## Who is the Face behind SlimSolve brand?

Dan, a former overweight person who was unable to lose weight, developed SlimSolve to help other overweight people get rid of their unwanted fat. He is neither a nutritionist nor a scientist but he managed to lose 87 pounds using the supplement in just a few short weeks.

According to Dan, SlimSolve is the only formulation that targets the root cause for jiggly body fat in the abdomen, thighs and hips. It also targets the underarms. Stanford researchers confirmed a phenomenon called Sympathetic Fat Response that causes our body to produce extra body fat.

In order to combat this problem, he found a root called "Devil's Backbone", which plays a key role in turning off the Sympathetic Fatty Response. He also added other powerful natural ingredients to the SlimSolve formula in order to boost sleep, metabolism and overall health.

Next, we'll discuss how Devil's Backbone can help you lose those extra pounds.

## How does SlimSolve work to promote rapid weight loss?

A recent Stanford study found that two-thirds are obese, not due to high blood sugar levels or an unhealthy

lifestyle, but rather because of Sympathetic fat response. It's something we cannot control.

Researchers have confirmed that this phenomenon is caused by the Sympathetic Fat Reaction, which begins in the brain. It's triggered daily anxiety, unchecked stresses, and poor sleep. It gets stronger every time we are tired, anxious or stressed.

Sympathetic Fat Reaction stops the metabolism, transforming the body into a fat-storing, fat-producing machine. So, our bodies are forced to accumulate unwanted fat layers.

SlimSolve works by containing Devil's Backbone, an ingredient derived from the deserts in Africa. This powerful ingredient has been proven in clinical studies to turn off the Sympathetic Fat Reaction, allowing our body to not produce or store unhealthy fat.

The makers of SlimSolve also claim that the dietary supplement will burn 34% more unwanted body fat in a matter of weeks.

## ***The SlimSolve Three-Step Process for Weight Loss***

SlimSolve has amazing powers to help people lose weight by following the three steps below:

- Step 1: This stops the Sympathetic Fat Response and stops fat storage.
- Step 2: It reduces fat absorption by the body and shrinks fat cells.
- Step 3: Lastly, it helps suppress appetite and build lean muscles mass.

## **What are the natural ingredients in SlimSolve?**

Take a look at the natural ingredients that SlimSolve contains:

### ***Devil's Backbone***

Devil's Backbone contains flavonoids as well, which are plant compounds with anti-inflammatory and antioxidant properties. Flavonoids reduce inflammation, which helps improve insulin sensitivity.

The saponins found in devil's backbone promote lipolysis, by preventing the absorption and excretion of dietary lipids.

The alkaloids found in devil's backbone promote thermogenesis, by increasing levels of neurotransmitters

such as dopamine and serotonin in the brain. This can increase metabolism and promote weight loss.

It can also help to promote weight loss by reducing inflammation and oxidative stresses.

## *Ashwagandha*

Ashwagandha, a small shrub, grows in India and the Middle East. It also grows in parts of Africa. It produces red fruits that are about the size and shape of a raisin.

Ashwagandha is a plant whose root is used as a medicine. It contains many active compounds including alkaloids and steroidal lactones.

It can boost metabolism by stimulating thyroid glands to produce more thyroid hormonal. These hormones regulate metabolism and a higher level can burn more calories.

Ashwagandha improves insulin sensitivity which is essential for stabilizing blood sugar levels. When blood sugar levels remain stable, the body will be less likely to store extra calories as fat.

## *Passionflower*

Passionflower is rich in flavonoids which help to reduce appetite. Flavonoids increase the production of leptin

which tells the brain when to stop eating. This can result in a reduced caloric intake, and eventually weight loss.

It is known to reduce anxiety and stress, which can cause overeating. Passionflower is made up of compounds that increase the production GABA neurotransmitter, which calms the body. This can result in a reduction of stress and weight loss.

### *Lemon Balm*

Lemon balm contains rosmarinic acids, which have been proven to be anti-obesity. Rosmarinic Acid works by blocking the enzymes responsible for fatty acid synthesis.

This leads to a reduction in fat accumulation in the body. Rosmarinic acid also increases the production of adiponectin. This hormone regulates glucose and fat acid metabolism.

## What Are The Health Advantages Of Consuming SlimSolve?

SlimSolve, a breakthrough natural science formulation, helps individuals lose tons of jiggly body fat in the abdomen, thighs and hips. Also, it helps to eliminate double chin. These are some of the health benefits of this dietary product:

### *Accelerates Fat Loss in the Body*

SlimSolve is a powerful blend of ingredients, such as Devil's Backbone. This ingredient has been proven to increase serotonin in the body from 53% to 116%. We

tend to be less stressed when our body produces a lot of happy hormones. Our anxiety levels also drop.

