

Deeply Cleansing & Energizing

Xitox's deep cleansing foot pads relieve stress and tension through your feet, allowing you to relax after a long day.

[OFFICIAL WEBSITE: CLICK HERE](#)

Simple Promise makes Xitox, a foot pad that is deep-cleaning. The Xitox Deep Cleaning Foot Pads can be used by anyone to remove harmful toxins from the body that cause discomfort when you sleep. They help you cleanse and detox the body and relieve pain while you sleep.

[SIMPLE PROMISE XITOX: OFFICIAL WEBSITE](#)

Are Xitox pads worth the hype? How does the Simple Promise Xitox Foot Pad work? In our review, you will learn everything about the Deep Cleansing Foot Pads.

What are Xitox deep cleaning foot pads?

Xitox is a cleansing foot pad that uses a combination of natural ingredients to remove toxins. It helps you manage leg, foot, and other aches while you sleep.

Simple Promise is a Camas-based company that produces a variety of supplements.

The foot pads contain natural ingredients that detoxify your soles. These natural ingredients release toxins in the pads and remove toxins on your feet. The pads are used at night and thrown away the next day. With each type of pad you use, you are cleansing your body from harmful toxins.

Toxins can cause foot and lower leg pain. Deep Cleaning Foot Pads remove toxins using natural ingredients to give you a pain-free lifestyle. Some reviewers claim that Xitox Deep Cleaning Foot Pads relieve foot pain better than prescription pain medication.

SimplePromise.com offers Xitox for around \$49 per package. Each box contains 30 Xitox pads.

[SIMPLE PROMISE XITOX: OFFICIAL WEBSITE](#)

How Does Xitox work?

Xitox uses a technique called sea sugar detox. You can detoxify the body by applying the pads for 30 seconds before going to bed. This is without removing sugar, salt or any other common ingredients.

According to Simple Promise citing Harvard research, sea sugar detox is a 100 percent success. One study showed that every patient reduced fatigue on average by 24% and pain by 57%.

The therapy is also completely natural. Simple Promise says that it "works similar to NSAIDs but is completely natural." Sea sugar detox is used by thousands of people for pain relief, fatigue, and better sleeping.

Xitox, by removing toxins from the body, can help support your "second-heart" and increase circulation in your lower legs and feet. It can help reduce swelling, and you'll be able to avoid pain and aches.

Xitox: Benefits and Uses

According to Simple Promise Xitox and sea sugar detox can offer the following benefits.

- Pain relief

- A deep, restful sleep will allow you to wake up refreshed and renewed
- Pain relief and comfort
- Energy and stamina
- Reduced stiffness of your lower legs and feet
- Support healthy inflammation and swelling

Xitox works by supporting your "Second Heart".

Simple Promise created Xitox for your "second heart".

According to Simple Promise, your second heart is made up of a system consisting of veins, muscles and valves located in your foot and calf. This system is designed to return deoxygenated, or stale blood to the heart and lungs.

Your body must then push the blood back to your heart after your heart and lungs have pumped blood through your body. This is your second, or third heart.

Your circulatory system deteriorates as you age. The second heart ceases to function at full capacity.

Deoxygenated blood can cause pain, stiffness and other health issues as your second heart deteriorates.

Others experience chronic pain, red/blue discoloration and other issues. Other people experience chronic pain, blue/red discoloration and other issues.

Simple Promise says that toxins in the environment can affect the performance of your second heart, causing it to be difficult to pump blood around the body. Xitox removes toxins from the body.

Toxins found in the environment can make foot pain worse

The second heart is important in the treatment of foot pain and circulation. Xitox is a toxin-targeting product that supports your second heart.

Simple Promise claims that we are surrounded by toxic substances every day. The toxins are in our food, water, and air.

Many large farming companies use toxic weedkiller. Other toxins, such as arsenic and cadmium are also detectable.

These toxins are a burden on your body and can impede blood flow. These toxins can make foot pain worse. They also weaken circulation and interfere with the second heart.

The active ingredient of the Xitox pad is poliglusam. Most people have never heard about poliglusam, also known as sea-sugar or chitosan. It can attract toxins to your body.

The farming industry uses poliglusam frequently to remove toxic substances from different substances.

The outer shell of the shellfish is processed to make poliglusam. After extraction, manufacturers mix it with a substance known as glucosamine which is an amino-sugar. This is why poliglusam, also called sea sugar, is extracted.

Simple Promise and peer reviewed scientific evidence have identified some of the many benefits of poliglusam.

Researchers found that poliglusam binds to toxic substances "like a magnetic force," making it useful for removing toxins.

Scientists can easily remove the sea sugar (Poliglusam) from the water because it does not dissolve like other sugars.

You can also add poliglusam into water and let it absorb toxins. Then, remove it to clean the water of all toxins.

Poliglusam is also effective on humans. Instead of binding to water, it binds to the toxins within fat molecules because it is naturally sticky to fats.

By targeting fat cells, Poliglusam helps to remove toxins like a magnet from your body, allowing you to support pain relief.

