AeroSlim is a natural weight loss supplement that takes a unique approach to shedding those stubborn pounds.

AeroSlim uses a "metabolic respiratory accelerator" in order to burn fat.

[AEROSLIM SUPPLEMENT: OFFICIAL WEBSITE](#)

AeroSlim is only available online at GetAeroSlim.com. It contains a carefully dosed blend of natural ingredients for weight loss.

Find out more about AeroSlim's weight loss effects in our review.

What is AeroSlim?

AeroSlim is designed to boost your body's fat-burning process.

AeroSlim is a chewable tablet that you can take daily to purportedly eliminate stubborn body fat.

AeroSlim is a supplement that works on the "metabolic respiration" principle. The carefully selected ingredients can help you optimize metabolic respiration and burn fat every time you breathe.

The majority of weight loss is achieved by breathing. The more you breathe, your body will receive more oxygen, which allows your cells to burn energy. AeroSlim optimizes your breathing to speed up this process.

AeroSlim costs \$69 per bottle, and comes with a 60-day guarantee.

AeroSlim Benefits

- Burn fat using metabolic respiration
- Weight management and healthy weight loss
- We have 107,200+ satisfied customers.
- Blended with 100% natural ingredients
- Made in the United States at an FDA registered facility
- Guaranteed 60-day refund

What is AeroSlim?

AeroSlim accelerates your body's weight loss abilities.

You spend energy every time you breathe. To stay alive, your body needs to burn calories.

AeroSlim is a metabolic respiration accelerator that accelerates the natural weight loss process.

AeroSlim is a chewable tablet that releases its ingredients instantly. The active ingredients can be absorbed by your body through the blood vessels in the mouth. This allows you to feel the effects faster. AeroSlim can be chewed or melted in the mouth.

AeroSlim Ingredients

AeroSlim is unique in that it contains ingredients not found elsewhere.

AeroSlim contains unique ingredients because it targets a different part of fat loss than the average product (metabolic respiration).

AeroSlim is a weight loss product that contains active ingredients. Here's what the manufacturer says about the ingredients and their effects.

Umckaloabo Extract

In South Africa's traditional medicine, umckaloabo is used as a natural remedy to treat infections. Umckaloabo is effective because of its natural antibacterial properties.

It has also been shown to prevent bacteria from adhering to surfaces. The herb extract, also known as African Geranium or African Geranium, is used as an immune booster in the supplement industry. As an herbal remedy, some combine it with zinc and echinacea. Some make it into a tea. Umckaloabo is known for its ability in South Africa and Lesotho to survive wildfires. This resilience could boost immunity.

Ivy Extract

AeroSlim contains ivy leaf, which is a unique ingredient. It is not usually found in weight-loss aids but is often found in respiratory health supplements. AeroSlim is designed to boost respiratory metabolism. Ivy leaf extract can indirectly promote weight loss because AeroSlim focuses on this. Ivy leaf is a natural remedy that can be used to treat coughs and upper respiratory tract infections. AeroSlim also contains ivy leaf extract to boost immunity, just like umckaloabo. Ivy and umckaloabo can support your immune system if you have respiratory issues or a disease. This will help to improve metabolic breathing.

Mullein Extract

In Turkey and Pakistan, mullein extract is used in traditional medicine for a very long time. We know that

Mullein is effective because it contains many natural molecules which help to fight infection. These natural molecules could have antioxidant and antibacterial effects, which may help to support healthy inflammation in the body. Some people use it in the form of an oil, cream or tea. AeroSlim has a tablet that dissolves. Mullein, like ivy or umckaloabo is known for its immune boosting properties - especially as a natural anti-expectorant. It can help you clear your throat and optimize metabolic breathing to lose weight.

