Plantsulin, a blood sugar supplement targeted primarily at diabetics.

## [PLANTSULIN SUPPLEMENT: OFFICIAL WEBSITE](#)

Diabetes is a condition where your body does not produce enough insulin to regulate your blood sugar. Plantsulin is a natural product that aims to solve this problem by using plants that mimic insulin's effects.

Plantsulin: Does it really work? What is the effect of Plantsulin on blood sugar? In our review, you will find all the information about Plantsulin that you need.

## What is Plantsulin?

Plantsulin, a nutritional product containing a combination of natural ingredients that promotes healthy blood sugar levels.

Plantsulin is a natural formula that, according to the manufacturer, "dramatically lowers blood glucose levels naturally."

Plantsulin's official website contains testimonials from satisfied customers who claim to have experienced a reduction in blood sugar levels and other benefits, such as weight loss, a youthful appearance, better sleep and more.

Allen Young is a medical researcher who has devoted the past 27 years to blood sugar and diabetes studies. Allen Young spent hundreds of research hours on natural remedies to treat high blood sugar. He eventually discovered the 11 ingredients that are in Plantsulin, which support blood sugar.

Plantsulin can only be purchased through Plantsulin.com for \$69 per bottle. All purchases are backed by a 180-day money back guarantee.

**[PLANTSULIN SUPPLEMENT: OFFICIAL WEBSITE](#)**

## Plantsulin Benefits

According to the official website of Plantsulin:

- Blood sugar levels are dramatically reduced
- No reported side effects with natural ingredients
- Professional medical researchers formulate formulae
- Plant extracts and nutrients, herbs and plant extracts that are scientifically supported
- Supports energy, blood circulation, nerve pain relief and more
- Triple 180-day money back guarantee

## What is the Plantsulin Process?

Plantsulin is a formula that contains special plant extracts proven to support healthy blood sugar levels.

Plantsulin is a plant-based blend that mimics the effects of insulin.

Insulin was discovered by the original inventors in the pancreas gland of a dog. They isolated it and turned it into a medicine. Allen Young's Plantsulin formula was based on similar research. He isolated natural compounds from plants that have insulin-like effects.

Allen and his team market Plantsulin primarily to diabetics, who are looking for a way to get the benefits of

insulin without the side effects. Customers have posted testimonials on the official Plantsulin website about how they lost weight, reduced blood sugar and even stopped taking prescription blood sugar medications after using Plantsulin. This often happened within weeks of beginning to use the supplement.

## **Who is the Creator of Plantsulin?**

Allen Young, a medical research scientist, developed Plantsulin. Allen Young has been a medical research for the past 27 years, and specializes in blood sugar issues like diabetes.

Allen became motivated to create a natural remedy for diabetes after realizing that diabetes treatment had changed so little over the past century. We still use insulin to treat diabetes today, despite the fact that it was first released over a hundred years ago.

Allen's investigation led him into some dark corners in the pharmaceutical industry. Allen was not pleased with what he discovered: Pharmaceutical companies have been suppressing remedies to lower blood sugar levels for decades, because they make so much money selling diabetes medication.

Allen wanted to develop a new approach to diabetes and high blood glucose. He also wanted to make it more natural and gentle. Allen's 27 years of experience in the field of nutrition went into creating Plantsulin, the result.

### *Plantsulin targets the root cause of diabetes & high blood sugar*

Allen Young claims that he has analyzed "thousands" of ingredients to identify those that are the root cause of high blood sugar and diabetes.

Allen's work was based on the original research done into insulin. Insulin was discovered in 1921 and forever changed the medical world.

Two Canadian scientists, Frederick Banting & Charles Best, discovered insulin. The duo, while working at University of Toronto discovered how to isolate insulin from the pancreas of a dog, and then turn it into medicine for diabetic patients. The duo first tested the insulin on dogs with diabetes, and then went onto humans.

Allen was looking for a plant-based insulin alternative that could be used by anyone without a prescription. Allen identified 57 plants which could offer similar benefits as animal-sourced insulin, but at a lower cost.

Plantsulin is made up of 11 plant-based components that have all been shown to support blood sugar levels.

