LipoSlim premium is an weight loss supplement that uses a Himalayan ancient seasoning.

## [LIPOSLIM PREMIUM SUPPLEMENT: OFFICIAL WEBSITE](#)

The formula is only available online at JustBeVital.com and is designed to help you lose weight by lowering your NF-kB level and increasing your metabolism.

Learn everything you need to know about LipoSlim Premium in our review.

### **What is LipoSlim premium?**

BeVital created LipoSlim, a powdered supplement that burns fat.

LipoSlim Premium is available for \$79 per jar and uses natural ingredients that help you lose weight. The active ingredients are ginseng, ginger, and ashwagandha.

LipoSlim's primary objective is to lower and deactivate a molecule known as NF-kB. A high level of the NFkB molecule is associated with a slower metabolism. This molecule is deactivated or reduced to help you lose weight.

All LipoSlim Premium orders come with a money-back guarantee of 60 days.

**[LIPOSLIM PREMIUM SUPPLEMENT: OFFICIAL WEBSITE](#)**

### **LipoSlim Premium Benefits**

According to the manufacturer, LipoSlim premium offers the following benefits:

- Weight loss can be achieved by using an ancient Himalayan spice and other natural ingredients
- Lose up to 63lbs in a short time
- No need for restrictive eating, strenuous exercise or toxic weight loss medications
- Focus on the cause of stubborn fat
- Made in the United States
- Guaranteed 60-day refund

## How does LipoSlim premium work?

LipoSlim Premium addresses the root causes of weight gain: inflammation and slow metabolism.

You may be eating well and exercising, but still struggling to lose weight. The makers of LipoSlim Premium have explained the dangers associated with "metabolic inflammation."

The real cause of stubborn fat is ...'Metabolic inflammation'. This newly discovered type of inflammation targets your metabolism directly...Disrupting the delicate balance of chemicals it needs to burn calories efficiently..."

If you suffer from metabolic inflammation, the body becomes too inflamed for it to burn fat. Even if you are doing everything right, you will not lose weight due to this inflammation.

LipoSlim Premium is designed to reverse the problem by using a combination of natural ingredients. These ingredients are designed to target a molecule that is linked to inflammation in the body.

## LipoSlim Targets NF-kB Molecules to Reduce Inflammation

According to LipoSlim Premium's makers, a molecule known as NF-kB triggers inflammation in your body.

The slower your metabolism is and the harder it will be to lose weight, the more NF-kB you have.

The makers of LipoSlim Premium refer to NF-kB a "metabolism switch," claiming that it "literally switches on" your metabolism when levels fall within normal ranges, but flips off the switch when levels rise.

When you are young, your NF-kB tends to be normal. When you are younger, your NF-kB level is normal. You can consume more unhealthy foods without gaining weight.

As you age, your NF-kB levels rise, causing inflammation and a slowdown of metabolism.

LipoSlim premium interrupts this by using a natural blend. These ingredients reduce NF-kB to a normal level, reducing inflammation and eliminating the root cause of obesity.

## How to take LipoSlim premium

LipoSlim is a powder. The powder is mixed into your favorite drink and taken daily for powerful effects.

How LipoSlim Premium is recommended by its makers:

- Drink one serving of LipoSlim premium daily, mixed with your favorite beverage.

LipoSlim Premium is said to work without dieting or exercise.

**[LIPOSLIM PREMIUM SUPPLEMENT: OFFICIAL WEBSITE](#)**

## LipoSlim Premium Ingredients

LipoSlim premium uses natural ingredients that target the root causes of weight gain, high NF-kB and metabolic inflammation.

LipoSlim Premium contains an "ancient spice" from the Himalayan mountains. This seasoning has been used in cooking and traditional medicine for centuries. Research shows that it inhibits NF-kB, which can help you to lose weight.

According to the manufacturer, here are the ingredients of LipoSlim Premium as well as how they work:

## **Ancient Himalayan seasoning: Resistant Dextrin:**

Resistant Dextrin is a soluble fibre that's typically derived either from corn or wheat. It is a glucose polymer with a short chain, which is used to make low-calorie fiber. Many people with diabetes type 2 regularly take resistant dextrin to regulate their blood sugar. LipoSlim Premium describes resistant dextrin, an "ancient spice" used in the Himalayan mountains by "farmers to emperors." It was sprinkled on food to prevent obesity and maintain health.

LipoSlim Premium today uses the same ingredient for powerful fat-burning effects. LipoSlim Premium's makers cite a study where a group lost 16.6% of their body weight, or 26 pounds, without dieting or exercising. They only took dextrin.

