECO* PRO XL 4000 covers an area of up to 26 m²
- No wind sensitivity

Environmentally friendly technology

- Solamagic HP No-glare®-technology
- Innovative, silver coated W-reflector for increased reproduction of heat.
- Uses 100 % of the energy input
No direct CO₂-emission
- Far more environment friendly than gas heating, for instance

Simple and safe

- Easy and safe to use
- No installation – just plug in*
- No soot or noise
- Can be used in any kind of weather

The best heater at a great price

- Manufactured in Germany
- Quality approved by the TÜV
- Long product lifetime and a 5-year warranty

THE TECHNOLOGY BEHIND

Solamagic is the leading developer and manufacturer of heaters, and that is so, among other things, because we develop the technology all the time. As we see it, heaters should be extremely efficient, but they should also be efficient in a way that is less harmful towards the environment.

The ECO* PRO-heaters have been developed with our patented High Performance-technology (HP), which makes sure, at that the heat waves from the heaters only warm up what they hit. Therefore, there is no wasting of heat because the surrounding air is not being heated. It also means, that the warmth is not affected by wind or weather, and you can enjoy the good times outside, even if it is windy or cold. The High Performance-technology means, that the heating element is intelligent. We have built in a microchip in the

heating element, which makes sure that the energy is always used in the most efficient way. Moreover, Solamagic uses the most refined filler materials, providing the greatest possible heat reflection and durability. The technology ensures that you will always get what you are paying for.

Besides the high efficiency, we can also be proud of the fact that the ECO* PRO-heaters use 100 % of the energy input. Practically, this means that there is no waste of energy and electricity when you turn on your ECO* PRO. The HP No-glare®-technology also ensures that you do not have to endure the red, residual glare, while enjoying the warmth on the terrace or in other spots. You decide the mood, and you do not have to worry about the cosy atmosphere being disturbed by a red, residual glare.

MANY POSSIBILITIES

The terrace

Prolong the light, comfortable evenings even more with a Solamagic terrace heater. Switch on the heater and enjoy the company.

The garden

Expand the summer season in the garden. Your Solamagic heater can be mounted on a tripod, and you can easily bring along the heating anywhere in the garden. It will have a stable and secure stand.

The balcony

Your balcony expands your residence and the heater only makes the balcony an even bet-

ter room. Switch it on and feel the warmth immediately.

The caravan

The cosiness in the caravan will be even better with efficient heating for the cool mornings and chilly evenings under the awning – and it is affordable as well as safe.

Other places

The heaters can also be used in the carport, in the workshop and in other places where you need efficient and affordable heating solutions.

With Solamagic, there is no reason to be cold.

The sun goes down, but the cosiness continues.

Solamagic adds comfortable hours to the evenings in the garden.

**90% cheaper
than gas**

Uses only for
0.14 euro in current
per hour

EFFICIENT AND AFFORDABLE HEATING

Solamagic ECO* PRO simply has the lowest operating costs on the current market.

The Solamagic ECO* PRO-heaters are 80 % cheaper compared to outdoor gas heating, and about 40 % more efficient compared to an average heater from a different manufacturer.

Starting at just 0.14 euro an hour with a Solamagic ECO* PRO-heater you can heat an outdoor area of up to a total of 14 m². The secret behind the strong operating economy in our products is a constant product development as well as an efficient use of the most recent technologies.

SOLAMAGIC ECO+ PRO OR GAS HEATING?

Compared with terrace heaters that run on gas, a Solamagic ECO+ PRO 1400 gives you approx. 65 % more heat for about 1/10 of the price. An ordinary gas heater consumes approx. 1.6 kg of gas per hour. This corresponds to approx. 4.25 euro per hour incl. VAT. A Solamagic ECO+ PRO 1400 uses electricity at a cost of around 0.14 euro pr. hour, including VAT and other charges.