## Plantsulin Ingredients

Allen and his team have spent hundreds of research hours looking for the best plant alternatives to insulin. The team found dozens of plants that had insulin-like properties, including those that support healthy blood glucose levels and promote blood sugar balance.

Allen chose a final group of 11 ingredients backed by science to be added to Plantsulin. As the name implies, all ingredients are intended to act as plant-based insulin alternatives.

Allen says that all the ingredients in Plantsulin allow your health to make an amazing and rapid recovery while balancing blood sugar naturally and quickly while significantly reducing all types of disease.

### *Allen calls the ingredients "miracle herbs."*

Allen and his team have identified 11 different ingredients that are found in Plantsulin.

**Solomon's Seal Extraction:** Solomon Seal was approved by King Solomon during biblical times. The plant's root also looks like the Star of David. Since ancient times, it

has been used as a medicine in the east. A rogue scientist discovered in 1930 that Solomon's Seal extract supported healthy blood sugar. This discovery changed the future of this herb forever. Solomon's Seal Extract is used in many diabetes supplements to help maintain healthy blood sugar. Allen calls it a "naturally glucose-calming super ingredient" because it supports healthy blood sugar within four hours of your first dose. Allen cites a study in which patients experienced rapid blood sugar reductions after taking the herb. Allen's research shows that the herb contains properties "that control insulin production in mammals." This makes it a great choice for diabetics or anyone with high blood glucose.

**Shepherd's purse:** This plant has been used for centuries as a way to balance sugar and insulin levels. It is "loaded with radical-fighting nutrients" that help to boost the immune system and support healthy inflammation. It increases your energy by helping you convert more food into energy. Shepherd's purse, along with Solomon's Seal extract, is one of Plantsulin's two most important ingredients. Allen says that these two ingredients are sufficient to maintain healthy blood sugar.

**Berry of Lycium:** The berry of Lycium is "a wonder plant that supports glucose," according to Allen. Over the past decade, its effects on diabetes have been studied. In a

recent study, diabetics were given lycium after dinner every night for three months. According to Allen, patients' blood sugar levels improved on average by 51% when compared with a placebo. Insulin production also improved by 345%. Allen says that Lycium is a nutrient which "increases the amount of GLUTL in the body". The GLUT4 receptors within the bloodstream signal your body to release its insulin. Plantsulin helps people lose weight by increasing calorie burn.

**Bellflower roots:** Bellflower roots contain platycodin which is a plant-based nutrition that helps to regulate blood sugar levels by suppressing carbohydrate absorption in the intestinal tract. It helps the body absorb less sugar from food than it would normally. Bellflower root has also been linked to weight loss, cholesterol management, blood sugar control, and other things.

**Eleuthero:** Popularized in Ayurvedic medicine, eleuthero has become increasingly popular in supplement form around the world. It is best known for its ability to reduce stress, similar to adaptogens. Eleuthero appears in an increasing number of blood sugar support and diabetes formulas. The same stress management benefits of eleuthero may help promote healthy blood glucose.

**Astragalus:** Astragalus, a root with adaptogenic properties that are similar to eleuthero has been used in Indian traditional medicine for a long time. Astragalus is used in Ayurveda for digestion and stress. Scientists have confirmed that astragalus helps the body to respond to stressors, and can promote overall wellness. Astragalus in Plantsulin could support healthy blood glucose. Allen added astragalus specifically to Plantsulin because of its ability to "improve glucose metabolism and increase weight reduction."

**Licorice root:** Popular and well-known as a natural ingredient to treat diabetes, licorice roots have a long tradition of use in traditional medicines - like eleuthero or astragalus. It's not just a sweet. Some diabetics use licorice root to support healthy blood sugar.

**The Milk Thistle:** The Milk Thistle is an extract of a plant that has been known for its liver-health benefits. Milk thistle is taken by many people daily to help support their liver. The liver is the largest organ in the body, and although it doesn't directly produce insulin or regulate blood sugar, it plays an important role in health. Supporting your liver will help your other internal organs function more effectively. Allen Young, the creator of Plantsulin, cites

**An additional proof:** a study that showed milk thistle improved insulin resistance by 20 percent and had a 100 percent patient satisfaction rate.

