

NanoDefense Pro is an anti-fungus dietary supplement made with natural ingredients that offers protection against fungus and supports skin, nail, and hair health.

# NANODEFENSE PRO

**NanoDefense Pro is a blend of carefully selected ingredients that promotes healthy nails and skin.**

NanoDefense Pro promotes a healthy microbiome on the feet.

Your foot is covered with beneficial bacteria, which may seem gross. These bacteria protect your body from harmful pathogens, such as foot fungus and infections.

## [NANODEFENSE PRO SUPPLEMENT: OFFICIAL WEBSITE](#)

NanoDefense Pro is a daily application that purports to promote healthy and clean nails. It contains a mixture of nanoparticles.

**The Unique Nanotechnology Solution That Supports Healthy Nails And Skin**

When we apply regular creams and lotions to our skin, it's a bit like trying to tend a delicate garden with only a large rake; it mostly addresses the surface and often misses the intricate details that lie beneath.

Enter nanotechnology.

This is akin to being equipped with precision gardening tools that can meticulously tend to every flower, plant, and hidden nook of our garden.

By making the molecules super, super tiny – about 1000

In our review, you will learn everything about NanoDefense and its working.

## What is NanoDefense Pro?

NanoDefense Pro liquid formula is designed to fight against foot fungus.

The supplement is only available online at NanoDefensePro.com. It uses a natural blend to promote healthy and clean nails.

NanoDefense Pro is a drop-by-drop solution that contains “protective nanoparticles” to defend your microbiome on a cellular level. These particles promote a healthy foot microbiome by increasing the levels of beneficial bacteria around and on your feet.

NanoDefense Pro costs \$69 per bottle and includes a 60-day money back guarantee. You can get a full refund if NanoDefense Pro does not work for you or you are unhappy with its results.

## NanoDefense Pro Benefits

NanoDefense Pro is a blend of carefully selected ingredients that promotes healthy nails and skin. According to the manufacturer, you can experience the following benefits by using NanoDefense Pro every day:

A carefully dosed, hand-picked blend of ingredients

Support foot microbiome Promoting healthy and clean nails

Foot health: Protective nanoparticles, active ingredients and other active ingredients

Made in the United States at a GMP-certified, FDA-registered facility Money back guarantee of 60 days

## What is NanoDefense Pro?

NanoDefense Pro is a foot care product that works by supplying your body with nanoparticles. This helps to support healthy microbiome and promote foot health.

NanoDefense Pro is a product that you can apply to your feet every day. This will help your body fight foot fungus, as well as other pathogens.

NanoDefense Pro is marketed primarily to people who have foot fungus or similar problems. Doctors typically recommend antifungal medications that are available over-the counter or on prescription to treat foot fungus. NanoDefense Pro is a product that purports to have powerful effects using natural ingredients.

## What does NanoDefense Pro do?

NanoDefense Pro contains ingredients that work in different ways on the skin, nails, and feet.

Some ingredients promote healthy inflammation. Inflammation of the skin around toenails can make it difficult for your immune system to fight infections. High levels of inflammation can make anything appear as an infection to the immune system. This reduces your body's ability to remove toenail fungal infections on its own.

NanoDefense Pro also contains other ingredients that contribute to a healthy microbiome. Probiotic bacteria are found on your feet and nails. These bacteria help to support the natural defenses of your body. Over time, you may have too many bad and not enough good bacteria on your skin, which can cause havoc to your microbiome. NanoDefense Pro's active ingredients could be helpful.

NanoDefense Pro also contains ingredients that moisturize skin. Aloe vera can, for instance, lock in moisture. Bacteria are more likely to be infected by dry and cracked skin than moist, hydrated skin. NanoDefense Pro is a daily application that contains a combination of active ingredients designed to increase the moisture in your skin and boost its barrier function.

Help eliminate bacteria that can cause toenail and foot fungus. Makers of NanoDefense Pro appear to be marketing the formula to people who have foot fungus. You can promote natural elimination of harmful

pathogens, such as viruses and bacteria, by applying the liquid to the affected area on a daily basis.

NanoDefense Pro contains ingredients that work together to increase blood flow and oxygen to the skin. This helps to rejuvenate cells by flooding it with nutrients and oxygen. The ingredients in NanoDefense Pro boost your body's natural immunity, help detoxify, and cleanse harmful bacteria and viruses from your body.

NanoDefense Pro is the ultimate topical skin protection formula. It targets nail health issues and skin problems in different ways, using multiple ingredients.