Xitox also uses wood vinegar to flush toxins from your body

We have explained how poliglusam (the active ingredient in Xitox) can attract toxins to your body. After poliglusam has absorbed the toxins in your body, you will need to flush them out.

Xitox is a wood vinegar. It is not technically a vinaigrette; it's instead a substance that's created by burning wood at high temperature to create charcoal. Wood vinegar is created by condensing the smoke of burning wood into a liquid.

Wood vinegar is more effective than charcoal as a toxin-filter. Wood vinegar is used by some farmers to remove toxins from the soil.

The wood vinegar appears to also have an anti-toxin effect on humans. Wood vinegar has the same properties that enable it to remove toxins from soil and purify your body.

Simple Promise explains how the wood vinegar used in Xitox detoxifies the body:

It is able to promote the transport of toxins across cell membranes...So, just like how it can draw toxins out of polluted soil...It can do the same for people through their sweat!" It can promote the transporting of toxins across the cell membranes. So just as it can pull toxins from polluted soil...it can do the same thing for people by sweat !"

Western medicine is discovering more and more of the benefits that wood vinegar can provide. It's popular in China and Korea, but it has been prized there for centuries for its detoxifying properties.

Simple Promise developed Xitox, a foot detoxifying aid that combines wood vinegar and sea sugar (poliglusam).

Xitox Ingredients

Xitox is a combination of ingredients that help to detoxify feet, relieve foot pain and provide other benefits for your legs, feet and lower body.

The two main ingredients of Xitox are wood vinegar and poliglusam. Ingredients include:

Poliglusam: Also called sea sugar, Poliglusam is a substance that binds to toxic substances in water and fatty acids to eliminate them from the body. In agriculture, it is used to cleanse naturally toxins. Studies have shown that

it is safe and effective to use on humans. It attracts toxins found in water and fat, allowing the body to safely remove harmful toxins.

Vinegar Wood: A liquid extract is created when wood is burned to make charcoal. Charcoal has been known for its detoxification effects, and wood vinegar seems to have a similar effect. Xitox utilizes wood vinegar to remove toxins from your body. Wood vinegar is used to remove toxins after poliglusam has collected them like a magnetic.

Leaf of Loquat: The leaf of loquat is a natural product that has been shown to reduce inflammation markers. The leaf contains natural antioxidants which fight inflammation. Your body's response to pain or infection is inflammation. Loquat leaf can help relieve pain in your lower legs and feet by targeting inflammation.

The Chameleon Plant, or *Houttuynia cordata* Thunb: The Chameleon Plant, also called *Houttuynia cordata* Thunb, is used in the production of an essential oil that can be used as a pain reliever. Some studies found that chameleon plant's pain-relieving mechanisms are similar to NSAIDs. The essential oil contains antioxidant compounds that are linked to inflammation and other health benefits.

Tourmaline: Tourmaline emits far-infrared radiation. According to Simple Promise, studies show that the FIR emitted from tourmaline "helps reduce pain significantly." In one study patients with ankylosing and rheumatoid spondylitis experienced reduced pain, fatigue, and stiffness after infrared therapy. In a follow-up study, the same FIR treatment reduced fatigue by 24 %, pain by 57 %, and stiffness by 60 %.

Simple Promise included all these natural ingredients in each Xitox pad. Anyone can now use these foot pads to reduce pain, fight aches and stiffness among other benefits.

Scientific Evidence for Xitox

Simple Promise says it conducted a focus group on an early version Xitox in order to confirm that the product worked as advertised. The company distributed a prototype of Xitox to a group volunteers and collected feedback two weeks later.

According to Simple Promise, here are the results from that focus group:

One volunteer was "100% sceptical" that Xitox could relieve his pain. He was wrong. He calls Xitox "a real marvel of pain relief" because it relieved his pain in his shoulders, knees and back.

After just two weeks, another volunteer reported that her knee pain was "almost gone" and she even cancelled her knee replacement after using Xitox.

One participant found that Xitox pads worked better than "the strongest pain meds prescribed" to relieve his foot pain. He also tried steroid injections, acupuncture and chiropractic treatments. But nothing worked as well as Xitox.

Simple Promise, based on the early results of a focus group, decided to manufacture Xitox and distribute them around the world. Simple Promise has declined to publish

this group's full results online or in a peer reviewed medical journal. However, it has cited other scientific evidence that Xitox is effective.

Poliglusam was extensively studied for its effects on cancer and cancer treatments. A 2019 study discovered that the nanoparticles found in poliglusam activated T cells in breast cancer cells, both in vitro and in vivo.

A second study looked at the effects of poliglusam on weight loss. Researchers found that 1,070+ people who took poliglusam for 4 weeks lost a statistically significant amount of weight. Participants lost 1.7kg more than those taking a placebo.

Wood Vinegar (pyroligneous Acid or PA) is also being studied for its detoxification and health effects. Wood vinegar, which has been used for many years in agriculture due to its natural detoxification qualities, could have antimicrobial properties. This is according to a review that was published in the Brazilian Journal of Microbiology in 2018.

