

NerveFuel™ is a natural supplement with plant-based ingredients that claims to enhance nerve function, prevent nerve damage, and relieve neuropathy symptoms.

RIZE LABS

ADVANCED FORMULA

TO HELP YOUR BRAIN STAY HEALTHY

Nerve fuel is an online-only supplement that relieves nerve pain.

[NERVE FUEL SUPPLEMENT: OFFICIAL WEBSITE](#)

Nerve Fuel is priced at \$69 per month for a supply of ingredients that include ingredients from a 5-second Pacific recipe. This recipe promotes natural nerve pain relief.

Nerve Fuel: Does it live up to its hype? How does Nerve Fuel function? In our review, we will tell you everything that you need to understand about Nerve Fuel.

What is Nerve fuel?

Nerve Fuel, a nutritional product created by US Health Labs, is an effective supplement.

US Health Labs offers the supplement for anyone who suffers from nerve pain, including tingling or numbness in their extremities.

Diabetics can experience nerve pain on their hands and/or feet. Other people experience nerve pain due to other conditions. You can purportedly relieve nerve pain by taking three Nerve Fuel capsules daily. The ingredients are natural and have been proven to work.

US Health Labs, which discovered the recipe and decided to share it around the world, is the source of many ingredients in Nerve Fuel.

Nerve Fuel costs \$199 per bottle. As part of the 2024 promotion, you can order Nerve Fuel today for just \$69 or less per bottle.

Nerve Fuel Benefits

According to its official website, Nerve Fuel has many benefits.

- Get relief from burning, tingling and numbness for a long time
- Fast nerve pain relief
- Blend of natural ingredients
- Heal your nervous system from within
- Traditional remedy from South Pacific Islands
- Guaranteed 90-day money back

What is the Nerve Fuel?

Nerve Fuel is a combination of ingredients that are linked to the relief of nerve pain.

Natural ingredients in Nerve Fuel are said to help with the cause of nerve pain, inflammation. An overactive immune system is characterized by high levels of inflammation. It's possible that your immune system is sending oxygen-rich blood to the affected area, but this does not work, causing swelling and pain.

You can target and relieve your nerve pain by taking three Nerve Fuel capsules daily. Some of these ingredients target a biomarker called mir-21 while others target more general biomarkers. According to US Health

Labs high levels of inflammation reduce mir-21 levels and lead to nerve pain.

[NERVE FUEL SUPPLEMENT: OFFICIAL WEBSITE](#)

On the official website, the creator of Nerve Fuel describes the method of action of the supplement:

By eliminating oxidative damage [i.e. inflammation], we could potentially eliminate nerve pain for good. "By eliminating oxidative stress [i.e. inflammation], we could potentially eliminate pain in the nerves for good ."

Nerve Fuel contains a number of ingredients that are native to the island of Fiji. A former medical laboratory director from Fiji developed the supplement in part. He discovered that certain natural ingredients relieved nerve pain. So he combined them into a convenient, all-in one supplement.

The 5-second island recipe from the South Pacific inspired Nerve Fuel
The ingredients of Nerve Fuel have their origins on a tropical South Pacific island.

James Sullivan describes Nerve Fuel, a 5-second "island formula" that was created with US Health Labs, as a formula that "eliminated my father's pain in record time."

James and US Health Labs found that several islands in South Pacific, including Fiji and Tahiti, had low rates of nerve pain. They examined the diet of the islanders to find out why they had such low nerve pain rates.

James and US Health Labs discovered a set of ingredients that were used as a natural medicine on an island in the South Pacific. You're consuming a concentrated, condensed version of some of these active ingredients when you take Nerve Fuel. This could promote your own nerve-pain relief.

- Nerve fuel targets Sensory Sabotage as the Root Cause of Nerve pain
- Nerve Fuel was developed to combat the root cause for nerve pain, sensory sabotage.

US Health Labs discovered that people with nerve pain have one thing in common: sensory sabotage. Nerve pain can also be affected by diet, exercise and other conditions such as diabetes. According to US Health Labs, nerve pain is caused by sensory sabotage.

You can supposedly "eliminate pain quickly" by taking two capsules a day of Nerve Fuel.

Who is the creator of Nerve Fuel?

James Sullivan created Nerve Fuel in partnership with US Health Labs.