**Fat-Burning Synergy Input #1:** Ginseng Ginseng root extract is used in traditional medicine around the world. According to the manufacturer, the root extraction in LipoSlim Premium 'acts a powerful NFkB 'inhibitor', helping you target weight gain's root cause. The ginseng extract in LipoSlim Premium is said to reduce NF-kB, reducing metabolic inflammation and causing you to lose weight.

**Fat-burning Synergy #2:** Green Tea extract: LipoSlim premium contains green tea, which is rich in antioxidants

and antiinflammatory agents. Green tea is considered by some to be one of the healthiest drinks in the world. Some people drink green tea daily to boost their energy, metabolism and lose weight. The makers of LipoSlim Premium claim that the green tea extract can "enhance thermogenesis", which is the body's natural method of burning calories for digestion and heat. Green tea is a powerful thermogen, which can help you burn more calories.

Green tea contains epigallocatechin galate (EGCG), a catechin that helps burn fat. LipoSlim Premium makers cite a study where a group lost 33 pounds by drinking green tea.

**Fat-burning Synergy #3:** Ginger Root powder: Ginger root powder is the final complementing ingredient in LipoSlim premium. According to the manufacturer of the product, ginger root's natural antioxidant properties can help reduce oxidative stress, inflammation, and weight gain. Ginger, like ginseng has been used in traditional Asian medicine for centuries - especially in Chinese and Korean medicine.

Garcinia Cambogia is considered a complementary NFkB inhibitor. They block NF-kB and help you lose weight because they target the cause of your weight gain.

Garcinia cambogia, besides its effect on NF-kB, is a popular aid for weight loss. According to LipoSlim Premium's manufacturer, garcinia can "reduce weight and food consumption," helping you consume less calories naturally while increasing your calorie burn.

**Blueberry Extract is a bonus inhibitor for NF-kB:** LipoSlim premium contains blueberry extract that activates weight loss. Anthocyanins, a natural colorant found in blueberries, are a large part of the fruit. They also have antioxidant properties. According to LipoSlim premium's makers, blueberries can help regulate fat storage and burning, lower abdominal fat and reduce cholesterol.

**NF kB Bonus Inhibitor # 3:** Turmeric contains natural antioxidants such as curcumin. Curcumin is one of many curcuminoids that have anti-inflammatory properties. These antioxidants, according to LipoSlim Premium's makers, "play a part in weight loss" and help target the root of weight loss problems: inflammation.

**Bonus Inhibitor #4:** Ashwagandha Ashwagandha is used in Ayurvedic medicine and other traditional practices around the world. Ashwagandha is still a very popular tea, supplement and wellness aid. The makers of LipoSlim Premium included ashwagandha in the formula

because it has natural antioxidant properties. These antioxidants are said to "speed up metabolism and reduce inflammation," thus reducing body fat.

**Black Pepper Extract, Bonus Inhibitor #5 NF-kB:** Black pepper extract is often added to supplements in order to increase absorption. Black pepper extract is rich in a natural molecule known as piperine. This molecule has been proven to prevent the accumulation of fat and inhibit the formation new fat cells. Black pepper extract can increase absorption of turmeric by up to 2,000%, according to studies.

LipoSlim Premium is a combination of nine active ingredients that are linked to weight loss success. Some ingredients reduce NF-kB to boost metabolism while others target inflammation. Take one scoop of LipoSlim premium daily to allow these ingredients to do their work.

### **What to Expect after Using LipoSlim® Premium**

Customers who took LipoSlim Premium have reported rapid and noticeable results.

According to the manufacturer, here are some results that you may experience after taking LipoSlim Premium:

**Rapid weight Loss Without Dieting or Exercise:** LipoSlim's primary goal is to help you shed pounds

without having to diet or exercise. LipoSlim Premium can help you lose weight if you're struggling to lose weight despite eating well and exercising. It targets the cause of your weight gain. LipoSlim premium has been credited with helping one woman lose 63 pounds, and others have claimed to have lost more than 2 lbs a day.

**Lose up to 2lbs per Day:** A woman featured on LipoSlim Premium's official website "lost over 2lbs per day" in the first week of using LipoSlim Premium. One customer lost 29 pounds in two weeks. LipoSlim Premium has been credited with a weight loss of 2 pounds per day by multiple customers without revealing their diet or workout routine.

**Target Inflammation Metabolic:** Many weight-loss supplements target inflammation. LipoSlim Premium, however, claims to target an inflammation type called metabolic inflammation. The metabolic inflammation can increase your risk for weight gain, diabetes and other health problems. It is virtually impossible to lose fat.