## NanoDefense Pro Ingredients

**DIRECTIONS FOR USE:** Apply an appropriate amount to the affected areas and massage into the skin until absorbed.

**FOR EXTERNAL USE ONLY**—Keep away from excessive heat or flame.

**WARNING**—The safety of this product has not been determined.

**WHEN USING THIS PRODUCT:** Avoid contact with eyes or mucous membranes. Do not apply to wounds or damaged skin. Do not apply to irritated skin or if excessive irritation develops. Do not bandage. Do not use with heating pad or heating device.

**KEEP OUT OF REACH OF CHILDREN.** If accidentally ingested, contact a Poison Control Center immediately.

**INGREDIENTS:** Deionized Water, Aloe Barbadensis Leaf Juice, Glycerin, Cucumis Sativus (Cucumber) Fruit Extract, Chrysin, Palmitoyl Oligopeptide, N-Hydroxysuccinimide, Palmitoyl Tetrapeptide-7, Palmitoyl Pentapeptide-3, Steareth-20, Polysorbate-20, Carbomer, Phenoxyethanol and Caprylyl Glycol (Optiphen®), CELLg8® Turmeric Root Extract Powder 70%, CELLg8® Quercetin 70%, Luteolin (*Sophora japonica*) (bud), Colloidal Silver, Serratiopeptidase, BioFresh™ Clean Complex (S), Potassium Sorbate.

NanoDefense Pro is a blend of ingredients that promotes foot health.

NanoDefense Pro contains many ingredients that are in "nano form". NanoDefense Pro, for instance, contains nano-silver and nano-curcumin instead of silver and curcumin.

NanoDefense Pro contains the following active ingredients and their functions:

**Nanosilver:** NanoDefense Pro is a colloidal silver product, labeled "nanosilver", on the official site. In the late 1800s, and early 1900s, colloidal silver was used to protect the body from disease and illness. Silver has antibacterial properties that we can see today. Silver kills bacteria when applied topically.

**Nanocurcumin:** NanoDefense Pro contains a form of curcumin known as nano curcumin. The active ingredient in Turmeric is Curcumin. Studies have shown that it has anti-inflammatory and antioxidant properties. The nano-version of curcumin has the same benefits, but is easier to absorb by your body. The body has a notoriously hard time absorbing curcumin. NanoDefense Pro's makers have found that by condensing active ingredients into nano-sized particles, they can increase absorption and make it easier for you to feel the active effects.

**Nano-Quercetin:** NanoDefense Pro is a nano version quercetin. This popular antioxidant and anti-aging molecule. quercetin is a molecule found in certain plants. It has gained popularity in the past decade, and can be found in anti-aging supplements and other products. As with curcumin it can be hard for the body to absorb quercetin when taken alone. NanoDefense Pro nano quercetin is quercetin in a very small molecule to maximize bioavailability and absorption.

**Luteolin:** Luteolin, a flavonoid naturally found in plants. Luteolin is a natural flavonoid found in certain plants. Many people take luteolin every day to boost cardiovascular health and promote blood flow. studies even link luteolin with the prevention of cancer. NanoDefense Pro could be effective against foot fungus, and for overall skin health.

**Deoxyribonuclease:** Deoxyribonuclease, a type enzyme associated with DNA degradation. NanoDefense Pro does not include it on its label. It is however listed on the official NanoDefense website. Deoxyribonuclease can disrupt the foot fungus bacteria by reducing their ability for replication.

**Cape Aloe:** Aloe leaf extract is used to soothe skin for centuries. It is known to be able to moisturize the skin

and cool it. Aloe appears as the second ingredient listed in NanoDefense Pro, after deionized waters. This means that there is more aloe than any other active ingredients. Aloe is a powerful ingredient in NanoDefense Pro that can have powerful soothing and calming effects on the skin.

**Chrysin:** The natural antioxidant Chrysin can be found in herbs and plants, including passionflower. Curcumin and chrysin are both known for their antioxidant properties. Many people use chrysin for anti-aging and inflammation as well as joint health. NanoDefense Pro uses the same antioxidants to support healthy inflammation levels around your feet and toenails. Your immune system is unable to function properly if the skin of your feet has high inflammation levels. Chrysin supports healthy inflammation by applying topically.

**Peptides** Many of the ingredients found in NanoDefense Pro can be considered peptides. The body groups amino acids and proteins by clumping peptides. NanoDefense Pro contains peptides that are similar to those found in other skin care formulas. They give your skin active ingredients to help repair skin cells, and promote healthier skin. NanoDefense Pro contains peptides such as tetrapeptide-7 and palmitoyl-pentapeptide-3.