James saw his father suffering from nerve pain over the years. The nerve pain was so severe that doctors advised him to amputate his two feet.

James' father took a combination of medications to treat his nerve pain. These included Gabapentin Lyrica and Neurontin. The pills were supposed help him, but they only gave him an hour's relief.

James, a man from a remote island of the South Pacific, discovered the secret for relieving nerve pain. James' father recovered miraculously after he was given these ingredients. He even walked out of the hospital with his own two legs.

James Discovers Little Known Molecule Linking Nerve Pain

James' South Pacific remedy relieved his father's pain. The formula's success is attributed to a little known molecule that relieves nerve pain.

James' research suggests that the South Pacific remedy is a natural molecule in the body which has been linked to nerve pain.

This molecule is called Mir-21. Your body feels more pain when levels of mir-21 drop. Low levels of Mir-21 disrupt a pain-related protein. You can target the cause of nerve pain by increasing levels of this molecule.

Low levels of the molecule have also been linked to "sensory-sabotage", which is the cause of nerve pain. Sensory sabotage may cause you to experience numbness and tingling.

What is James Sullivan all about?

James Sullivan is a South Carolina native who lives near Charleston.

James is a scientist and medical technician who spends his days working with doctors and nursing staff.

James used his knowledge of science and medicine to try to treat the diabetic neuropathy in his father. James didn't want to see his father in pain so he researched natural remedies.

James' father was told to take a certain blend of natural ingredients. After taking these ingredients, he recovered quickly.

James advises against taking gabapentin

James' father took gabapentin. This popular neuropathy medication is commonly prescribed for diabetics, as well as other neuropathy patients.

James advises that gabapentin should not be taken for a variety of reasons, including

James first cites an study that found gabapentin to be no more effective in relieving nerve pain than a standard placebo.

James also cites studies that show gabapentin can increase the risk of suicide. Several studies have linked gabapentin with an increased risk for suicidal thinking.

Third, Gabapentin or other drugs that treat nerve pain do not target the cause of the pain but instead manage its symptoms. You might feel short-term relief, but your condition doesn't get better long-term.

James saw his father's pain increase as he took gabapentin. James' father experienced similar side effects.

The side effects of Gabapentin, as well as other drugs, include organ damage and high blood pressure.

James does not recommend gabapentin to treat nerve pain. James recommends Nerve Fuel, and the natural ingredients in the formula. has been shown to work without any side effects.

James worked with Ratu Nacola on Nerve Fuel

James is not a nutritionist, doctor or any other expert. He's a lab tech. He works with many doctors and other medical professionals.

James says that he teamed up to create Nerve Fuel with Ratu Nacola who was the former director of a lab at a pharmaceutical company before joining James.

Ratu was born in Fiji but now lives with his family in the United States.

Ratu informed James of a number of natural ingredients, many of which grow naturally in Fiji, that could eliminate nerve pain.

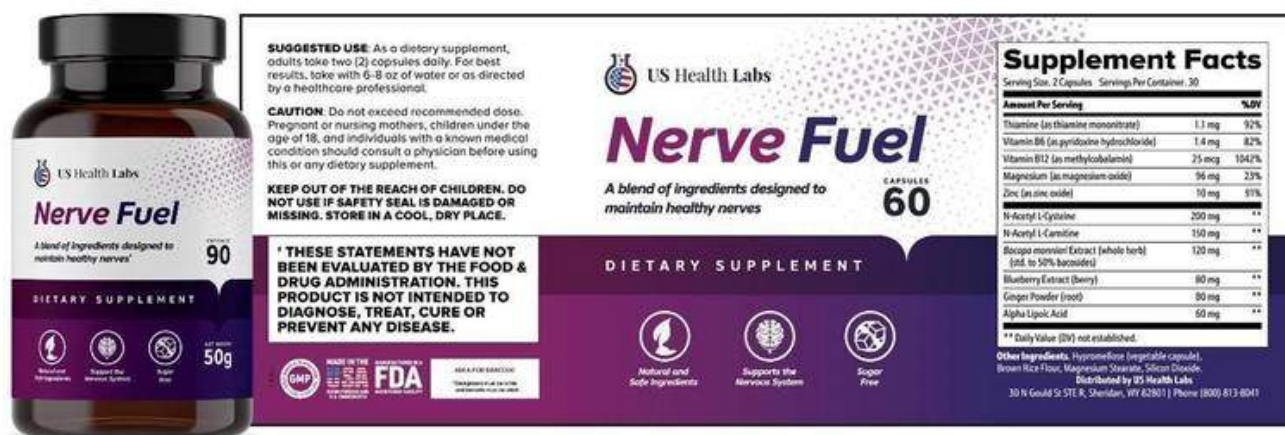

James has compiled the ingredients and created a formula. This formula is available as Nerve Fuel.

