

Joint Hero is a all-natural dietary supplement designed to relieve joint pain and support optimal joint health by targeting the root cause of cartilage degradation.

JOINT HERO

Joint Hero is a dietary supplement that claims to reduce joint pain and improve mobility with natural ingredients.

Joint Hero helps with joint pains throughout the body.

[JOINT HERO SUPPLEMENT: OFFICIAL WEBSITE](#)

Joint Hero is a Himalayan herbal remedy that can regenerate cartilage in your joints as soon as five days.

Does Joint Hero work? Joint Hero helps with joint pain. Read our Joint Hero review to learn everything you need about the product.

What is Joint Hero?

Joint Hero contains a combination of turmeric, glucosamine and boswellia.

Joint Hero is said to be able to treat even severe cases of arthritis and joint pain. The supplement targets the protein ADAMTS-5, which is responsible for cartilage degradation.

Joint Hero was created by two men: a Dr. John Everett, a health researcher Richard Brown and a doctor called Dr. John Everett.

Joint Hero was developed by the two men based on an ancient Himalayan tea formula that has been shown to reduce joint pain.

Joint Hero costs \$69, and comes with a 180-day guarantee. Joint Hero is only available online at YourJointHero.com.

Joint Hero Benefits

According to the official website of Joint Hero, some of the benefits include:

- In as little as five days, you can eliminate bone-on-bone discomfort
- A protein called ADAMTS-5 can be used to target the cause of cartilage degeneration.
- Mobility and overall movement
- Prolong the life of your cartilage to maintain your independence and dignity
- Made in the USA at a GMP-certified, FDA-registered lab.
- Money back guarantee of 180 days

How Does Joint Hero Work?

Joint Hero claims that it works by eliminating the root cause of joint pain and arthritis.

Joint pain can occur anywhere. The root cause is the same. Joint Hero's makers claim that by addressing this root cause you can permanently alleviate joint pain.

This "root cause" comes from a specific type of protein. This protein destroys cartilage, and any other cushioning that exists between your joints. It worsens pain from bone-on-bone contacts.

Joint pain increases as the protein "melts" away your cartilage.

Joint Hero is a natural blend that helps your body fight the root causes of joint pain. It provides lasting relief.

What is the "Odd Himalayan Ritual behind Joint Hero?"
Joint Hero was developed by the makers of Joint Hero based on a "strange Himalayan ritual."

Joint Hero contains several ingredients that have been used in traditional Himalayan medicine for hundreds of years for joint pain relief, energy, healthy aging and other purposes.

Richard Brown and Dr. John Everett worked together to identify the natural ingredients in a specific type of Himalayan Tea.

The Himalayans have a unique black tea that they drink to prepare themselves for the 1,200-mile "knee journey". Locals up to 90 years old can crawl on their knees and still experience no pain in their joints. This is because this tea has a specific type. Joint Hero was developed by Dr. Everett & Richard based on these ingredients.

[JOINT HERO SUPPLEMENT: OFFICIAL WEBSITE](#)

Who Created Joint Hero?

Joint Hero was developed by Richard Brown in collaboration with Dr. John Everett. Richard Brown claims to be a top independent health researcher in the world.

Richard is not a certified doctor or a medical expert. He's an independent researcher in the field of health. Richard was inspired to discover a cure for arthritis after his mother became addicted to opiates because of her back pain.

Richard has spent the past 20 years searching for the most effective natural remedies to relieve joint pain. Richard claims that his discoveries have helped more than 120,000 people find lasting relief.

Richard also watched as his wife suffered from joint pain and arthritis. When she was 47, her stiff knees began. The pain grew worse and more persistent over time. Her life was being destroyed by the pain.

Barbara's joint problems reached a peak at the wedding of her daughter. Barbara fell when she was leading her daughter to the front, exposing her underwear in front of everyone. She also suffered crippling knee pain.

Richard recommended that Barbara use natural ingredients to ease her joint pain. Barbara recovered miraculously and is more active and mobile than ever. Richard was inspired by the success of his wife and wanted to share Joint Hero with the world.

Richard Partners with John Everett for Joint Hero

Richard does not claim to be a health expert or doctor. claims to have worked with a physician to create Joint Hero. The doctor in question is Dr. John Everett.

Richard asked Dr. Everett about a cure for joint discomfort. Richard was aware that Dr. Everett had a specialization in tribal medicine and healing and believed he would be able to help Barbara with alternative remedies.

