Beyond 40's Lean Belly 3X is a new diet supplement. Lean Belly 3X, which is described as a "advanced belly-toning product," employs natural substances to target persistent, undesirable fat around the abdomen. The official website says that Lean Abdominal 3X is a diet medication that targets belly fat particularly.

Lean Belly 3X works in three methods to tone abdominal fat, aid in weight reduction, and speed weight loss outcomes. Obviously, many diet pills offer identical outcomes; thus, let's examine how Lean Belly 3X works.

Regarding Beyond 40

Beyond 40, located online at Beyond40.com, is a weight loss-focused nutritional supplement firm.

In a word, the firm provides three supplements that combat fat in distinct ways: Lean Belly 3X, a formula for toning the abdomen, Metabolic 6, a formula for fat metabolism, and Carb Burn, a supplement for blood sugar and insulin support).

Shaun and Karen Hadsall, husband and wife, established Beyond 40. The two founded the organization to assist individuals in achieving optimal health. They believe in the efficacy of natural supplements and remedies and want to develop supplements that aid others.

Beyond 40 vitamins are effective for all ages. However, the supplements are aimed mostly towards men and women over the age of 40. In their 50s, Shaun and Karen Hadsall are in the finest condition of their life. Their primary goal with the supplement line is to share their achievements and assist individuals of any age attain optimal fitness results.

Beyond 40's headquarters are in Northville, Michigan. All of the company's dietary supplements have a 60-day return policy.

What exactly is Lean Belly 3X?

What is the difference between Lean Belly 3X and other diet pills that claim to flatten the stomach, aid in weight loss, and provide other benefits?

The supplement contains substances such as safflower seed oil, which has been shown to increase weight reduction. Conjugated linoleic acid (CLA) is abundant in sunflower seed oil, which has been associated to weight reduction effects.

Instead of inundating your body with caffeine, strange plant extracts, and other ingredients, Lean Belly 3X has a single, potent substance associated with weight reduction benefits.

Let's examine what you may anticipate when taking Lean Belly 3X.

Moreover, Lean Belly 3X has substances not seen in other diet pills.

What is the function of Lean Belly 3X?

There are just two active ingredients in Lean Belly 3X: 1,500 mg of safflower seed oil and 5 mg of BioPerine black pepper extract.

Conjugated linoleic acid is an active component found in safflower seed oil (CLA). Over a dozen studies have shown that CLA may aid in weight loss and muscular toning, among other advantages.

Black pepper extract is used in several supplements to enhance the absorption of nutrients. According to Beyond 40, the black pepper extract in Lean Belly 3X increases the absorption of CLA while also enhancing its fat-releasing benefits.

Lean Belly 3X Advantages & Features

Beyond 40 promotes the following qualities and advantages of Lean Belly 3X:

May enhance fat oxidation

Enhances the absorption of fat-soluble nutrients by the body

Black pepper extract enhances the fat-burning properties of CLA

Reduce body fat while improving muscle tone

Encourage a healthy body composition
 Tested by a third party for purity, potency, and safety
 Additionally, the mixture is devoid of caffeine, stimulants, and uncommon botanical extracts. Many diet pills employ artificial chemicals, stimulants, caffeine, and other compounds to provide the impression that they provide the body with energy. Lean Belly 3X provides comparable outcomes without the additional substances.

DIRECTIONS: Take (2) softgels with breakfast and (2) softgels with dinner.

Science-backed: CLA has been shown to decrease body fat while increasing toned muscle in more than a dozen studies and has become one of the most popular non-stimulant toning supplements in the world for a reason. †

Bioavailability: BioPerine®, a patented black pepper extract, is a natural bioavailability enhancer that has been shown to increase the body's absorption of numerous fat-soluble nutrients. †

More information and scientific studies are available at BEYOND40.com.

WARNING: This product is for use by healthy adults over 18 years old. Do not take this product if you are pregnant or nursing. Do not take this product if you are at risk or are being treated for any medical condition. Consult your physician before use if you are taking any prescription or over-the-counter medications. Discontinue use and consult your physician if you experience any adverse reaction to this product. Do not exceed the recommended serving size or suggested use. KEEP OUT OF REACH OF CHILDREN.

