What is ProDentim

ProDentim's innovative approach redefines oral care, providing more than a sweet treat. It's a breakthrough in

science that restores the delicate balance of bacteria in your mouth. Each serving contains over 3.5 billion good bacteria. ProDentim promotes healthier gums and teeth by nurturing a harmonious microbiome. The gentle formula is a stark contrast to harsh products and emphasizes the importance of a balance of good bacteria. ProDentim is based on a deep understanding of the importance of the oral microbiome, a dynamic ecosystem that contains various microorganisms vital for oral health. This holistic approach recognizes the complex interplay between harmful and beneficial bacteria that is crucial to preventing dental problems like gum disease and cavities. ProDentim takes oral care beyond simple hygiene. It enables a healthier, brighter smile by combining probiotics with scientific innovation.

ProDentim Candy

ProDentim is, according to the creators, unlike anything else you've ever tried or experienced. ProDentim is believed to contain the only blend on the market that contains over 3.5 billion probiotic cultures. This will help to fill your mouth with healthy bacteria. The creators also added five other ingredients to promote dental health.

ProDentim, to be precise, is one of the most effective oral health supplements. ProDentim is a blend of probiotic

bacteria strains that can eliminate different types of gum disease within a short period of time.

The oral health supplement is not only rich in beneficial bacteria but also herbal ingredients that help prevent tooth decay and offer other health benefits. According to ProDentim's official website, this dietary supplement offers the best dental health right now.

All the ingredients and beneficial bacteria added to the ProDentim formula are proven to support better oral health and all these powerful components have been passed through scientifically-supervised clinical trials.

SUGGESTED USE: Take one soft tablet one or up to two times a day, or as recommended by your healthcare provider, ideally after brushing teeth or using mouthwash. Allow it to completely dissolve in mouth.

CAUTION: As with any dietary supplement, you should consult your healthcare provider before use, especially if pregnant, nursing, have a medical condition, taking medications, or have known adverse reactions or allergies.

KEEP OUT OF THE REACH OF CHILDREN. DO NOT USE IF SAFETY SEAL IS DAMAGED OR MISSING. STORE IN A COOL, DRY PLACE.

ProDentim Ingredients

Lactobacillus Reuteri

Lactobacillus Reuteri, an beneficial bacteria found in ProDentim helps with digestion and relieves symptoms such as constipation and bloating. It promotes a healthy mouth environment by fighting harmful bacteria, encouraging tooth mineralization and reducing inflammation caused by gum disease. It has been shown to be effective in maintaining dental health and contribute to a healthy oral microbiome.

Lactobacillus Paracasei

Lactobacillus Paracasei found in ProDentim supports gum health and reduces dental caries. It also inhibits the growth pathogenic bacteria within the mouth. Studies have shown that it is important for oral health because of its contribution to mineral absorption and tooth development.

Malic Acid

ProDentim contains malic acid, which inhibits the growth of harmful bacteria, increases mineral absorption and helps to remineralize teeth. research indicates that it is effective in inhibiting Streptococcus Mutans from degrading the enamel and promotes dental mineralization.

Inulin

Inulin fiber, which is found in ProDentim reduces plaque and tooth decay and improves the oral health. The ability

of ProDentim to increase dental tissue volume, elasticity and mineralization and to prevent gum disease, underlines its importance for oral care.

Tricalcium Phosphate

Tricalcium Phosphate is a powerful antibacterial agent that strengthens enamel and reduces the risk of cavities. Research shows that it has a positive impact on gum health and reduces plaque.

Peppermint

ProDentim contains peppermint, which reduces the acidity of your mouth, soothes inflammation in your gums, and fights plaque-causing bacteria. Traditional usage and studies support its oral health benefits including improved saliva flow and fresh breath. It is an essential component of overall oral hygiene.

ProDentim Chewable: Scientific evidence

ProDentim has been studied for years by doctors and scientists who are renowned. The ingredients of ProDentim have unique benefits, and when combined they make it a superior choice to other dental supplements. Investigate the scientific evidence that supports the ingredients in ProDentim.

B.lactis, a component of ProDentim, is highly regarded by scientists for its beneficial effects. The research concluded that B.lactis was an excellent ingredient to enhance the condition of teeth and gums. The bacterial strain also ensures that your oral hygiene is optimal.

According to, another popular study, Lactobacillus Paracasei can be a beneficial strain of bacteria for your teeth. This same study shows that this bacterial strain does not allow your dental health to degrade quickly. This bacterial strain is consumed regularly to keep your teeth strong and free of cavities.

BLIS M-18 is also scientifically recognized for its beneficial effects. The ingredient has unique properties that ensure better dental health. Some studies also suggest that this bacterial strain can boost cognitive abilities.

Being a perfect mixture of all these scientifically-proven elements, the ProDentim tabs become the best choices for all dental problems. Scientists have also confirmed that these natural substances do not contain toxins or harmful properties.

How does ProDentim work?

ProDentim doesn't simply represent another probiotic supplement. It's also a testimony to the ingenuity of humans in oral care. ProDentim, by harnessing nature's bounty and putting the spotlight onto the symbiotic relation between humans, their oral microbiome, redefines oral care. Each tablet contains a carefully blended blend of probiotics & prebiotics to create a healthy environment for beneficial bacteria.