Dr. Everett explained to Richard that the real cause of joint pain is not worn-down cartilage. Instead, a new imaging technique magnified cartilage cell at the molecular scale in order to pinpoint the cause: a specific type of protein.

According to Dr. Everett's research, a specific type of protein speeds up the breakdown of cartilage. This leads to joint pains and mobility problems.

This protein's original function is to remove damaged cartilage and help regenerate new cartilage. This protein can become dysfunctional over time and clear away all the cartilage, while preventing any new cartilage from growing.

Dr. Everett recently discovered a number of natural ingredients, some of which come from the Himalayan Mountains. These ingredients inhibited this protein to block the root cause for collagen degradation.

Joint Hero Blocks Cartilage Degeneration by Inhibiting the ADAMTS-5 protein

Joint Hero inhibits the activity of an enzyme that breaks down cartilage. This protein is called ADAMTS-5.

shows ADAMTS-5 as the primary cause of cartilage degradation and osteoarthritis. Some believe that ADAMTS-5 can play a major role in the treatment of osteoarthritis because of recent advancements. We could stop the physiological processes that cause cartilage breakdown by targeting this protein.

Richard, co-creator and creator of Joint Hero says that ADAMTS-5 removes cartilage the same way a piranha removes flesh from a fish. It removes cartilage, leaving behind knees and joints that grind against each other at every step.

Normally, your body will flush this ADAMTS-5 out of your body, preventing cartilage loss. Your body may have difficulty flushing this ADAMTS-5 out due to environmental toxins and general aging. This can lead to an ADAMTS-5 attack.

No amount of medication will help you stop joint pain if you don't address the cause (the ADAMTS-5). Joint Hero's natural ingredients are said to be able to relieve joint pain.

Dr. Everett Discovers Natural Cure in Himalayas for Joint Pain

Dr. Everett traces the origins of Joint Hero to a Himalayan mountain town called Larung gar.

Dr. Everett discovered a local ritual while researching natural remedies. It was a 1,200-mile pilgrimage through rocky terrain. The locals do the pilgrimage mainly on their knees. Some locals perform the pilgrimage each year, even into their 90s.

Dr. Everett wondered how pilgrims were able to endure the long, arduous walk on their knees. He was working with a healer in the area who told him that locals drink an "odd" black tea to relieve joint pain.

Dr. Everett brought that strange black tea to the United States and tested it in his laboratory. He found it flushed out "the A5 protein right out of cartilage cell" eliminating the root of cartilage breakdown.

Dr. Everett was inspired by his discovery and isolated the compounds found in black tea. He then added them to an herbal supplement. Joint Hero is available to anyone today, and contains many of the same ingredients.

Joint Hero Ingredients

Joint Hero is a combination of eight active ingredients that are linked to the relief of joint pain. Some of these ingredients are plants and herbs. Other ingredients are cartilage building blocks.

Joint Hero contains the following active ingredients and their effects on joint pain.

Boswellia Serrata Boswellia Serrata, also known as "shallaki", is an important ingredient in the Himalayan Black Tea that was the base for Joint Hero. This rare resin has been used for centuries by local healers to strengthen bones and joints. According to Dr. Everett, the resin in this bark "flushes away A5 proteins by up to 40 percent." In his research, he also found that it begins to kill pain within five days. Dr. Everett provides further proof by citing a study that showed the resin caused a 29% decrease in stiffness, and a 38% increase in mobility. Other studies found similar results, proving that the tree resin can improve mobility, reduce joint pain and improve overall health. shallaki.

Turmeric Based on its traditional name, Dr. Everett calls turmeric "gur kum". Dr. Everett says that turmeric is "one of nature's strongest painkillers". It also "fights inflammation" better than pills from big pharma, but without any side effects. It has also been proven to reduce joint pain through cartilage

repair. Dr. Everett says that big pharmaceutical companies deliberately suppress the production of Turmeric because of its effectiveness. Dr. Everett showed a patient's knee X rays before and afterwards as proof. After taking turmeric, the A5 protein was flushed out of the knee. This created a gap between the bones and new healthy cartilage.

Methylsulfonylmethane (MSM): Once you flush out the excess A5 protein and rebuild new cartilage, you need to protect that cartilage from degradation. According to Dr. Everett this ingredient is the "number one protector" of your cartilage cells. It protects cartilage from degradation "like bodyguards." It strengthens your muscle fibers and increases overall strength. MSM is a "super-nutrient" for all these reasons, and many more.