STORE IN A COOL, DRY PLACE WITH LID TIGHTLY CLOSED.

Quality Guarantee: Independent laboratory testing ensures potency and purity. GMP quality assured. No sugar, artificial sweeteners, flavors, colors or preservatives added. Gluten-Free.

Dietary Supplement 120 Softgels

Lean Belly 3X Ingredients

The complete list of Lean Belly 3X's components includes:

1,500 milligrams of safflower seed oil with 1,200 milligrams of conjugated linoleic acid (CLA)

5mg of BioPerine fruit extract from black pepper

Gelatin, glycerin, filtered water, and caramel color are also included.

To help weight reduction, you take two softgel capsules of Lean Belly three times daily.

Beyond 40 has not conducted scientific research on Lean Abdominal 3X to validate that it targets belly fat, promotes weight reduction, or contributes to other advantages.

However, the firm lists individual research on Lean Belly 3X's components, including 30+ studies demonstrating weight reduction effects.

It is well known that CLA may aid with weight reduction. In reality, there are several conjugated linoleic acid supplements available online. Numerous individuals use CLA supplements everyday to improve muscle tone and aid in weight reduction.

Conjugated linoleic acid is a fatty acid that occurs naturally in meat and dairy products. It is also a prominent element in dietary supplements. CLA supplements that target muscle mass, blood sugar, type 2 diabetes, and obesity are available.

Lean Belly 3X utilizes a plant-based source of CLA (from safflower seed oil). However, the substance is encapsulated in gelatin. Gelatin is a by-product of animals,

hence Lean Belly 3X is neither vegetarian nor vegan (although the CLA itself is plant-sourced).

For optimal weight reduction outcomes, experts suggest purchasing a CLA supplement with a concentration of at least 80 percent. Lean Belly 3X contains safflower seed oil with an excellent CLA concentration of 80%.

Several studies have connected CLA to potent weight reduction effects. In other research, CLA was no more effective than a placebo for weight loss.

In a 2015 study, for instance, researchers assessed the data on CLA and concluded that "certain trials have shown the advantages of CLA supplementation for weight reduction."

However, some investigations have proven less striking. Several research on CLA have shown harmful effects. Researchers observed that CLA supplementation was associated with "negative effects on glucose metabolism and lipid profile" in the same review study referenced above. In other words, CLA may make it more difficult for the body to regulate blood sugar and cholesterol, two essential health indicators.

According to a 2007 study published in the American Journal of Clinical Nutrition, CLA may decrease fat mass. However, researchers emphasized that the majority of CLA study was conducted on animals and not on people. CLA has been shown to decrease fat accumulation in animals, however human studies have had inconsistent outcomes.

Overall, researchers determined that CLA might aid in weight reduction. After evaluating 18 clinical studies on CLA, researchers determined that a daily intake of 3.2g of CLA "produces a small reduction in human body fat."

Concurrently, a 2004 WebMD piece touted conjugated linoleic acid as "a potential weight-loss wonder drug." This paper reported a number of research tying CLA to potent weight reduction benefits.

In one research, overweight people who took CLA for one year shed 9 percent of their body fat.

However, WebMD cautions that several people who took CLA supplements observed changes in heart disease risk factors. As discussed before, several studies have connected CLA to adverse changes in blood sugar and cholesterol, both of which raise the risk of cardiovascular

disease. One researcher rejected these detrimental effects as "not substantial," while others think they urge concern, particularly for people who are already at high risk for cardiovascular disease.

Researchers examined the impact of CLA on cancer, obesity, and other disorders in this 2019 study published in *Nutrients*. Multiple clinical investigations have found that CLA "is effective against cancer, obesity, and atherosclerosis." Researchers also discovered that CLA affected the gut microbiome. This analysis referenced 239 trials, studies, and other supportive evidence for CLA.

Some study indicates that conjugated linoleic acid (CLA) supplements such as Lean Belly 3X may help you lose weight. It is not a magic bullet for weight reduction, but it might speed weight loss when combined with a healthy diet and regular exercise.

Lean Belly 3X Costs

The price per bottle of Lean Belly 3X is \$59, with savings available when buying several bottles. Each container includes sixty pills, or a supply for thirty days.

Here is a breakdown of prices on [Beyond40.com](https://www.beyond40.com):