**Schizandra Berries:** Schizandra fruit is used in traditional Chinese medicine for many ailments, from digestive problems to blood sugar issues. We know that schizandra fruit is effective because it contains vitamin C, one of the best antioxidants in nature. Vitamin C and other micronutrients in the berry are said to promote healthy blood sugar and inflammation.

**White Mulberry Leaf Extract:** White mulberry leaf is found in many diabetes and blood sugar supplements. It has been shown that it "slows the breakdown of sugars" in the intestine, which allows them to be absorbed into the bloodstream more slowly, according to Allen. White mulberry leaf is often found in blood sugar support formulas.

**Wild Yam extract:** Although less well-known than the ingredients above, wild yam contains a diosgenin nutrient "Which has been shown in studies to improve glucose metabolism and support blood sugar levels," according to Allen. You can find it in an increasing number of supplements that support blood sugar levels.

Allen Young says that the unique combination in Plantsulin has synergistic effect. They work great on their own but even better together. Allen claims that they can help support blood sugar in just a few days.

# IMMUNE DEFENSE SUPPORT

- VITAMIN C
- VITAMIN D3
- ZINC

- ECHINACEA
- TURMERIC ROOT
- GINGER ROOT

## What to Expect after Taking Plantsulin

Plantsulin's official website is full of testimonials from people who have successfully reversed type 2 diabetes or lowered their blood sugar levels after taking Plantsulin.

According to testimonials on the official site, here are some possible results that you may experience after taking Plantsulin:

**Maintain Healthy Blood Sugar:** Plantsulin's primary objective is to stabilize blood glucose. Diabetes is characterized by unstable blood sugar, which can lead to mood swings, cravings for food, low energy and other symptoms. Plantsulin is a product that claims to help maintain healthy blood sugar levels by using a combination of plant extracts to mimic insulin's effects - including wild yam and Solomon's Seal.

**No Side Effects:** Most diabetes medications have side effects, such as fatigue. Plantsulin says it works without side effects. The formula is natural and can help maintain healthy blood sugar levels without any harmful side effects. The manufacturer claims that tens and thousands of people are using Plantsulin without any reported side effects.

No Stress About High Sugar Complications Diabetes, if left untreated can cause serious health issues - including amputations and high blood pressure. Plantsulin, according to the official Plantsulin site, can help you "no longer stress" over the complications of high blood sugar and diabetes.

Get Consistently stable, Long-Term Blood Sugar Readings. Plantsulin guarantees to provide consistently stable readings of blood sugar over the long term. Plantsulin promises to provide stable blood sugar levels, not just temporary support.

Find the remedy pharmaceutical companies don't want you to know about: Plantsulin makers claim that the pharmaceutical industry spent considerable resources trying to remove Plantsulin from the internet. Plantsulin's makers are unsure how long they will be able to sell their remedy online because of their efforts. They want as many diabetics as possible to purchase as many bottles today as they can before it's too later.

**No more brain fog:** Many diabetes sufferers experience mental confusion or brain fog, especially when their blood sugar levels are low. Plantsulin is a product that claims to eliminate brain fog and improve mental clarity by balancing blood glucose levels.

**Boost energy:** People who have diabetes or high blood sugar levels tend to be less energetic. Blood sugar fluctuations can cause your energy levels to fluctuate throughout the day. You could feel a steady daily boost of energy after taking Plantsulin.

**Eat carbs without worrying:** Doctors tell diabetics that they should limit the amount of carbohydrates they consume. Allen Young, the creator of Plantsulin says that you won't have to worry about carbs once you start taking this supplement. You can enjoy foods like pizza, pasta, and lasagna with no worries, thanks to the supplement's blood sugar-balancing effect.

**Lose weight:** According to the manufacturer, your body "burns like a furnace" calories after taking Plantsulin. This gives you more energy. If you have diabetes, you may not have enough energy in your cells, which makes it difficult to burn the carbohydrates you eat and the fat on your body. Plantsulin is designed to reverse this, making it easier for you to burn fat as fuel and lose weight.