White Willow bark Extract: White Willow bark extract may have antioxidant properties, supporting healthy inflammation throughout the body and in joints. White willow bark has been used in traditional medicine since centuries. It is now popularly used in joint pain relief products.

Hydraluronic Acid: The molecule hyaluronic acid can hold up to ten times its own weight in water. It is used to make anti-aging products and skin moisturizers. It can also reduce joint pain, by adding moisture to cartilage and lubricating joints.

Glucosa Green: Glucosa Green by TSI Group Ltd. is a vegetarian version of glucosamine. Glucosamine is usually derived from shellfish. GlucosaGreen, however, contains no shellfish or animal products. This supplement is primarily used to relieve joint pain and can be found in pet and human supplements. Glucosamine, one of the main ingredients in cartilage that forms the cushion between bones, is taken by many adults daily to relieve joint pain.

Piperine: The use of piperine in supplements is to increase absorption. Piperine, a chemical found in the black pepper plant that is a natural substance, has been shown to help the body absorb other active ingredients. In one study, researchers discovered that your body is unable to absorb any significant amount of turmeric by itself. However, by adding black pepper and turmeric, the absorption could be increased by 2000%.

Richard and Dr. Everett call Joint Hero "a miracle of God" and claim that anyone can transform their joint pain, mobility and

health by taking this supplement, regardless of how long they've been suffering from it.

JOINT HERO SUPPLEMENT: OFFICIAL WEBSITE

Why haven't you heard about this joint pain formula before?

Joint Hero is advertised to relieve joint pain permanently, replenish your cartilage, and keep it safe for many decades. Why haven't I heard of it?

According to Dr. Everett, and Richard, the pharmaceutical companies do not want you to know about this drug.

Joint Hero contains turmeric, MSM and boswellia serrata among others. Pharmaceutical companies cannot patent natural ingredients.

According to the Joint Hero official website, Big Pharma has suppressed over time these ingredients, making them difficult to learn about or access.

Richard Everett and Dr. Everett launched Joint Hero to fight back against the big pharmaceutical companies. They don't know how long the site will be online but they hope to give as many people lasting relief as possible.

Barbara's Experience: What to expect after taking Joint Hero

Barbara, Richard's spouse, was among the first people to try an early version Joint Hero formula.

Barbara's doctors warned her that she had no cartilage in her joints and needed surgery. This was causing her to have severe pain and mobility problems.

Barbara's recovery was miraculous after taking Joint Hero. What happened to Barbara when she drank the tea made with Joint Hero's main ingredients for first time?

Barbara's knees were a little better after three days but not the miraculous relief she had hoped for.

Barbara felt less stiff after five days. She could walk around her house without using a cane.

Barbara was able to play with her grandchildren in just two weeks. She was able to roll around on her back and knees.

Barbara was "a different person" after four weeks. She helped around the house and baked cookies. She danced at her granddaughter's birthday party.

Barbara began playing pickleball after three months. Barbara, who had struggled to walk with a walking cane a few short months ago, experienced a miraculous healing by simply drinking the tea with Joint Hero ingredients every day.

Barbara is still independent, vibrant and full of energy. Her doctor, who had recommended knee surgery before, was stunned by the results. The MRI confirmed that Barbara's joint pain had been resolved.

Richard was inspired by Barbara's remarkable recovery and began to share Joint Hero in his community. All of them experienced a rapid improvement, with joint pain being relieved and mobility boosted within a few days or weeks.

Richard was certain that he had something unique, so he shared Joint Hero with everyone. Anyone can now purchase Joint Hero and potentially experience a similar dramatic transformation.

Joint Hero: Scientific Evidence

The manufacturer has cited dozens of scientific studies as proof that Joint Hero is effective on its official Joint Hero reference page. These studies examine the effects of each ingredient in the formula. Below, we'll go over the evidence.

Glucosamine is an important ingredient in Joint Hero. Glucosamine, a substance produced naturally by the body to promote healthy cartilage and lubricate your joints, is one of the most important ingredients in Joint Hero. It is essential for joint health. A 2018 Study published by the Journal of Orthopaedic surgery and research found that glucosamine can help with pain, improve function, and reduce stiffness. It works best when combined with chondroitin.

The pain in joints has also been associated with Hyaluronic Acid . Hyaluronic Acid is a popular ingredient in supplements because of its ability to absorb water many times its own weight. Some people use it to counteract the effects of aging. Some use it to relieve joint pain. Researchers found that

hyaluronic acids could be helpful in osteoarthritis. Researchers studied 44 studies on hyaluronic acids and osteoarthritis. They found that hyaluronic injections can help osteoarthritis of the knees hips and ankles.

