

VolcaBurn is a supplement that claims to boost metabolism, suppress appetite, and increase energy for weight loss.

Volca Burn

Volca Burn is manufactured in the US under the most strictest standards to ensure high purity and potency, in our FDA registered and GMP certified facility

Each ingredient is Plant Based, Soy-Free, Dairy-Free, Vegetarian and Non-GMO

Nothing like Volca Burn has been seen before or will be seen again.

And because activating the "Mechanic Protein" also increases dopamine (the feel-good hormone) Volca Burn is a natural antidepressant too.

All it takes is 3 seconds a day and you'll be dissolving fat and dropping dress sizes fast.

Without dieting or doing gruelling workouts.

As these 7 ingredients come from the healthy Jeju island where life expectancy is one of the highest on earth, they're also great for supporting a healthy heart, brain, joints and so much more.

Okay, it's time for you to finally get the slim sexy body you've been dreaming of and you deserve.

Close your eyes and imagine that for a second...

Stepping on the scale without a single worry in the world, discovering you've lost 2, 3 or 7 lbs in just a week while eating all your favorite foods.

Trying on your tight clothes from years ago and finding out they fit perfectly again

Volca Burn uses the "red tingle trick" to help you lose weight quickly without dieting or exercise.

Volca Burn, created by Nutraville claims to help you lose four to eight dress size using natural ingredients.

Is Volca Burn legit? Is Volca Burn legit? Read our Volca Burn review to learn everything you need about the product.

What is Volca burn?

Volca Burn, a weight-loss supplement from Nutraville in the US, is an effective way to lose weight.

VolcaBurn.com is the only place to purchase this supplement. It uses a combination of natural ingredients that will help you lose weight quickly.

Volca Burn targets a "mechanicprotein" in your body called UCP-1. This protein is inactive for overweight people making weight loss virtually impossible. You can activate protein by taking Volca Burn every day.

Volca Burn, according to its official website, has helped users lose between 10 and 102lbs. Some customers have even lost four to eight dress size while taking Volca Burn.

Volca Burn costs \$59 per bottle, and comes with a 30-day money-back guarantee. The supplement was developed by a Korean American doctor named Dr.Yong who collaborated with doctors from around the globe to create the ultimate aid for weight loss.

Volca Burn Benefits

Nutraville cites Volca Burn as having the following benefits:

- Natural ingredients that activate the mechanic protein
- Formulated by a doctor
- In a clinical study involving 1,620 participants, the weight loss averaged 40lbs per patient

- You can lose up to 1lb a day without exercising or dieting
- Back by a money-back guarantee of 365 days

What is Volca Burn?

Volca Burn targets something called "mechanical protein."

This protein lies dormant in your body when you are overweight or obese. It's almost impossible to lose weight when this protein is dormant.

[VOLCABURN SUPPLEMENT: OFFICIAL WEBSITE](#)

Volca Burn contains natural ingredients that activate this protein. This helps you lose weight quickly, even without diet or exercise.

Volca Burn activates the mechanic protein using the "Red Tingle Hack". Each serving contains a Korean chili molecule that is linked to fat loss. This molecule increases levels of UCP-1 (also known as the mechanical protein), helping your body to convert white fat into a brown fat.

The mechanic protein boosts metabolism, which makes it easier to lose fat.

Volca Burn: What is it for weight loss?

Volca Burn is a powerful activator of the mechanotransduction protein. How does this protein assist in weight loss? Volca Burn helps you to lose weight.

Nutraville claims that Volca Burn aids in weight loss through three methods, including:

transforms fat-storing fat cells into fat-shrinking fat cells. According to Nutraville, this allows you to "eat all your favorite foods" without worrying about it adding to your waistline. Your body will stubbornly store fat when your mechanotransduction protein has been deactivated. Volca Burn helps you lose weight by allowing you to eat the foods that you love.

Raise your internal body temperature. Nutraville claims that Volca Burn increases your core body temperature and helps to burn fat from the inside. Nutraville claims that Volca Burn, by raising your core body temperatures, can "dissolve the deepest and most stubborn fats from every inch of your body"

Increase metabolism by 250%. Gives you an advantage in fat burning. How many calories you burn per day is determined by your metabolism. A faster metabolism will burn more calories. Volca Burn, according to Nutraville

will increase metabolism by 250%. This allows you to burn calories more 24 hours per day, leading to greater weight loss.