Nerve Fuel Ingredients

Nerve Fuel is a combination of plant extracts, vitamins and minerals that are linked to the relief of nerve pain.

You may be already taking some of the ingredients found in Nerve Fuel. US Health Labs says that they have combined these ingredients to enhance their effects.

The ingredients of Nerve Fuel, and their effects:

Alpha-Lipoic Acid: The natural antioxidant found within certain foods, such as taro leaves salads or the coconut milk that is popular in Fiji, is called Nerve Fuel. James, the creator of Nerve Fuel describes it as "a powerful antioxidant" which can reduce oxidative stresses by "upto 90%". It also minimizes nerve pain and supports healthy blood glucose, among other benefits. Alpha lipoic is one of today's most popular ingredients in diabetes supplements for all these reasons.

Acetyl L'Carnitine: James claims that Fijians, and other Pacific Islanders regularly take acetyl L'carnitine. L-carnitine, an amino acid, is found in some types of meats, fish, fruits, nuts and other foods. James cites a study that shows acetyl L'carnitine lowers oxidative stress by 200% more than placebo. Researchers found that acetyl L'carnitine significantly reduced nerve pain among 45 participants in another study. At the end of the research, 77% reported significant improvement in quality of life and reduction of nerve pain.

Ginger: ginger is used frequently in cooking in the Pacific Islands. James added ginger to the formula as it lowers oxidative stresses significantly. James cites a study where ginger reduced oxidative stresses by 70%. In another study, ginger was shown to help reduce nerve pain. People taking ginger experienced a 1,400% reduction in sciatic pain when compared with a placebo.

Vitamin B1: Vitamin B1 plays a vital role in nerve function. Deficient vitamin B1 can cause tingling or numbness of the extremities. Vitamin B1 deficiencies are also associated with low energy levels and other problems.

Vitamin B6: Vitamin B6 is involved in the production and function of enzymes that are linked to nerve function and

inflammation. Vitamin B6 also plays a role in energy production on a cellular level. Vitamin B6 can boost your energy levels.

Vitamin B12: According to James, Vitamin B12 reduces inflammation. It is essential for nerve function and cell energy.

Magnesium Oxide: According to James, magnesium oxide helps reduce nerve pain through blocking calcium channels, and by inhibiting the release pain-causing chemicals.

ZINC: zinc helps to reduce nerve pain through nerve repair. Zinc is needed by your body to repair nerves. Your body will not repair your nerves if you don't have enough zinc. This can lead to increased nerve pain.

Acryl L-Cysteine: Acryl L-cysteine helps your body to produce glutathione - the "master antioxidant" - which is active in all parts of the body.

Bacopa Monnieri: In Ayurvedic Medicine, bacopamonnieri is valued for its calming effects. According to James compounds found in bacopa can reduce inflammation. Bacopa is used in many supplements, from brain boosters to blood sugar support formulas.

Blueberry: Blueberry is rich in antioxidants that can help reduce inflammation and nerve pain, according to James. The blueberry is high in anthocyanins which gives it its distinctive color and also contributes to the antioxidant properties.

Nerve Fuel is a combination of 11 ingredients that have been proven to relieve nerve pain through multiple mechanisms. You can get lasting relief by taking three Nerve Fuel capsules daily.

Nerve fuel: Scientific evidence

Nerve Fuel's makers cite Harvard, UCLA, University of Edinburgh and other institutions as proof that it works. Below, we'll examine this research to find out how Nerve Fuel functions and what it does.

US Health Labs first claims that the Nerve Fuel formulation is based on a traditional remedy found in Tahiti and Fiji as well as other islands of the South Pacific. US Health Labs claims that these islands are known for their low rate of nerve pain. Fiji, in reality, is among the most diabetes countries in the entire world. Nearly 30% of Fijians have diabetes. The most common cause of nerve pain is diabetes. This condition is called diabetic Neuropathy. It's possible that some Fijians take Nerve Fuel as a way to manage their condition.