Coltsfoot Extract

The leaf, flower and root of coltsfoot are used in medicine. Coltsfoot tea can be used to treat respiratory infections, sore throats, gout and flu. AeroSlim's coltsfoot is known for its immune-boosting qualities. Many people use it every day to maintain respiratory health and immune system function. Coltsfoot can be used to treat ulcers and some people use it as a general anti-inflammatory agent. Coltsfoot is loaded with antioxidants which neutralize free radicals and help to control inflammation.

Serratiopeptidase

Serratiopeptidase (or serrapeptase) is an enzyme which helps the body to break down proteins and amino acids

into smaller parts. Supplement companies usually extract the enzyme from tapeworms. In Japan and some European countries it is used as a medicine, but in the United States it's a supplement. Serratiopeptidase is used by some doctors to treat inflammation following surgery. Many people today take this ingredient as a supplement to calm down inflammation in the body. It's almost impossible to lose weight if your body is inflamed. AeroSlim contains serratiopeptidase, which could be helpful.

Peppermint Essential Oil

AeroSlim's unique taste comes from the peppermint oil that is infused in each tablet. The tablet has a clean, fresh taste when it dissolves. Peppermint also has active effects. Peppermint flavonoids can help to promote healthy inflammation in the body. This could make it easier for you to lose weight.

AeroSlim is a combination of ingredients that are known for their positive effects on respiratory and immune health. Many ingredients act as natural expectorants, which help to clear the throat. You can optimize your breathing by clearing the throat and boosting immunity.

How Can you breathe away fat? Metabolic respiration accelerates weight loss

AeroSlim works on the principle that you can breath away fat. The supplement is marketed as a "metabolic respiratory accelerator."

Every time you breathe, your body burns fat. Every time you breathe, your body burns away fat.

AeroSlim is a dissolvable tablet that can be taken daily to optimize your breathing and weight loss. It makes it easier for you to lose fat with each breath.

The manufacturer's explanation of the science behind the supplement is as follows:

AeroSlim provides your body with natural "super compounds" it needs to optimize your metabolic

respiration rates...so that you can begin breathing out more stubborn weight all day...without restrictive diets or exhausting exercises."

AeroSlim is a natural formula that claims to help you lose weight without the need for hours of exercise or counting calories.

Specific breathing techniques have been linked to greater weight loss. In 2010, a study showed that just one minute per day of breathing therapy activated the sympathetic system and increased urine hormone secretion among overweight women.

Most weight loss occurs through breathing

Most people are surprised to find out that most weight loss is achieved by breathing.

Weight loss is aided by increasing your heart rate. The main cause of weight loss is actually breathing. The more you breathe quickly, the more fat (and energy) your body burns.

How breathing affects weight loss

- You breathe more oxygen when you take a full, deep breath.

- Your cells will burn more calories as more oxygen enters the body.
- Shallow breathing can cause weight loss, as you don't need as much oxygen. Most of us are naturally shallow breathers.
- Weight loss is a great benefit of deep breathing. By taking a deep breath and "belly breathing," you can force your diaphragm down and relax, giving you more room in your lungs. You can breathe in more oxygen and lose weight.
- Your body won't absorb as much oxygen if you have an infection around your lungs or poor blood circulation. The less oxygen that you breathe, you will lose less weight. AeroSlim contains many ingredients that are known to improve respiratory health.

Your natural breathing patterns can make it hard to lose weight. Your breathing may be the reason you are not losing weight despite eating well and exercising. AeroSlim is a dissolvable tablet that you can take daily to achieve greater weight loss.

AeroSlim optimizes breathing to help you lose weight. AeroSlim contains many ingredients that are known to improve respiratory health and breathing. AeroSlim is a

dissolvable tablet that can be taken daily to help you lose weight.

AeroSlim: How to Use

AeroSlim comes in a bottle with 30 tablets. Take one tablet per day to lose weight.

- One chewable tablet per day
- The tablet can be chewed or melted in the mouth
- AeroSlim's manufacturer claims that the formula is "designed for all ages and conditions", and that no ingredient has been linked to serious side effects. There are more than 107.200 customers, and there have been no severe side effects reported. They recommend speaking to your doctor before using AeroSlim or any other supplement if you are suffering from a medical condition, or taking medication.