Volca Burn, according to Nutraville is " an antidepressant natural" as it " boosts dopamine". Dopamine is the feel-good chemical in your body. Dopamine is released by your body when you complete a task, engage in an activity that rewards you, or perform a rewarding behavior. Nutraville claims that Volca Burn contains natural ingredients that can raise dopamine.

Who Created Volca Burn?

- Volca Burn is a Korean-American doctor named Sun Jae Yong.
- After hearing the tragic story of Kait, Dr. Sun Jae Yong decided to develop a weight-loss supplement.
- Kait's pilot husband Mark Davis contacted Dr. Sun Jae Yong to find out the secret for weight loss.
- Kait gained weight after having her two children. Dieting and exercise failed to help her lose weight.

Kait had a humiliating experience on Waikiki Beach, Hawaii. She was caught in the surf, which caused her to fall and wash unconscious on the beach. Many beachgoers made jokes about her being a beached whaling. Kait was unconscious and barely breathing

when she was taken to hospital. Doctors said that Kait's survival was " a miraculous ".

Kait's humiliating experience led her and her husband, Sun Jae Yong, to find out the secret of weight loss.

Dr. Sun Jae Yong tells Kait that she must take specific ingredients to activate the Mechanic protein. In a nutshell, Dr. Sun Jae Yong advised Kait to take a blend of specific ingredients to reactivate the mechanic protein in her body and help her lose weight. Kait lost 48lbs without exercising or dieting in only a few weeks after taking these ingredients.

After Kait's dramatic journey of weight loss, Dr. Sun Jae Yong performed a large-scale clinical trial to confirm the formula worked. This clinical trial included 1,620 men and women who were overweight. Participants lost weight at a rate of 100%, and the average person shed an amazing 40 pounds.

Dr. Sun Jae Yong was inspired by Kait's dramatic transformation and clinical trials to partner with Nutraville, a US-based supplement manufacturer to launch this product around the world.

Who is Dr. Sun Jae Yong?

Dr. Sun Jae Yong, a Korean-American MD and creator of Volca Burn.

Nutraville partnered up with Dr. Sun Jae Yong when they discovered he was a whistleblower in the weight loss industry.

The 63-year old doctor spent 16 years in weight loss industry, working for the three biggest companies in the world. He left the industry because he was disillusioned by their work. Their goal was to keep fat people, not help them lose weight.

Dr. Sun Jae Yong published groundbreaking research online on the root cause of weight-loss, such as the link between mechanic protein and weight-loss.

[VOLCABURN SUPPLEMENT: OFFICIAL WEBSITE](#)

Why is Volca Burn Called Volca Burn

Dr. Sun Jae Yong, a Korean-American doctor, is the creator of the Dr. Sun Jae Yong.

Dr. Sun Jae Yong based his Volca Burn formula off ingredients found on the South Korean Island of Jeju.

Jeju is a popular tourist destination with a varied landscape that's filled with herbs and plants unique to the island. Volca Burn contains many ingredients that have their origins in Jeju.

Jeju, a volcanically active island, is a World Heritage Site.

Volca Burn is named after the volcanic soils in Jeju where gochugaru, among other ingredients, grows naturally. Gochugaru is the main ingredient in Volca Burn. It also increases your body's internal temperature. This molecule, found within chili peppers, gives the supplement a volcano-like effect.

Kait's weight loss journey: What to expect with Volca Burn

Kait was the first person in the world who took Volca Burn. Kait tried everything to lose weight after a humiliating incident.

Kait was able to lose weight rapidly with Volca Burn, while improving her overall health.

What happened to Kait when she took Volca Burn the first time?

- Kait lost 48lbs, and 5 dress sizes after taking Volca Burn.
- Kait's doctor found that her cholesterol and blood pressure, as well as her heart rate, were in excellent condition.
- Volca Burn increased Kait's levels of dopamine by "52%" compared to before, a significant increase in the hormone that makes you feel good.
- Researchers found that Kait's brown fat-shrinking cell count increased by 720% following Volca Burn. This made it easier for her to lose weight on a cellular level.
- Nutraville was motivated by Kait's impressive weight loss results and conducted a clinical follow-up trial. The Nutraville team was impressed by Kait's weight-loss results, but they wanted to make sure the supplement would work for everyone.

Nutraville recruited 1,620 obese people for its first Volca Burn trial. Volca Burn caused 100% of Participants to lose significant weight. 97% of the participants lost more than 28lbs. In the clinical trial, participants lost an average of 40 pounds.

Nutraville's Volca Burn was launched after the successful clinical trials, to help Kait's story inspire other people to lose weight.