**Increase Metabolism:** Weight loss is difficult when your metabolism is slow. LipoSlim Premium is designed to increase metabolism by reducing metabolic inflammation. This will help you burn more daily calories. LipoSlim

Premium claims that it targets a "metabolic button" to activate your metabolism.

**Normalize the NFkB Levels and Activity:** At a young age, your NFkB molecule is at normal levels. As you age, the levels of this molecule rise, and it becomes more active. NF-kB protein is associated with inflammation. LipoSlim Premium is said to normalize NF kB levels and help you target the cause of weight gain.

Fast, Safe & Natural Results According the manufacturers of LipoSlim Premium the supplement can help lose weight "quickly and safely." Most healthy adults do not experience side effects when taking LipoSlim Premium.

## **LipoSlim Premium: Scientific Evidence**

The majority of weight loss supplement manufacturers don't conduct clinical trials, because they are expensive and can't guarantee results. LipoSlim Premium was tested in a clinical study to ensure that the formula is as advertised. Below, we'll examine the clinical trial as well as other scientific aspects of LipoSlim Premium.

The makers of LipoSlim Premium assembled a group women of various ages who were interested in losing weight. This is how the trial went:

- In the LipoSlim Premium Trial, 100% of women lost weight.

Women of all ages participated in the study. They wanted to lose weight of any kind, from a few kilos to a total transformation.

- In just 4 weeks, the group has lost 349lbs.
- One woman lost 16 lbs during her first week of taking LipoSlim Premium.
- One woman has lost 29lbs over 2 weeks. Another lost 42lbs.

LipoSlim Premium's makers provide little information on how the trial was conducted, whether a placebo or other weight loss program was followed by the women, if any. The number of women who participated in the overall trial is also unknown. However, all participants lost weight. Some even lost 1 to 2 pounds per day.

resistant Dextrin is the most important component in LipoSlim Premium. LipoSlim Premium's makers describe resistant dextrin, a Himalayan seasoning used in traditional medicine for centuries, as an ingredient that is derived from Himalayas. It is not known if the Himalayan indigenous peoples used resistant dextrin as a natural medicine. It is only possible to get resistant dextrin by processing corn or wheat starch in certain ways.

In a 2020 study, it was found that resistant dextrin decreased obesity and inflammation in mice given a high fat diet. Mice were fed a high fat diet and given either resistant dextrin, or a placebo. The mice in the resistant-dextrin group showed better health parameters, including weight loss and inflammation, than the mice in the control group. This suggests that resistant dextrin may help obesity biomarkers.

Ginger is another ingredient that's important in LipoSlim Premium. It has also been linked to weight loss. In a 2019 study, ginger consumption was associated with better weight loss and metabolism profiles in overweight and obesity subjects. Researchers analyzed dozens clinical trials that involved ginger and found a statistically significant relationship between ginger intake, body weight, and the waist-to hip ratio.

LipoSlim premium contains many ingredients that target Rel, NFKappaB or NFkB. NF-kB proteins are a group of proteins involved in many body processes-particularly those linked to immune health and inflammation. Some studies suggest that targeting these proteins may help reduce inflammation. One study referred to the NF-kB as "the holy grail" of anti-inflammatory drugs.

LipoSlim Premium is a combination of active ingredients that helps achieve the targeted benefits for weight loss, inflammation, and NF-kB. You can experience the advertised benefits by taking LipoSlim Premium every day.

**LipoSlim premium reviews: How much weight can you lose?**

*LipoSlim's official website is full of testimonials from people who have successfully lost weight with LipoSlim*  
- without having to diet, exercise, or exert much effort.

Some customers have claimed to lose 1lb to two lbs per day using LipoSlim premium--more than what they would normally lose on a starvation-style diet.

Verified purchasers have shared some reviews, testimonials and claims on the official site and elsewhere.

A 42-year old customer claimed to have " Lost 19 lbs " using LipoSlim premium, calling the supplement " Easy". She mixed LipoSlim with her favorite drink daily and lost weight.

One customer says LipoSlim Premium has made weight loss a simple process. She feels like she is 20 years younger. She has gained her confidence.

One reviewer found that after adding LipoSlim to her morning coffee, " she lost weight" very quickly.

According to the data on the official LipoSlim Premium site, all participants in a LipoSlim Premium clinical trial lost weight, and the group as a whole lost 349 lbs.

One woman lost 16 pounds in the first 7 days of using LipoSlim Premium and another lost 29 pounds in two weeks. LipoSlim premium caused women to lose between 1lb and 2lb per day.

LipoSlim Premium is easy to use and tasty for most customers. Take it every day and mix it with your favourite beverage to lose weight.

Most customers are satisfied with LipoSlim and its effectiveness. Many customers have shed significant weight without dieting or exercise in a short time.