Dr. John Everett who was involved in the creation of Joint Hero claims that he developed the formula while visiting a Himalayan village named Larung Gar, and watching a 1,200-mile pilgrimage. Larung Gar, a Tibetan community located in the Larung Valley, is real. Most of the monks are Tibetan, but the Chinese government has restricted the number since 2016.

Some devout Buddhists do a difficult pilgrimage on their hands and knees. Joint Hero was inspired by Dr. Everett's pilgrimage and the natural ingredients that Buddhists consume during their pilgrimage. Some pilgrims trekked on their knees and hands for up to two months in order to reach the holy city of Lhasa.

Turmeric has been used for centuries to treat joint pain. Turmeric contains molecules called curcuminoids, including curcumin - one of the most well-known antioxidants available in supplements. Researchers found that curcumin and turmeric extracts could reduce pain and improve mobility in knee osteoarthritis patients.

Joint Hero is a combination of ingredients that has been shown to relieve joint pain, promote mobility, and maintain healthy cartilage. Joint Hero can help moderate joint pain by supporting moderate transformations.

Joint Hero reviews: What do customers say?

Joint Hero is a formula that has received positive reviews from customers. They have reported powerful results on joint pain. Joint Hero has even caused some people to cancel surgeries due to its pain-relieving effects.

These are some of reviews that have been shared on the official site by verified buyers:

A man claimed he had "struggled for years with arthritis" and tried medication, acupuncture and other therapies, but nothing worked. Joint Hero has helped him "to become pain-free in only a few short weeks."

One customer claimed that her "pain just vanished" when she took Joint Hero for a few minutes per day.

Barbara from Wisconsin, who's story is prominently displayed on the Joint Hero official website, cancelled her knee replacement after experiencing a dramatic decrease in pain and improvement in mobility after taking Joint Hero.

Joint Hero has changed the life of a 65-year-old woman who used to suffer from "constant nagging" pain when she was active. She can now run around her yard "without any pain."

Joint Hero's pain-relieving properties helped a 74-year-old customer cancel his knee and hip surgery. The pain in his hips and legs has disappeared after six months of taking the Joint Hero supplement.

Some customers have confirmed results with doctors. After taking Joint Hero for 6 months, one man claimed that his doctor did an X-ray and was "amazed" to see cartilage regrow.

One customer claimed he was unable to walk up and down stairs without pain. He had a "9" on the pain scale. After taking Joint Hero, he says that going up or down stairs no longer hurts and his pain has dropped to "a 1".

Joint Hero is a formula that has received positive reviews from customers. Some customers claim that they have been able to resolve chronic and severe pain. Some claim that they have improved their mobility.

Joint Hero Pricing

- Joint Hero costs \$69 per bottle. You can save more money if you purchase more bottles.

You can now order Joint Hero on the official website for a discounted price.

- 1 Bottle : \$69 plus shipping
- 3 bottles: \$177 (59 \$ per bottle) + Free shipping
- 6 bottles: \$294 (49 cents per bottle) + Free shipping

Joint Hero comes in 60 capsules per bottle, which is a 30-day supply (30 servings). Take two capsules per day to support joint health.

Joint Hero Refund Policy

Joint Hero offers a money-back guarantee of 180 days. Joint Hero offers a 180-day money back guarantee if for some reason you are not satisfied. To begin the refund process, contact the manufacturer.

About Joint Hero

Joint Hero is manufactured in an FDA registered and GMP certified facility. The manufacturer is located in Sheridan Wyoming.

Joint Hero was created by Dr. John Everett, a traditional medicine specialist. Dr. Everett collaborated with Richard Brown, a health researcher to bring the formula to the public.

Contact the Joint Hero makers and customer service via the following methods:

- Email: support@getjointhero.com
- Phone: (877) 513-3988
- Mailing address: 30 North Gould Street Ste 6188 Sheridan WY 82801

Final Word

Joint Hero is a product that contains a mixture of natural ingredients from the Himalayan Mountains, as well as other locations around the world. It claims to relieve joint pain permanently by protecting cartilage and rebuilding cartilage.

This can be done even if you have severe arthritis that makes it difficult to move.

Joint Hero contains a combination of turmeric, glucosamine and boswellia extract. This blend helps to relieve joint pain, by targeting its root cause: a protein known as ADAMTS-5, which is constantly eating away your cartilage.