Easy, simple, and safe

The heaters from Solamagic have many other advantages,

besides just the economical side. They are noiseless and odourless, so that you will not have to endure noise, soot, or smell.

Moreover, you will no longer have to lug around the heavy gas bottles. You just plug the heater directly into a wall outlet/receptacle.

Always with a 5-year warranty

We are proud of our product, and we know that it works.

Therefore, you will always have a 5-year warranty on your heater.

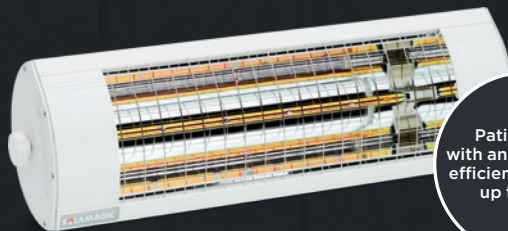

EFFICIENCY

	SOLAMAGIC PATIO HEATERS	TERRACE HEATERS RUNNING ON GAS
Operating costs/hour	Starting at 0,27 euro/hour	4,25 EURO/hour
Energyefficiency	100 % of the energy input is converted to heat in the comfort zone	39 % aof the energy input is converted to heat in the comfort zone
Warm-up phase	1 second = 100 % heating capacity	300 seconds = 90 % heating capacity
CO ₂ -emission	No – no direct CO ₂ -emission	Yes – CO ₂ -emission
Areas for use	Inside and outdoors – on the wall, in the ceiling, built-in, standing on a tripod, under awnings and in parasols.	Outdoors only – standing on a tripod. Should not be used under awnings and under parasols due to fire hazard.
Security risk	No security risk – uses 230 V	High security risk – uses gas
Sensitivity towards wind	None – no/limited wind sensitivity	High – very high wind sensitivity

Solamagic is German engineering at its best.

The heaters, thus, are reliable and maintenance free.

SOLAMAGIC ECO⁺ PRO-PATIO HEATERS

Patio heater with an extra-large efficiency, heating up to 14 m²

ECO⁺ PRO 1400

Our popular and energy-efficient heater for the mounting on a wall, a tripod, under an awning or a parasol. Combines great effect with full flexibility. With HP No-glare®-technology. Practical tilting functionality directs the heat where you want it to go.

Colours: Choose between titanium (light grey), white, anthracite or the unique jet-black.

Effect: 1400 W

Capacity: Up to 14 m²

Connection: 230 V

Connection cord: 180 cm

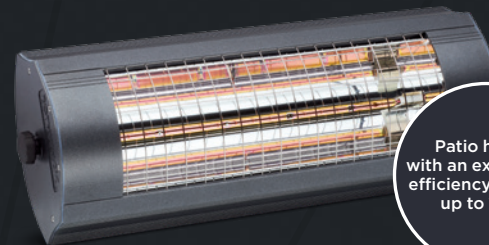

with earthing (Schüko)

Materials: Weather resistant aluminium and stainless steel
Surface coating: Powder coating with an extra underlying coating of corrosion-primer

Dimensions excl. brackets:

l: 44.4 x b: 14.4 x h: 11.0 cm

Weight: 2.3 kg

Patio heater with an extra-large efficiency, heating up to 17 m²

ECO⁺ PRO 2000

Efficient High Performance-heater with an extra-large heating effect.

With HP No-glare®-technology. Heats up to 17 m² with comfortable heating rays.

Colours: Choose between titanium (light grey), white, anthracite or the unique jet-black.
Effect: 2000 W

Capacity: Up to 17 m²

Connection: 230 V

Connection cord: 180 cm with earthing (Schüko)

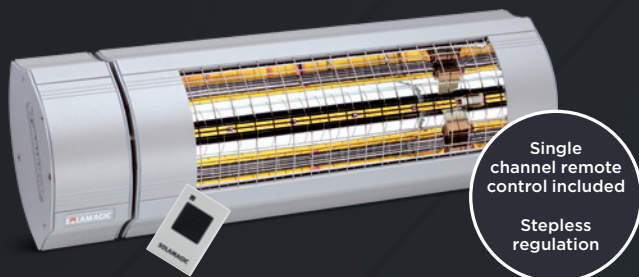

Materials: Weather resistant aluminium and stainless steel

Surface coating: Powder coating with an extra underlying coating of corrosion-primer