US Health Labs states that 19,437 Americans already use the supplement and have experienced powerful results. This would make Nerve Fuel the most popular and best-selling nerve pain relief supplement sold online. The company also claims that it has not received any reports of side effects. This suggests the formula is safe to use by anyone.

Nerve Fuel claims to also target a molecule named mir-21. Researchers use mir-21 to diagnose multiple diseases, from heart disease to cancer. The molecule is , one of the most plentiful and highly conserved miRNAs in the human body. Nerve Fuel claims that it can raise the levels of mir-21 in order to target the cause of nerve pain.

The concept behind Nerve Fuel is that inflammation and nerve pain are linked, and that lowering the inflammation can eliminate nerve pain. Many people who suffer from neuropathic symptoms also have high inflammation levels. Inflammation in the body can lead to an overactive immune system in , which leads to numbness and tingling.

Many diabetics use alpha lipoic to relieve nerve pain. As Mount Sinai research, published in the Journal of Pain Research, L-carnitine was shown to help relieve painful

peripheral neuropathy by supporting your body's nerve regeneration processes.

Nerve Fuel is a combination of 11 ingredients that have been scientifically proven to reduce nerve pain and support blood sugar levels. Take three capsules per day to promote healthy inflammation throughout the body and relieve nerve pain.

Nerve Fuel reviews: What do customers say?

Online, Nerve Fuel is receiving positive reviews from customers. They have reported a variety of effects they experienced from using the formula. Others have used it to improve their general health.

Check out some of the reviews that verified buyers have shared on the official site:

Nerve Fuel is a natural pain reliever that has been proven to work.

Nerve Fuel was able to provide rapid relief for another customer who had avoided doing all the things she enjoyed because of nerve pain.

Nerve Fuel was the only thing that worked for one customer who had suffered from nerve pains in his feet,

"for years." He claims that after taking Nerve Fuel he was able get the pain under his control.

One woman claims that buying Nerve Fuel was the "best thing she ever did." She says the supplement has allowed her to live a life free of discomfort.

After taking Nerve Fuel, one woman said "things changed faster than I anticipated" She can now do her job without feeling stress, thanks to Nerve Fuel.

One man claims that Nerve Fuel is "the answer to his prayers," as he was able to "move freely and without pain" after he had "throbbing pains in my calves, shooting pains in the feet."

James Sullivan used the formula created by Nerve Fuel to treat his father's nerve pain. James' father was in such severe pain that doctors were ready to amputate both of his feet. James' father was able leave the hospital with his two feet, thanks to the natural ingredients of Nerve Fuel.

Nerve Fuel Pricing

Nerve Fuel costs an average of \$199 per bottle. The manufacturer has reduced the price of Nerve Fuel to \$69 when you order online.

You can find out how much you'll pay for Nerve Fuel on the official website.

- 1 Bottle: \$69.00 + \$4.95 shipping
- 3 bottles: \$177 (59 \$ per bottle) + Free shipping
- 6 bottles: \$294 (49 cents per bottle) + Free shipping

Each bottle contains 30 capsules, which is 30 servings. Take three capsules per day to relieve nerve pain.

Nerve Fuel Refund Policy

US Health Labs offers a money-back guarantee of 90 days on all Nerve Fuel orders. You have 90-days to decide whether you want to keep the supplement or not before requesting any refund.

US Health Labs

US Health Labs manufactures Nerve Fuel in an FDA registered, GMP certified facility located within the United States.

US Health Labs teamed with James Sullivan, a laboratory technician and Ratu Ncola, the former director of this lab to create Nerve Fuel. Ratu, a Fijian, recommended a number of natural ingredients that would promote nerve pain relief. This led to the creation Nerve Fuel.

Contact US Health Labs customer service and the Nerve fuel team through the official website.

Final Word

Nerve Fuel, a formula to support blood sugar levels is available online at NervePainHelper.com.

Nerve Fuel is normally priced at \$199 for a bottle. However, a promotion in 2024 will reduce the price to \$69 or less. You can target inflammation by taking three Nerve Fuel capsules daily. The blend of Lcarnitine, Alpha Lipoic Acid, and other ingredients is available.