AeroSlim: Scientific Evidence

AeroSlim's references page includes ten peer-reviewed studies from Frontiers, Nature and ScienceDirect. Can you breath away fat? Continue reading to learn more about the science behind AeroSlim.

Serrapeptase, one of the unique ingredients in AeroSlim, is known for its weight loss effects. Serrapeptase is used to help with weight loss for many years. The enzyme can help reduce inflammation and break down proteins, which makes it easier to dissolve fatty acids. The ingredient, also known as the "silkworm supplement," is not backed up by formal research that proves it can aid in weight loss. However, many people take it every day to lose weight.

According to studies, the majority of weight loss is due to breathing. The harder you breathe the more weight you will lose. It's not possible to adjust your breathing in order to lose weight quickly, but good breath is crucial for fat loss. In 2010, a study showed that the "Senobi" breathing exercise can help you lose weight. Participants used a stretching breathing technique called Senobi to activate their sympathetic nervous system. Researchers found that just one minute's worth of Senobi breathing increased the secretion of urinary hormones and sympathetic nerve activity compared to patients in a controlled group.

AeroSlim's remaining ingredients are known for their respiratory health benefits. These ingredients, by supporting immunity and improving respiratory health, can help you to better breathe away fat. In a 2013 study, pelargonium extract (umckaloabo), which is derived from

pelargonium sdoides, was found to be effective in treating acute respiratory tract infection. Researchers found 10 studies in which the extract significantly reduced cold and flu symptoms compared to a placebo.

Ivy has been shown to be effective in treating acute upper respiratory infections. Ivy is an effective and safe treatment for coughs caused by URTIs (upper respiratory tract infection) and bronchitis, according to a recent review in the European Journal of Clinical Pharmacology.

AeroSlim is a weight loss product that uses two different approaches to achieve optimal results.

AeroSlim Supplement Facts Label

AeroSlim tablets contain a proprietary blend of 500mg containing all the active ingredients above. Each tablet is disclosed by the manufacturer.

What you'll find in each AeroSlim tablet:

- AeroSlim Proprietary blend with umckaloabo roots extract, ivy leaves extract, mullein flower extract, serratiopeptidase and peppermint oil.
- 20mcg vitamin D3 (100% of DV).
- Other (inactive ingredients) include xylitol and microcrystalline cellulose.

AeroSlim Pricing

AeroSlim costs \$99 per bottles. The manufacturer has reduced the price of AeroSlim to \$69 or less per bottle as part a promotion for early 2024. Free shipping, eBooks and other perks are included with qualifying purchases.

How to order AeroSlim today and get the best price:

- 1 Bottle: \$69. + Free Shipping
- 3 bottles: \$177 (59 cents per bottle) plus free shipping + 2 bonus eBooks
- 6 bottles: \$294 (49 cents per bottle) + free shipping + 2 Bonus eBooks
- Each bottle contains 30 chewable tablet servings. One tablet is chewed daily to lose weight.

AeroSlim Bonuses

AeroSlim's manufacturer has bundled free eBooks as part of a promotion for 2024. This applies to all 3-bottle and 6-bottle orders.

When you order 3 or 6 bottles AeroSlim online, you will receive immediate access to two eBooks:

How to get a firm, toned and cellulite-free skin for life

Simple strategies can be used today to reduce cellulite and improve skin tone. This eBook contains a wealth of tips that you can use today. It includes three foods that your skin will love and a tummy tuck at home technique which takes only one minute per day.

Decadent Desserts: Deliciously Sinful Deserts to Indulge in Without Guilt

This second eBook will help you discover the best desserts to indulge in guilt-free. It's not necessary to give up cookies, cheesecakes or pies in order to lose weight. This eBook contains dozens of recipes, including Gooey Raspberry and Elderberry Magic Crumble and Thumbprint cookies.