SlimSlove is a product that improves serotonin, making you less anxious and stressed. It also disarms the Sympathetic fat response. By reducing anxiety, the supplement is able to switch off the production of cortisol in the body. This, in turn helps to shut down the Sympathetic Fat Response.

Our body will be able to restore a healthy metabolism that burns fat and prevent excess fat from being stored.

### ***Can Reduce Absorption of Fast Food***

SlimSolve prevents our body from absorbing the food we eat. This dietary product can reduce the production of lipase in the body. Our pancreas produces less lipase, which reduces the breakdown of fat so that our body can absorb it.

The supplement ensures that fats are not digested by the body or absorbed. It may prevent individuals from accumulating unhealthy fat layers. Online SlimSolve testimonials claim that this is one of the fat-blocking supplements that works without any side effects.

## ***Healthy Cholesterol Support***

SlimSolve is formulated with 100% natural ingredients of the highest quality. It helps reduce triglyceride and cholesterol levels naturally. It does this by curbing our appetites and reducing the body's capacity to store fat, which leads to unhealthy cholesterol levels.

## ***You can control blood pressure and blood sugar***

SlimSolve's powerful ingredients work together to control your food cravings. They reduce stress and anxiety, allowing us to consume and burn the calories we need.

This prevents our body from storing extra calories as fat. It improves insulin sensitivity and helps maintain blood sugar levels, blood pressure, and proper blood pressure in the body.

## ***Reduce Anxiety and Stress with these Aids***

The SlimSolve formula contains natural plant and herbal extracts which can increase the level of serotonin in our body. We can reduce sleep issues, anxiety, stress, restlessness and exhaustion.

Many online SlimSolve testimonials mention that people feel lighter and happier after taking these capsules.

## *Can Curb Hunger And Build Healthy Lean Muscles*

Ashwagandha is another essential ingredient in SlimSolve. It is a natural adaptogen. This ingredient helps us adapt to mental, physical and emotional stress.

We are less likely to crave sugary foods when we have lower stress levels or anxiety. Due to its anti-anxiety, anti-stress properties, the SlimSolve formula suppresses our food cravings. This formula helps to reduce our appetite while building lean, strong muscles.

### *Promotes a good mood*

Ingredients in SlimSolve have anti-inflammatory properties and antioxidants that can relieve anxiety and stress. Serotonin levels in our bodies increase as a result. This directly affects mood regulation.

### **What is the science behind SlimSolve?**

A study was conducted to examine the effects of passionflower on adipogenesis - the process that leads to fat cell formation.

The researchers conducted the study on 3T3L1 preadipocytes which are cells with the potential to

become fat cell. Researchers observed the effects of passionflower extract on adipogenesis after treating the cells with different concentrations.

The study results showed that passionflower extracted significantly inhibited fat cell formation. Researchers found that passionflower reduced lipid accumulation in cells. The researchers also discovered that passionflower extracted reduced the expression genes involved in adipogenesis.

A second study involved a double-blind, randomized placebo-controlled trial. The 28 subjects were healthy volunteers aged 18-50 years with a BMI between 18.5 and 29.9 kilograms/m<sup>2</sup>. The subjects were randomly assigned either to receive a supplement containing lemon balm or a placebo over a 12-week period.

The supplement containing 500 mg of lemonbalm extract was standardised to contain 2.5% acid rosmarinic. The placebo capsule contained microcrystalline cellulose.

The study showed that supplementing with lemon balm extract significantly increased fat metabolism compared to placebo. The research also showed that the supplement of lemon balm extract significantly reduced serum triglyceride compared to placebo. Triglycerides, a type

blood fat that contributes to cardiovascular disease, are found in the body.

## **How to Consume SlimSolve pills?**

On the label, SlimSolve's creators recommend that you take two capsules with a glass water each day. The makers claim that people will feel more optimistic, motivated, and energetic the next day after taking it.

## **SlimSolve is a safe dietary supplement?**

SlimSolve is 100% safe, according to its manufacturers. It's made with ingredients that are grown in the soil. It is also free from GMOs, chemicals and gluten.

SlimSolve is free of side effects such as jitters and bloating, unlike chemical metabolism boosters or surgery. It also helps to rebalance the fat-producing hormone that is a result of lack of sleep and stress.

## **How much does SlimSolve cost?**

The price of SlimSolve is as follows.

- Trial package: One bottle costs \$59 for a month's supply plus shipping charges
- The Most Popular Package: Three bottles for \$147 (for three months' supply) plus shipping charges