Red Tingle Hack: How it Works

Volca Burn activates the mechanic protein in your body using a "Red Tingle Hack".

This protein is responsible for transforming your fat-storing cell into a fat-shrinking cell.

Your mechanic protein deactivates as you age, which causes your fat cells not to shrink, but instead store fat. You gain weight because your fat cells do not receive the message that they should shrink.

Volca Burn was developed by Dr. Sun Jae Yong, Nutraville's team of scientists to address the root causes of weight gain. Volca Burn targets weight loss at the cellular levels to ensure that weight is permanently lost.

The Mechanic protein Turns White Fat Into Brown Fat and Boosts Metabolism Volca Burn is a simple product that works. It activates the protein mechanic, which allows you to convert white fat cells to brown fat cells.

Brown fat cells are more efficient at burning energy than white fat. They are packed with mitochondria. You burn

more calories when you have more brown fat cells than white fat cells.

You may find that as you age your body develops more white fat cells making it difficult to lose weight.

Volca Burn can help you lose weight faster by converting white fat cells to brown fat cells. Nutraville describes brown fat as "a fat shrinker."

Volca Burn activates UCP-1, a protein that is unique to the conversion of white fat cells to brown fat cells. This protein works like a "mechanic" to turn your white fat cells into brown fat, helping you lose weight quickly.

Volca Burn Ingredients

Volca Burn is a combination of seven plant and herb extracts. These plant-based components were selected for their ability activate the mechanical protein and aid in weight loss.

Nutraville has listed all the active ingredients and their functions in Volca Burn.

Gochugaru Gochugaru, one of the main ingredients in Volca burn. It is a naturally occurring plant that grows on the Korean volcanic island of Jeju. It has a long-standing history as an energy booster and metabolism enhancer.

Nutraville claims that gochugaru is a valuable ingredient for weight loss supplements because of its "amazing antiinflammatory, blood-pressure regulating, digestion and anti-aging effects". This ingredient activates your mechanical protein and helps to convert white fat cells into Brown fat cells. Dr. Yong believes that gochugaru helps people on Jeju Island, South Korea to eat a high carbohydrate diet and still be slim.

The Luma Leaf: The Luma leaf is an Asian tropical plant. The plant has been used in traditional medicine for more than 5,000 years. The luma leaf is a rich source of vitamin B6, iron, zinc and other micronutrients. It helps to boost energy and reduce fatigue. Dr. Yong included luma leaf in the Volca Burn formulation because it "boosts the activation by 47% of the mechanic proteins," giving you a "5% more calorie burning effect."

Irvingia Gabonensis *Irvingia Gabonensis*, a popular weight loss supplement. Dr. Yong included the fruit in the formula because of its ability to reduce bloating, improve digestion and manage cholesterol among other benefits. *Irvingia gabonensis* is rich in fiber, which can help you lose weight in multiple ways. It also helps activate the protein that promotes rapid weight loss.

Olea Europaea Olea Europaea, the formal name for olive leaf. According to Dr. Yong's research, olive leaf "activates" the mechanistic protein. This is why it has such a significant role in the formula. According to Dr. Yong, olive leaf extract has many benefits, including heart health, diabetes relief and skin healing.

Basil Holy: Basil Holy contains a natural chemical known as eugenol, which can help reduce stress, anxiety and depression. The plant extract, also known as "herbs of God," is used in Ayurvedic medicines to treat various ailments. Holy basil, as it turns out, is also rich in ursolic acids. According to Nutraville, this acid "boosts activation of the mechanistic protein in the body."

Citrus Bioflavonoids Many oranges contain bioflavonoids, which are natural anti-inflammatory molecules and antioxidants. Nutraville powdered these flavonoids and added them to Volca Burn. The manufacturer claims that the bioflavonoids found in citrus can help you reduce your appetite by reducing food cravings. These bioflavonoids can improve your dental health.

BerberisVulgaris: BerberisVulgaris is a herb that's best known for its blood sugar-lowering effects. Berberis vulgaris is effective because it contains a natural chemical

known as berberine, which appears to have positive effects. Berberine is used in traditional Chinese medicine for thousands of years. In weight loss, berberine can help control blood sugar swings, improving appetite control.

Volca Burn is a 100% plant-based formula that's free of dairy and soy. Nutraville says it conducts third-party checks to ensure the quality and purity.