## **Plantsulin: Scientific Evidence**

Allen Young, the creator of Plantsulin claims to have over 27 years of experience in medical research. The majority of this time was spent specializing on blood sugar management. Allen Young also cites other research

that verifies the ingredients and their effectiveness in Plantsulin. Allen's research will be reviewed below to see if this supplement is effective.

A 2013 research found that Astragalus may have anti-diabetic properties. Researchers discovered that the plant extract contained polysaccharides and saponins as well as flavonoids, which are linked to relief from both type 1 diabetes and type 2 diabetics. These compounds have antioxidant properties that make this plant useful for combating diabetes and high blood glucose.

balloonflower extract is the second most important ingredient in Plantsulin. It's also known as Platycodon Grandiflorus roots extract. This plant has been linked to weight loss, insulin resistance and other health issues. In a 2016 study that was published in Nutrition, Platycodon Grandiflorus Root Extract helped to reduce body weight, hepatic steatosis and insulin resistant. This is by promoting liver health, fat cell burning, and reducing fat mass.

Plantsulin's other ingredients are also linked to research of a similar nature. In a 2013 study for instance, eleuthero contained natural compounds such as eleutheroside, which could improve insulin resistance. The study was conducted on type 2 diabetes mice, not humans. It does

suggest that eleuthero may have significant health benefits. Licorice is known for anti-diabetic properties that have been proven in multiple studies. Milk thistle, on the other hand, has also been proposed as an alternative way to control blood sugar.

## **Plantsulin Supplement Facts label**

Allen Young, the creator of Plantsulin discloses every ingredient in its formula up front. We know which ingredients are the smallest and biggest based on their order.

According to the label, here's what each Plantsulin capsule contains:

Plantsulin Herbal Blend 800mg with the following extracts: astragalus roots, balloon flowers, eleuthero roots, licorice roots, lycium seeds, milk thistle seeds, schizandra Chinese fruits, Solomon's Seal root, white mulberry leaves, and wild yam.

Other ingredients (inactive), including hypromellose, water (to make the vegetable capsule), and rice concentrate

## Reviews of Plantsulin: What do customers say?

Customers from around the globe have given Plantsulin positive reviews on the internet. They claim to have seen significant results from using the formula. Plantsulin has been used by thousands of people who have had positive results.

These are some of reviews that have been shared on the official site by verified buyers:

One customer says that her husband has seen "dramatic improvements" in his blood glucose levels after taking Plantsulin. These improvements were so dramatic, in fact that "his doctor was shocked."

One customer claimed to have been on diabetes medication for many years before finding lasting relief from Plantsulin. He says he had taken "years of medications" before taking Plantsulin. However, his "blood glucose is lower because of Plantsulin."

The same customer says he is no longer suffering from diabetic neuropathy due to Plantsulin. Before taking Plantsulin, his feet "ached" so badly that he couldn't sleep. His "pain has been drastically reduced" after taking Plantsulin.

One customer bought six bottles of Plantsulin, and she found that the supplement was "great". She recommends it to anyone who has blood sugar issues.

Plantsulin has even been claimed by some customers to be able to reverse type 2 diabetes. After taking Plantsulin, one customer claimed that his type 2 diabetes was "in the rearview mirror".

Plantsulin has also been credited with helping others lose weight and experience other health benefits. One man claims he lost 62lbs by taking Plantsulin.

James Anderson, 52, father of two, from Ohio, saw "life-changing" results within days after taking Plantsulin. His blood sugar levels were erratic before taking Plantsulin. The supplement quickly stabilized them.

James' wife Linda began using Plantsulin. She claims that the more she used Plantsulin, "the more her blood sugar stabilized."

James and Linda both claim that they have been able to continue eating their favorite foods, while maintaining their blood sugar levels with Plantsulin. They did not diet or exercise, but simply began taking Plantsulin.

Plantsulin appears to have caused some customers to stop taking the diabetes medication prescribed by their

doctors. One woman claimed to have saved thousands of dollars on medication and doctor visits thanks to Plantsulin.

