## What is the Energize Brew?

Energize Brew says it was formulated based upon a recent German discovery that uncovered an unexpected cause for belly fat accumulation.

The 2024 research that was published in Nature Medicine in the year 2000 identified low levels of brown adipose tissues as one of key factors in fat accumulation among overweight adults.

Even though it's called fat, brown adipose tissues, or BAT is not fat. Healthy adipose tissues are designed to convert energy from food via thermogenesis.

Brown adipose tissues burn calories to generate heat within your body, which is necessary to maintain the internal temperature of your body. Low BAT levels can decrease the amount of calories that your body burns, which causes your body to start accumulating fat instead of storing them. The first of its kind, Energize Brew directly addresses low BAT levels within your body. Cold showers and ice plunges are also effective in activating BAT.

Energize Tea uses seven powerful ingredients to activate BAT. This ensures you can burn enough calories to maintain your energy and burn fat.

Energize Brew also contains ingredients that help to manage food cravings, blood glucose levels and fatburning mechanisms, which will further assist in your weight loss efforts.

# **Ingredients of Energize Brew**

The Energize Brew is a blend of seven natural ingredients that have been clinically tested and proven to help you lose weight.

The ingredients in Energize Brew work together to control your appetite, improve digestion, and more. The seven ingredients that make up Energize Brew are:

## Chlorogenic Acid:

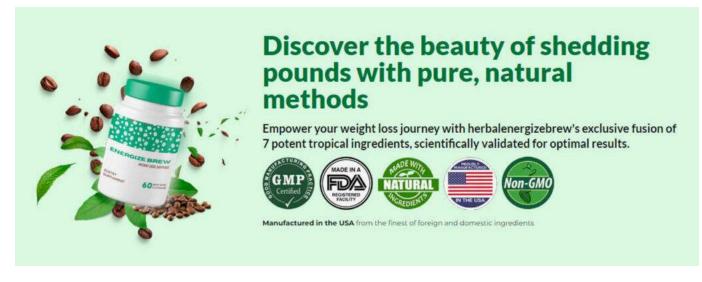

The natural chemical chlorogenic acid can be found in coffee beans that have not been roasted. Over the past decade, it has been extensively researched because of its purported benefits for weight loss. All of these studies concluded that chlorogenic acids work in four different ways to help support weight loss. It improves metabolism, reduces fat absorption, regulates blood sugar, and stops unhealthy food cravings. It could also be beneficial for the cardiovascular system.

## Grape seed extract:

Grape seed extract has many benefits for the immune system, as well as improving digestive health and cognitive decline. Recent research suggests that grape seed extract can be extremely useful in reducing high blood pressure. It does this by removing free radicals which damage blood vessels. Grape seed extract is also being shown to reduce anxiety and stress, which can lead to emotional eating.

#### Chlorella powder:

Chlorella is a type of algae that is mainly grown in Thailand and Japan. It has been used in Thailand and Japan for its detoxifying properties and ability to eliminate wastes and toxins. studies found that chlorella promotes digestive health through the elimination of waste. It may also speed up metabolic functions. Chlorella also has the ability to boost immune system functions, accelerate recovery and remove cholesterol from arteries.

## Panax Ginseng:

Panax Ginseng has been used by millions of people around the world to increase circulation. This is done by increasing nitric dioxide. Studies found that Panax Ginseng could also improve digestion, energy, and eliminate fatigue. Panax Ginseng, although not directly related to weight loss has been shown in studies to balance your gut microbiota. This helps control your metabolism and rate of fat burn.

#### Burdock powder:

Burdock Root has a high concentration of antioxidants, such as quercetin and luteolin. These help to protect the body against free radical damage. It is also used to purify the bloodstream. It is also a natural aphrodisiac, and can help with common skin problems like acne and Eczema.

## Schisandra powder:

Schisandra is used in traditional Chinese medicine for respiratory problems and common colds. It is a adaptogen and helps the body to control its response to stress. This can limit the production of cortisol in your body, and also control your appetite for unhealthy food. Finally, Schisandra can also be used to increase energy and eliminate fatigue.

## Turmeric:

Turmeric has been known to reduce chronic inflammation in the joints. Some newer studies suggest that turmeric can help activate the BAT, which promotes fat loss via thermogenesis. Turmeric also has strong cardiovascularenhancing properties, with studies finding turmeric can eliminate cholesterol and plaque from the arterial walls.

Energize Brew contains only these ingredients. Energize is free of any artificial ingredients, additives, or fillers. All of these ingredients have been tested by a third party for potency, quality, and purity to ensure that only the purest, safest ingredients make it into the final product.

## **Does Energize Brew have any side effects?**

Energize Brew is a weight loss product that's safe and effective. It is for this reason that there have been no reports of serious side effects.

This is not to suggest that side effects are impossible, but they haven't happened yet. All supplements can cause side effects such as headaches, nausea or indigestion. The risk of experiencing these side effects is extremely low.

This product is not for everyone, even though it has no side effects. This product, for example, is not recommended for anyone under 18 years old or for mothers who are pregnant or breastfeeding.

You should also use caution if you have a serious health condition or are taking prescription medications. You should consult your doctor prior to using this product.

Overall, Energize Brew can be considered a safe and effective weight loss product that will not interfere with your health. If you're still not sure if this product is for you, you should speak with your doctor.