Dimensions excl. brackets:

l: 44.4 x b: 17.6 x h: 11.0 cm

Weight: 2.8 kg

ECO+ PRO 2000 ARC

Solamagic ECO+ PRO 2000 ARC with HP No-glare®-technology and variable regulation.

Colours: Choose between titanium (light grey), white, anthracite or the unique jet-black.

Effect: 2000 W

Capacity: Variable, up to 17 m²

Connection: 230 V

Connection cord: 180 cm with earthing (Schüko)

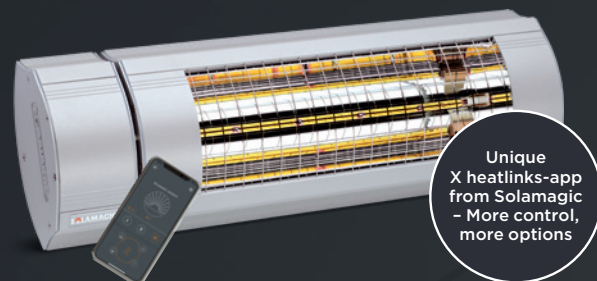

Materials: Weather resistant aluminium and stainless steel

Surface coating: Powder coating with an extra underlying coating of corrosion-primer

Dimensions excl. brackets:

l: 51.6 x b: 17.6 x h: 11.0 cm

Weight: 3.8 kg

ECO+ PRO 2000 BTC

Solamagic ECO+ PRO 2000 BTC with HP No-glare®-technology. Direct controlling from your smartphone.

Colours: Choose between titanium (light grey), white, anthracite or the unique jet-black.

Effect: 2000 W

Capacity: Up to 17 m²

Connection: 230 V

Connection cord: 180 cm with earthing (Schüko)

Materials: Weather resistant aluminium and stainless steel

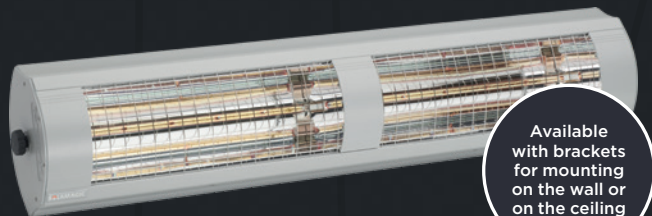

Surface coating: Powder coating with an extra underlying coating of corrosion-primer

Dimensions excl. brackets:

l: 51.6 x b: 17.6 x h: 11.0 cm

Weight: 3.8 kg

SOLAMAGIC ECO⁺ PRO XL- PATIO HEATERS

Available
with brackets
for mounting
on the wall or
on the ceiling

ECO⁺ PRO XL 2800

Solamagic ECO⁺ PRO XL with HP No-glare®-technology is our best performing heater, developed for use in areas with difficult conditions, where extra power is called for.

Colours: Choose between titanium (light gray), white, or anthracite

Effect: 2800 W

Capacity: Up to 20 m²

Connection: 230 V

Delivery for 400 V possible

Connection cord: 180 cm with earthing (Schüko)

Materials: Weather resistant aluminium and stainless steel

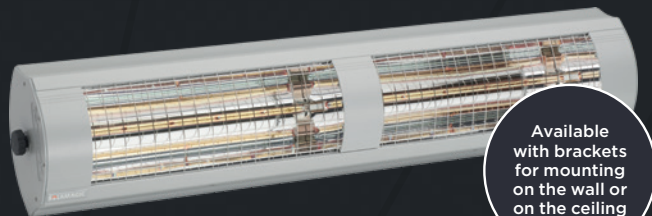

Surface coating:

Powder coating with an extra underlying coating of corrosion-primer Sea/air upgraded

Dimensions excl. brackets:

l: 82.9 x b: 17.6 x h: 110 cm

Weight: 4.42 kg

Available
with brackets
for mounting
on the wall or
on the ceiling

ECO⁺ PRO XL 4000

Solamagic ECO⁺ PRO XL with HP No-glare®-technology is our best performing heater, developed for use in areas with difficult conditions, where extra power is called for.

