What is NO GRID Survival Projects (NO GRID)?

Unpreparedness is the worst thing you can do in an emergency. Many people would not know how to heat their homes or store food without electricity. Or they may

think that it is too difficult for them to handle all the work themselves. This overwhelming situation is made a little less difficult with NO GRID Survival Projects.

The NO GRID Survival Projects gives you access to a digital guide and a physical one, as well as videos and detailed instructions. This will allow you to make your emergency almost unnoticeable. Michael Major developed the guide, using his military experience to give tips to the public.

Michael Major

Michael Major is the creator and father of NO GRID Survival Projects. He is also a veteran of the military. Michael Major's experience as a NATO Peacekeeper gave him the ability to understand how disasters can destabilize a civilized area. The worst thing about this effect is not necessarily that innocent people pay the price.

Michael was a welder in the Army and worked in aerospace. He built many parts for Boeing airplanes. This is a trade where there are no margins for error. Michael was meticulous and precise in everything he did. He brought this same level of detail to NO GRID Survival Projects. This prompted him to produce detailed

instructions and drawings for each project, which made it easier for the consumer to follow.

Michael is proud of his ability to protect his family and wrote this book so that others could do the same. Michael's projects are centered around maintaining safety, and making it easy to create.

What will consumers learn from NO GRID survival projects?

This guide will give consumers 70 project ideas that can be used to protect loved ones from economic crises and long blackouts. The guide provides instructions that can be used in times of hyperinflation or martial law.

Consumers who have constant access to these plans can achieve the independence they need to stand out from the crowd. Users become more independent as they go through the plans. No GRID Survival Projects means that they don't need to rely on others outside their home.

Nobody wants to make other people rich while they themselves suffer. Consumers can save money by producing some items at home. They will also be more

reliable. Learn how to complete projects that will pay for themselves in the end and result in a profit.

The detailed instructions and drawings will teach consumers how to:

- Users can store up to 165 Gallons of water without having to siphon or pump it.
- Use three empty buckets to create a water filtering system.
- Major retailers can legally provide black powder which is made up of only three ingredients.
- Wind turbines that use salvaged motors and parts from Segways, bikes and treadmills.
- No GRID Survival Projects will teach you how to make survival food. This food can be stored for 20+ years.
- You can create a garden using an old fence, wood planters, pallets and other easily available materials.
- Traps can be set up to deter thieves and intruders from entering your property.
- A non-smoking, fuel-free oven that cooks food without releasing the aroma of cooked food.
- Solar energy systems that can keep small appliances running (like a TV or fridge) during an outage.
- You can use any wood stove to get hot water.

- A recycled shower made from IBCs and a plastic sheet with wooden pallets is ideal for cleaning off-grid.
- Small animals can be trapped with a wire snare or twitch-snare.
- A stove that can heat multiple rooms in the event of a power failure or snowstorm.
- The instructions will include information on the materials cost, the complexity of the project, and the time required to complete it. The information will allow consumers to prepare themselves before starting any project.

These projects won't cost consumers a fortune. The users will not need to spend much time, and the results they get won't put their finances at risk. Michael designed each set of instructions using the cheapest materials to make it easy for anyone to follow.

Purchase Access to the NO GRID Survival projects

Customers who wish to access the NO GRID Surviving Projects may choose between a digital version or a combination of a digital and physical copy. **Both packages are \$37**. However, users will have to pay \$9.99 for the physical version.

Users can access the digital version, NO GRID Survival Projects with every purchase. This purchase includes both the main guide and some bonus content not available anywhere else. The members will have 24/7 access to individual support and the member's section.

The user can request a refund if they decide that the projects are not their favorite projects within 60 days after the purchase.

Bonus Content

Bonuses that are free include:

- Early Pioneers: How to survive an EMP
- 75 Things You Should Stockpile before a Collapse

How to Make Herbal Apothecary

How to Survive an EMP: The Early Pioneer Way teaches consumers what to do each day, for a whole month, to ensure their survival, using ancient techniques.

The 75 Things You Should Stockpile Before an Emergency will inform consumers of the things they need to stockpile before an emergency because they may not be available. They are the first items to be sold out or increase in price, but can also be used as bartering tools or for survival.

How to Make an Herbal Apothecary provides consumers with instructions on how to make their own medicinal remedies. These recipes can be created by users foraging plants in their locality or cultivating a medicinal herb garden.

All of the extra guides, including the main guide NO GRID Survival Projects are only available in digital format.

No GRID Survival Projects: Frequently Asked questions

What will NO GRID Survival Projects do for consumers?

It is obvious that most consumers can survive in the majority of situations. Users can still save hundreds of dollars on food, medicine, and bills every month. These monthly savings can be used to support consumers without electricity.

For how long will NO GRID Survival Projects be available?

Michael only released this book in a limited-edition, so it's impossible to know how long he will offer it. To protect themselves in an emergency, consumers who wish to access this content are advised to purchase it now.

How will this book fare in the next crisis?

The majority of people who buy this guide do not intend to complete all the projects immediately. They save it for rainy days. The guide will not be available in stores so consumers must purchase it online. If the next big emergency comes up, consumers may be left without power or even access to the content. Ordering now will ensure that users are not left without support.

Where can consumers buy NO GRID Survival Projects (No Grid Survival Projects)?

This guide and all its bonuses can only be ordered via the official website.

What happens if the user does not get the benefits they expected?

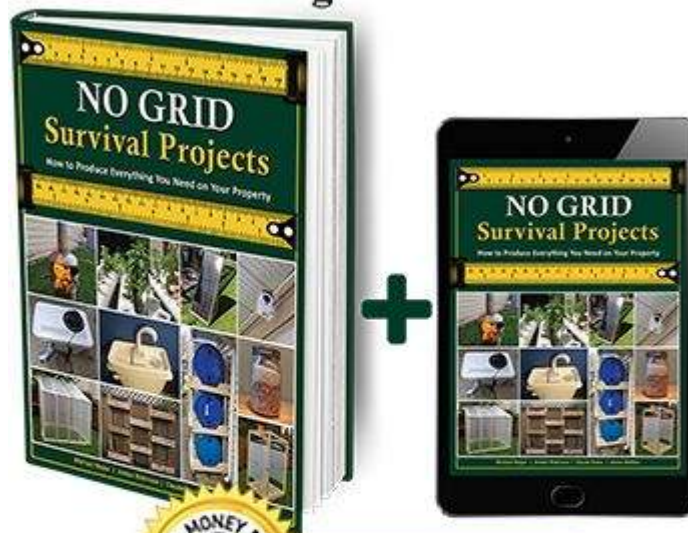

The creators provide a 60-day money back guarantee. Users will receive a refund in full within the first sixty days after placing an order.

- The customer service team can be reached by sending an email to support@nogridprojects.com.

You can read more about it here:

NO GRID Survival Projects offer users a way to improve their chances of maintaining a similar standard of living in an emergency. All the instructions were created by a veteran military with aerospace experience. They are easy to follow and detailed for anyone. The tools and supplies required can be easily sourced at a low cost, so no one needs to spend a fortune just to survive.