Xitox also contains other active ingredients that support inflammation by using plant-based chemicals. Loquat Leaf has been studied to see if it can help with many conditions. Loquat leaves have been used for centuries as a component of herbal teas, and in remedies to treat skin

conditions, coughing and nausea. In other studies, loquat leaves have powerful antioxidant properties that can counteract inflammation.

Overall, Xitox is a combination of ingredients that are backed by science to help detoxify the body and reduce pain. However, there's limited evidence Xitox is more effective than powerful prescription-strength pain medication as advertised on the official sales page.

How to use Xitox deep cleaning foot pads

Simple Promise recommends that you apply the Xitox Deep Cleaning Foot Pads on both of your soles for five consecutive nights to alleviate pain.

How to use the pads

- **Step 1** Place one pad on the sole of each foot.
- **Step 2** Wear the pads 5 nights in a row, for a total of 6-8 hours.

Xitox Reviews - What do customers say?

Many customers report significant pain relief from using Xitox and implementing sea sugar detox in their lives.

Check out some of the positive reviews that customers have left online.

After five major foot operations in the past three years, one customer experienced nightly foot pain. After using Xitox more than a fortnight, his pain is "gone" and he feels refreshed in the morning.

Other customers have reported feeling a change after using Xitox for the first time. One customer claimed she woke the next morning more refreshed and awake, while also experiencing pain relief.

Some customers stopped taking pain medications after using Xitox. One customer claims he has stopped taking pain medication in just two weeks after using Xitox. He is also sleeping better.

Xitox has been praised by other customers for its ability to relieve pain when no other treatment worked. One customer says that foot pads were "a pain-ending wonder for me when no other thing worked".

Overall, multiple customers report significant pain relief properties linked to Simple Promise's Xitox Deep Cleansing Foot Pads, and multiple customers claim to have experienced superior pain relief with these foot pads compared to pain relief medication - including prescription-strength pain meds and other high-powered solutions.

Xitox Pricing

Xitox is \$49 for a box of 30 foot pads. Each box contains a month's supply. As part of a promotion for 2022, you can pay as low as \$33 a pad when purchasing Xitox today.

This is how the pricing breakdown looks:

- **One Month Supply:** \$49.
- **3 month supply:** \$117 (39 boxes at \$39 each) + free shipping
- **6 month supply:** \$198 (33 boxes per box) + Free shipping

Bonuses included with Xitox

Simple Promise is offering three eBooks as a bonus with the purchase of 3 or 6 boxes of Xitox Deep Cleaning Foot Pads.

You can get three eBooks worth over \$100 if you purchase 3 or 6 boxes today.

Bonus eBook No. 1: Detox Foods: 15 Highly Nutritious and Delicious Superfoods and Recipes for Detoxing your Body: In this eBook, you will learn how to increase your body's natural detoxification capabilities by adding specific superfoods. Some superfoods contain

antioxidants which support healthy inflammation. Other foods fight toxins differently. This special bonus report contains 36 delicious and nutritious breakfast, lunch, and dinner recipes, as well as the #1 Japanese superfood you should keep in your pantry.

Free Bonus Book #2: Stress Detox - 7 Little-Known Mood Boosters: This eBook is worth \$39 but you can get it for free when you buy 3 or 6 bottles today. It contains stress-relieving exercises that are surprising undiscovered. Tip #4 is an example of a "bathroom routine" that will help you relax and calm down instantly. One tip is a blank page activity which reduces stress 10x better than meditation. The guide does not explain basic stress-relieving tips such as exercise or meditation. Instead, it dives into underrated, proven stress-relieving techniques that you have never heard before.

Free Bonus Book #3: Beware 14 "Healthy Foods" to Avoid: People consume foods they believe are healthy every day. Unfortunately, these foods are not healthy. This eBook will help you avoid some of the most harmful healthy foods. These include diet sodas, foods with artificial sweetness, fat-free food, and foods that are designed to fool you into believing you're eating healthily.

Xitox Refund Policy

Xitox comes with a 365-day money back guarantee from Simple Promise.

You can get a full refund if you are not satisfied with Xitox within a year from the date of purchase.

Simple Promise

Simple Promise, a Camas-based health and wellness business, is dedicated to promoting good health. The company offers a variety of liquid tinctures and formulas that support different health goals.

In addition to Xitox, other popular Simple Promise supplements include VivaSlim, Colibrinum, BellyFlush, MetaLean Complete, Epishield Plus, and Glucose Shield, among others.

Contact Simple Promise and Xitox Customer Service via the following methods:

- **Mailing Address:** 3242 NE 3rd Avenue #1051, Camas, WA 98607
- **Phone:** 1-800-259-9522
- **Email:** support@simplepromise.com

Simple Promise has all of its products tested by a third-party lab to ensure that they are as advertised and have

pure, potent ingredients. Alex Del Pizzo, of Simple Promise, also formulated the foot pads and recommended them.

Final Word

Xitox Deep Cleaning Foot Pads provide long-lasting pain relief for aches, pains and inflammation.

Applying the Xitox Deep Cleaning Foot Pads at night to your soles will allow you to wake up pain-free and energized the next morning, without any side effects.