Colours: Choose between titanium (light gray), white, or anthracite

Effect: 4000 W

Capacity: Up to 26 m²

Connection: 230 V

Delivery for 400 V possible

Connection cord: Depending on individual demands. To be installed by an authorized electrician

Materials: Weather resistant aluminium and stainless steel

Surface coating: Powder coating with an extra underlying coating of corrosion-primer Sea/air upgraded

Dimensions excl. brackets:

l: 82.9 x b: 17.6 x h: 110 cm

Weight: 4.57 kg

SOLAMAGIC ECO+ PRO 1400/2000 In-ceiling

This built-in unit is a product of high quality for discrete, built-in solutions on a ceiling or on a wall. You will have instant, comfortable warmth, when you switch on the heater. This is the thought-through solution for the covered balcony/terrace, entrance area or as an extra heater in the bathroom.

LARGE AND UP-TO DATE ASSORTMENT

With the original Solamagic accessories it is simple and safe to mount the heaters right where you want them – be it on the wall, on the ceiling, under parasols or on a tripod. Solamagic heaters are easy to install and can be mounted outdoors as well as inside. Thanks to the low weight and the good heating isolation, they can be mounted in parasols, under awnings, built into ceilings, etc.

SOLAMAGIC ECO⁺ PRO ACCESORIES

ECO⁺PRO TRIPOD

The handy tripod gives you freedom to choose where you would like your heater to be placed.

The construction with 3 legs makes the tripod safe for any underlay

Colours: Choose between titanium (light gray), white, or anthracite

ECO⁺PRO BASEPOD

The basepod makes it easy to move the heat. The right choice for the terrace.

Colours: Choose between titanium (light gray), white, or anthracite

ECO⁺ PRO PARASOL BRACKET*

The bracket makes it possible to mount your Solamagic-heater on the support beam of a parasol or awning. The bracket can be turned at 90 degrees, so that it will not be necessary to remove the heater in larger parasols when folding it.

Colours: Choose between titanium (light gray), white, or anthracite.

4-CHANNEL REMOTE CONTROL

For Solamagic ECO⁺ PRO 2000 ARC with stepless heat regulation. When you want to control several units individually with the same remote control. Also available in a BTC-version, so that you can control your heater via your smartphone as well as with the remote control.

Colour: Black/titanium (light gray).

RESULTS FROM THE EFFICIENCY TESTING AT THE TÜV

Solamagic patio heaters heat up that much more, compared to other patio heaters

Actual temperature	Area heated with Solamagic ECO+ PRO 1400	Area heated with an average of 1500 W	Solamagic heats that much better
17 °C	13 m ²	8 m ²	39 %
15 °C	11 m ²	6 m ²	45 %
13 °C	9 m ²	3 m ²	67 %

The test was made under impartial conditions, by German TÜV, who measured the effect of all heaters on the market. The criteria for the test was that the actual temperature of respectively 13, 15 and 17 °C was to be increased to a comfort temperature of 21-22 °C. The heaters were mounted on a wall at a height of 2.2 meters, at a tilted angle of 30°, and the test was made with a wind of 2 meters/second.

STRICT QUALITY CONTROL

At Solamagic, not only do we want to deliver a great product, for you to enjoy for many years. Therefore, our heaters are exclusively built at our own manufacturing facilities in Germany, where they must undergo a strict quality control process before they leave the premises. This is the reason why we offer up to a 5-year warranty.