The manufacturer claims that "tens and thousands" of people have used Plantsulin, with "no serious side effects reported."

After taking Plantsulin, a customer's husband no longer complains of sore feet. His feet were so bad that he had been scheduled for surgery before taking Plantsulin. His doctor was "shocked" to learn that his surgery had been cancelled after taking Plantsulin. He also noted "dramatic improvements" in the blood sugar levels.

## Prices for Plantsulin

Plantsulin costs \$149 a bottle. A special promotion for 2024 allows you to pay as little as \$69 or less per bottle. Plantsulin's manufacturer has significantly reduced the price as part of a promotional campaign. You can get a bottle for as low as \$49, and also qualify for free shipping.

You can now [order Plantsulin from the official website](#) at a discounted price.

- 1 Bottle: \$69. + \$9.99 Shipping

- 3 bottles: \$177 (59 \$ per bottle) + \$9.99 shipping + Bonus Book
- 6 bottles: \$294 (49 cents per bottle) + free shipping + 2 bonus books + Bonus Bottle
- Plantsulin is available in bottles that contain 60 capsules, which are enough for 30 days. Take two capsules per day to maintain healthy blood sugar.

Plantsulin's 6 bottle offer also includes a "doctor guarantee": If you are not satisfied with the results of taking Plantsulin every day for six months, Plantsulin manufacturers will purchase a competing product at no cost to you. This refund is only applicable to six-bottle purchases.

## Plantsulin Bonuses Included

You can get a bonus if you purchase 3 or 6 Plantsulin bottles. This includes a bonus book or two, along with the free bonus bottle.

You can get a bonus when you buy 3 or 6 Plantsulin bottles online.

**Free bonus eBook #1:** The truth about high blood sugar: Learn how to restore your health quickly and naturally: With all purchases of Plantsulin 3 or 6 bottles, you will receive a free eBook entitled The Truth About Blood

Sugar. This eBook will teach you how to balance your blood sugar levels safely. This book does not claim to only support healthy blood sugar temporarily, but the author claims that the tips will balance your blood sugar levels for good "in just days". You can implement these strategies today to complement Plantsulin's effects.

**Get a Free Bonus eBook 2: Quick Start Guide - Quickly Get Started With This Step-by-Step Overview** When you purchase 6 Plantsulin bottles, you will receive a second eBook which is a combination between a success diary and a quick start guide. The guide explores how to prevent disease and provides strategies that you can use today.

**Bonus Plantsulin Bottle:** When you purchase 6 Plantsulin bottles, you receive 7 in total. Plantsulin is included in all 6 bottle orders. This gives you a total of seven months supply.

## **Refund Policy for Plantsulin**

Plantsulin offers a 3-fold guarantee that protects you in three different ways.

180-day money back guarantee. If you are unhappy with your purchase for any reason, you can get a full refund without asking questions. You can keep the bottles.

Doctor Guarantee. If your doctor is not impressed with your progress after using Plantsulin for six months, then Plantsulin's makers will refund you your money or buy a product from a competitor of your choice.

Give back guarantee. Plantsulin will donate to feed a hungry child for every refund.

This 3x guarantee, unlike any other in the supplement industry, gives you extra peace of mind knowing that Plantsulin will work as advertised.

## What is Plantsulin?

Plantsulin, also known as Plantsulin®, is manufactured in the United States under the same brand name. Plantsulin is produced in a GMP-certified and FDA-registered facility.

Plantsulin was developed in partnership with Allen Young, a medical researcher. Allen Young claims to have spent many years researching plants that had insulin-like properties. He then created a list of 11 active ingredients for Plantsulin.

Plantsulin can be contacted by the following methods:

- Phone: 1-866-450-0610
- Email: [support@getplantsulin.com](mailto:support@getplantsulin.com)

The customer service department is open seven days a week, from 7am-9pm. Within 24 hours, you should receive an email response.

## Final Word

Plantsulin, a nutritional product designed to support healthy blood glucose levels in diabetics.

Plantsulin is only available online. It was developed by a medical researcher with extensive experience in blood sugar management.