Volca Burn: Scientific Evidence

Can you lose 100 pounds without exercising or dieting? Is your body deactivated by a mechanic protein that

prevents you from losing weight. Below, we'll go over the science behind Volca Burn.

Volca Burn is a product developed by a real medical doctor. It was developed by a Korean American medical doctor named Dr. Yong. This gives the supplement more credibility than other supplements available online. It is a doctor-formulated and doctor-endorsed weight loss supplement.

Dr. Ethan Roberts , an anti-aging and metabolic specialist from Australia, , also verified Dr. Yong's formula . He tested Dr. Yong's ingredients to ensure they were effective. Numerous other doctors, including an Indian expert named Dr. Preeti sharma, a Swiss doctor named Dr. Michael Schmidt also contributed to Volca Burn's formulation.

Volca Burn is supported by over 280,415+ success story across the United States. These include men and women that have lost weight rapidly while taking Volca Burn.

Nutraville claims that has also conducted a large clinical trial to prove Volca Burn's effectiveness. The company recruited 1,620 men, women and children aged between 30 and 84. Volca Burn was taken by these volunteers, and almost all of them lost weight. This is how the trial went:

Nutraville assembled a of 1,620 men and women in order to test Volca Burn.

People aged 30 to 84 were included in the group. Some people were 10lbs overweight while others were 100lbs overweight. There were people of every shape and size.

Nutraville reports that 100% of participants had an increase in their metabolism . The average metabolic rate of all participants increased by over 420%.

Nutraville reports that over 50% of participants " looked as if they were 20 years older in reverse "

After the trial 100% of participants " had to buy new clothing because their old clothes did not fit anymore"

100 % of participants who took Volca Burn lost significant weight. 97% of participants have lost more 28lbs while the remaining 3% has lost more 10lbs. None of the 1,620 trial participants lost less than 10lbs.

Participants lost 74lbs and more.

Nutraville conducted a follow-up several months later, and discovered that "the weight was never regained." Volca Burn had caused a "deep cell change" in the participants.

Volca Burn was not used by participants as part of a diet or exercise plan.

Nutraville decided to share the supplement with the world based on its impressive results. The company has never published its trial results in an independent medical journal. However, it describes the details of the trial on the Volca Burn official website.

Volca Burn contains gochugaru - a natural ingredient that is used to make Korean chili powder. This ingredient increases internal body temperature, which can help you lose weight. Cayenne powder is used in many weight loss products for the same reasons. Gochugaru is not proven to help with weight loss. WebMD says that Korean red pepper paste contains vitamin C, protein and vitamin A as well as dietary fiber, all of which may help you lose weight.

Volca Burn's official website does not provide any evidence that it can help an average person lose up to 40lbs without diet or exercise in just a few weeks. Some of the natural ingredients could still provide modest weight loss.

Volca Burn Reviews - How much weight can you lose?

Nutraville markets Volca Burn specifically to those who want to lose weight quickly without having to diet or exercise.

Volca Burn is the formula to use if you are looking to lose weight by taking a capsule every day. Volca Burn is a weight loss formula that has been proven to work.

The [official website](#) features testimonials and claims about weight loss.

Volca Burn claims that you can "lose 2, 3 or 7 pounds in a week, while eating your favorite foods". Nutraville claims that because the supplement targets weight gain's root cause (your deactivated mechanical protein), it is possible to lose up to 1lb a day without dieting.

Volca Burn is one of the most popular weight loss supplements in history.

Volca Burn was used by a 37-year-old woman who lost 42 pounds . She used to worry about her appearance in front of friends. Her friends now can't stop complimenting the woman. She claims that she has also lost 42lbs, without counting calories or exercising exhaustively.

Volca Burn is said to have helped a woman "lose 5 dress sizes". Her old jeans now fit. She felt that weight loss was impossible after she turned 40. She's more confident now, thanks to Volca Burn.

According to Volca Burn's official website, Kait is a 45 year old Chicago mom of two who lost 48 lbs. of fat in only a few weeks, "without dieting and exercising".

Kait's boyfriend lost 2.4 lbs on the first day that he used Volca Burn. In the end, he lost 27lbs in "just weeks" after taking Volca Burn. Volca Burn allowed him to continue eating pizza, cheesecakes, hamburgers and ice-cream while losing weight.

Volca Burn has helped a 45-year-old male drop "4 belt notch" since taking it. He feels more energetic and does not sweat as much.

Volca Burn's weight loss benefits are its main selling point. Volca Burn has been reported to improve skin conditions, increase energy, relieve joint pain and boost emotional well-being.
