# PROSTACLEAR: OFFICIAL WEBSITE

BPH, or prostate inflammation, affects many men over the age of 50. Initial manifestations include persistent weariness, urinary problems, and recurrent UTIs. Most men treat prostate issues with over-the-counter medications. Unfortunately, these drugs are addicting and extended use may produce serious negative effects. In addition, the majority of pharmacological treatments do not address the underlying reasons of BPH.

ProstaClear is a traditional Eastern treatment that combats prostate problems and restores urinary health. How does the composition function? Is it safe? Continue reading to know more about the ProstaClear vitamin.

## What is ProstaClear?

ProstaClear is an ancient-ingredient-based dietary supplement that improves male reproductive health. The dietary supplement is plant-based, effective, and safe. The product is marketed to older men with prostate issues.

[CLICK HERE TO CHECK DISCOUNTED PRICE \(24HRS LIMITED OFFER\)](#)

ProstaClear is purportedly an ancient Eastern solution that may restore prostate health in less than one month. It contains natural substances derived from pure sources that have been clinically shown to promote male health. ProstaClear is user-friendly and unlikely to cause issues.

ProstaClear promises that it helps restore male reproductive health after harm has occurred. It may restore urinary health, improve sexual health, and free the male from the need for frequent bathroom breaks, embarrassing toilet accidents, and the concern of not emptying the bladder completely.

## How does ProstaClear work?

What factors create prostate issues? Recent findings, according to the manufacturer of [ProstaClear](#), indicate that prostate inflammation and BPH are caused by hormonal imbalance. Two vital male hormones influence the prostate and sexual health. Testosterone and DHT levels should be ideal for male reproductive health.

DHT or Dihydrotestosterone is responsible for the androgenic characteristics of males, while testosterone promotes energy and brain function. An imbalance in hormones promotes prostate inflammation and poor physical health. Dietary supplement ProstaClear works by:

- By balancing estrogen, DHT, and testosterone hormones, prostate inflammation is reduced.
- Inhibiting the activity of the aromatase enzyme prevents the loss of muscular characteristics.
- It improves blood flow to important organs, including the penis, so enhancing sexual wellness.
- ProstaClear enhances the body's metabolic processes, enhancing mental health and maximizing vitality.

The manufacturers of ProstaClear believe that using the product for around six weeks may enhance the urinary system, sexual health, and general well-being.

## ProstaClear Ingredients

According to the manufacturer, ProstaClear is formulated with 762mg of high-quality components clinically proved to improve prostate health, among other advantages. Supposedly, the prostate support supplement is manufactured by a team of professionals in a GMP- and FDA-compliant facility. Key ProstaClear components comprise three blends including the following substances: 105mg Estro Blend, 507mg Test Support Blend, and 150mg Liv Support Blend. Each meal contains clinically-approved amounts and is unlikely to cause undesirable side effects.

Chrysin ProstaClear is able to inhibit the transformation of testosterone into estrogen. The chemical is a confirmed aromatase inhibitor that is effective against prostate inflammation. Like passionflower and bee propolis, chrysin is found in minute quantities.

Multiple studies suggest that Chrysin may boost immunity by speeding the formation of white blood cells. Additionally, it may enhance the quality and amount of sperm, hence increasing fertility.

ProstaClear says that it may assist men in achieving erections and orgasms of high quality. Chrysin may increase testosterone levels, especially in elderly men. Likewise, the substance may increase libido and enable men to maintain rock-solid erections.

**Supplement Facts**

	Amount Per Serving	%DV

- Indole 3 Carbinol (IC3)

Cruciferous vegetables such as cauliflower and cabbage are rich in IC3. It promotes prostate health by accelerating the liver's estrogen metabolism. According to studies, an increase in estrogen levels in elderly males might have negative consequences. It may stimulate prostate growth and the development of feminine traits.

Indole-3-Carbinol aids in detoxification and promotes cellular health. It may minimize free radical damage and increase metabolic rates. Additionally, IC3 may boost the immune system and defend against inflammations.