**Cucumber extract:** The cucumber extract is the fourth ingredient listed in NanoDefense Pro. Cucumber is used by many cultures for centuries to hydrate, moisturize, and detoxify. Many spas have cucumber slices nearby. In NanoDefense Pro cucumber helps your skin to refresh itself by promoting detoxification and cleaning itself.

**Deionized water:** All the ingredients are suspended in NanoDefense's liquid formulation, which is primarily made up of water (the ingredient listed first) and glycerin (3rd listed ingredient). The glycerin and water hold the ingredients in place and make them stable. This allows you to experience the active effects of NanoDefense Pro. Deionized Water also has its own active effects: It helps to hydrate your skin. Your foot fungus and infection risk increases when your skin is cracked and dry. Bacteria can easily enter cracked, dry skin. NanoDefense Pro contains deionized water, as well as other ingredients that hydrate the skin. This can help you to fight bacteria and foot fungus.

**[NANODEFENSE PRO SUPPLEMENT: OFFICIAL WEBSITE](#)**

How to use NanoDefense Pro

NanoDefense Pro is recommended by the manufacturer for application directly on the affected area.

## How to use NanoDefense Pro?

- Apply a small amount of liquid formula to the affected area (approximately 0.5mL).
- Massage the cream into your skin until it is absorbed  
Repeat as necessary Formula is designed primarily to treat foot fungus.
- It can help with itching, dryness and other skin conditions on the feet and around them.

### *NanoDefense: Scientific Evidence*

NanoDefense Pro's official website lists 14 studies that validate the ingredients and their effectiveness. These studies include double blind, placebo controlled clinical trials that were published in peer reviewed medical journals. Below, we'll examine these studies to see how NanoDefense works according to scientific evidence.

Aloe Vera Juice is a proven nutrient in NanoDefense Pro that helps to protect and hydrate the skin. Aloe vera has been linked to moisturizing benefits in multiple studies. In a 2017 report for instance, aloe vera was found to have natural antifungal qualities and destroy bacteria on contact. You can fight skin conditions by applying aloe directly to your affected feet.

Cucumber Extract has similar evidence. Some studies have even specifically linked cucumber extract with skin and nail care. In one study, cucumber extract was found to protect and strengthen your nails, soothe dry cuticles and increase the overall hydration of your nails. Researchers tested the hydration of nails soaked in cucumber or placebo.

Chrysin is a powerful skin care ingredient that has been shown to help with skin inflammation, skin psoriasis and other skin conditions. In a 2020 study for instance, chrysin was found to reduce psoriasis like skin inflammation and also reduced the release of antimicrobials peptides. This helped promote skin health on multiple levels. Another study also found similar results. Chrysin was shown to help treat skin conditions, including acne and dark circles. NanoDefense Pro can be applied to your nails and feet every day.

NanoDefense Pro is a combination of natural ingredients that promotes skin health and antibacterial properties. NanoDefense Pro can help you achieve a variety of active effects for your skin, nails and feet.

### *NanoDefense Pro Supplement Facts Label*

NanoDefense Pro is a product that contains all the ingredients listed on the label.

## *NanoDefense Pro 0.5mL Drops: What you get*

Deionized water, aloe vera leaf extract, glycerin, cucumber fruit extract, chrysin, palmitoyl oligopeptide, N-hydroxysuccinimide, palmitoyl tetrapeptide-7, palmitoyl pentapeptide-3, steareth-20, polysorbate 20, carbomer, phenoxyethanol and caprylyl glycol (Optiphen), CELLg8 turmeric root extract powder, CELLg8 quercetin, luteolin bud extract, colloidal silver, serratiopeptidase, BioFresh Clean Complex, and potassium sorbate

## NanoDefense Pro Pricing

NanoDefense Pro is normally \$99 per bottle, and can only be ordered online at [NanoDefensePro.com](https://NanoDefensePro.com). As part of the 2024 promotion, NanoDefense Pro has reduced the price per bottle to \$69 or less.

You can order NanoDefense Pro today and get a great price!

- 1 Bottle: \$69. + Free Shipping
- 3 bottles: \$177 (59 cents per bottle) + free shipping + 2 bonus eBooks
- 6 bottles: \$294 (49 cents per bottle) + free shipping + 2 Bonus eBooks

Each bottle contains a 30-day supply, which is 15mL or 30 full dropper-worth of liquid formula. NanoDefense Pro is applied to the feet with a full dropper (0.5mL).

## NanoDefense Pro Bonuses

You will receive two bonus eBooks for free if you purchase 3 or 6 NanoDefense Pro bottles. These two eBooks contain tips, tricks and strategies that complement the effects of NanoDefense Pro.