- The species Eurycoma Longifolia

The manufacturers of ProstaClear claim that the addition of Eurycoma Longifolia to the mix may encourage a healthy metabolism and increase energy levels. Southeast Asians utilize the plant to cure a variety of sexual health problems, such as low libido, weak erections, and overall poor sexual performance.

In addition to being a DHT blocker, Eurycoma Longifolia may prevent the development of male breasts and the loss of muscle mass. According to studies, it helps with testosterone levels, fluid retention, testicular atrophy, prostate enlargement, brain health, and mental weariness.

- Extraction of Fenugreek

An effective aromatase inhibitor may stabilize male hormones. It inhibits enzymes that convert testosterone to estrogen. Supposedly, fenugreek seeds might help men as they age.

In addition to accelerating metabolic rates, fenugreek seeds boost energy levels. It may enhance the quality of erections and help men achieve satisfying orgasms on demand.

- Resveratrol

The manufacturers of [ProstaClear](#) claim that resveratrol is a powerful antioxidant that may improve cellular health. It is found in red wine and is believed to protect against cardiovascular diseases. Resveratrol assists in the regulation of hormones, hence limiting the overproduction or underproduction of some important male hormones.

As an aromatase inhibitor, resveratrol may reduce DHT and estrogen levels. Likewise, it may increase male fertility and prevent prostate hypertrophy.

- Sow Thistle

There is a clear correlation between milk thistle seed benefits and prostate health. Extracts from the seeds of milk thistle [Silybum marianum (L.) Gaertn. (Asteraceae)] have demonstrated effectiveness in inhibiting human prostate cancer growth in a variety of invitro and in vivo preclinical models, according to studies.

Milk thistle possesses immunomodulatory, antioxidant, and anti-inflammatory properties. In addition, research indicates that milk thistle contains potent flavonoids that enhance prostate health and hormone balance in males. Recent study indicates that milk thistle's advantages extend beyond prostate health to include liver and gallbladder health.

- Cissis Quadrangularis

Cissis is an old plant with therapeutic properties. According to scholarly research, it may reduce stress, reduce oxidative stress, and regulate emotions. Contains a high concentration of antioxidants and vitamin C. Tissue may also help sleep, decrease inflammation, and promote tissue repair, as well as boost eyesight, protect the immune system, promote bone health, and enhance the thyroid gland.

## Dosage, Side Effects, and Results of ProstaClear

ProstaClear is available in easy-to-swallow capsule form. The manufacturer recommends taking two ProstaClear capsules nightly to treat prostate troubles. ProstaClear may be obtained without a prescription.

However, the product is marketed to males older than 21 who want to improve their prostate and sexual health. In addition, ProstaClear cautions against exceeding the suggested dose.

### Side Effects

Supposedly, ProstaClear is formulated with natural components. It contains no synthetic preservatives, fillers, binders, or dangerous ingredients. To ensure safety and efficacy, each ingredient is present in exact proportions.

ProstaClear is unlikely to cause side effects when used at the recommended quantities. Nevertheless, a person taking any medicine should obtain medical advice before to starting the procedure.

### Results

According to [ProstaClear](#), the supplement might provide obvious benefits in less than thirty days. It may considerably improve the urinary system, enabling users to urinate with the speed of a racehorse. However, the formulation's efficacy varies from person to person. ProstaClear suggests using the mix for a minimum of six months for optimal results.

## Advantages and Features of the ProstaClear Supplement

- ProstaClear helps restore prostate health and reduce the likelihood of developing inflammatory diseases.
- It may increase sexual desire, hence enhancing male performance.
- It may foster confidence and boost a person's self-assurance.
- ProstaClear may enhance cognitive function and lower the risk of mental disorders.
- It may augment the energy levels.
- ProstaClear helps improve urinary health and reduce the likelihood of UTIs.
- It could increase male fertility.
