

Omyum SuperNatural™ is a supernatural coffee alternative made with natural ingredients that helps reduce stubborn fat and live healthier lives.

SuperNatural™

The world's **FIRST** and **ONLY** solution designed to fix your “Broken Fat” – and **make it melt off your arms, belly, thighs and neck...**

OMYUM SuperNatural™ contains the two essential ingredients needed to repair and supercharge your “Broken Fat”...

Fixing the essential supply of oxygen AND heat...

Needed to first start incinerating your Broken Fat.

The end result? Your body effortlessly loses weight...

Helping you to feel as sexy and slim as someone half your age...

While becoming the confident woman you were always supposed to be...

Weight loss can be a difficult topic. Everyone is different, so they need a routine that works for them. Weight loss plateaus can occur when you finally decide to exercise and eat right. This is a major setback for what was supposed to be an easy journey. It can be exhausting to target areas that have extra fat and don't want to go away. It is well-known that you cannot target specific parts of the body when you exercise. When you lose weight, all areas will lose excess fat. The hour spent on the treadmill will not necessarily reduce the fat in your thighs.

OMYUM SUPERNATURAL SUPPLEMENT:
OFFICIAL WEBSITE

How can you get rid of muffin-tops and jigglings arms? This is the million dollar question that people around the world are eager to answer! What if you were told there was a way for you to burn fat without having to constantly go to the gym or watch your diet? It would be incredible to find a product which targets fats in the body by simply drinking it. One team says that giving OMYUM's SuperNatural™ a go is a great place to start.

What is OMYUM SuperNatural™?

OMYUM® SuperNatural is a coffee substitute that's marketed as the "first and most likely only" solution to fix "broken-fat" in the body. It helps melt away arms, stomach, thighs and neck. It is believed that the formula reduces fat storage and limits fat production by two means: it ensures vital oxygen and stimulates heat production. This coffee alternative may also improve mood, focus, and energy.

It is amazing to see that these results occur without the usual jitters, crashes or stomach-wrenching effects associated with caffeine consumption. We are now faced with a critical question: Can caffeine really be replaced? Only by closely examining the OMYUM SuperNatural™ function and ingredients can we be sure.

OMYUM SUPERNATURAL SUPPLEMENT: OFFICIAL WEBSITE

Why is oxygen important for fat loss?

Omyum's creator researched oxygen levels in the body and fat burn and found a source that explains this connection concisely, beginning with muscle function. Our forces can only use ATP stored in the muscles. During an exercise, the storage space will be depleted. Once the storage is depleted, muscle cells will combine two nutrients called ADP & creatine phosphate in order to replenish it.

The body will use blood sugar to replenish ATP levels if ATP storage is depleted a second or third time. This blood sugar is converted by the muscles into lactic and pyruvate. The oxygen and glycogen are combined to make ATP again. At some point glycogen levels will drop, and the body will look for an alternative. Fat storage. Each time that happens, oxygen, sugars and fat cells work together to create ATP.

Without oxygen, our body is unable to produce the energy needed to fuel our muscles.

What is in each OMYUM SuperNatural™ serving?

The OMYUM SuperNatural™ formula is broken down into its different components. Below is a detailed overview of all the different ingredient categories.

Oxygen-Elevating Ingredients

Curcumin Black Pepper Ashwagandha and L-Theanine are among the ingredients that raise oxygen levels in this coffee substitute.

Curcumin comes from the Indian spice turmeric. This anti-inflammatory compound has been studied to treat inflammation-related diseases such as metabolic syndrome, Alzheimer's disease, cancer and many other degenerative disorders. This compound is crucial for maintaining oxygen levels. This ingredient's antioxidant content is also linked to the neutralization of free radicals and elevated levels of brain-derived neurotrophic factors (BDNF) for memory and learning. It can also ease depressive symptoms.

Curcumin is not bioavailable, meaning that it can only be absorbed in small amounts by the body. black powder can be added to reduce waste. Black pepper has been shown to increase curcumin uptake by 2000%. Ashwagandha is an adaptogenic plant. Ashwagandha has been described

as an immunestimulant herb medicine that helps to prevent diseases and better respond to stress. This component in OMYUM SuperNatural™ may help to generate nitric oxygen.

Increased nitric-oxide levels allow oxygen, nutrients and fatty acids to be transported into the mitochondria, where energy is created. As these levels tend to decrease with age, ashwagandha is a necessity. L-theanine is the last ingredient in this group. It's a non-essential amino acid. L'theanine is known to reduce anxiety and stress. It also boosts mental clarity. L-theanine may help to manage weight by suppressing hunger and reducing inflammation. However, more research is required.

Mushrooms are useful for a variety of purposes.

Next, the ingredients are said to support brain and metabolic functions. We are specifically referring to Lion's Mane Reishi Chaga and Cordyceps. These mushrooms all have functional properties. Functional mushrooms contain essential plant compounds that have therapeutic properties, as well as protein, fiber and vitamins. What role do they play in OMYUM SuperNatural™?

One source claims that lion's mane has the best effect on cognitive function, while Chaga improves immunological

function. Reishi is the most researched of the four types. It has been shown to boost the immune system and increase the production of blood cells that heal wounds.

Cordyceps Supplements have shown to improve cardiovascular health, immunity, exercise performance and lower blood glucose in type 2 diabetics.

Maca

Maca, also known as "Peruvian Ginseng", is a cruciferous plant related to broccoli and kale. It's also closely related to cabbage, cauliflower, and bok choy. The maca plant is rich in fiber, vitamins and minerals as well as antioxidants. Maca may also improve mood, energy, cognitive function, reduce inflammation, and aid digestion. More studies are needed to generalize the findings across all groups.

Ceylon Cinnamon

Ceylon cinnamon is also called Cinnamon Zeylanicum. Its shape, color and flavor are distinctive. Studies have shown it to be beneficial in treating diabetes symptoms. It does this by increasing insulin-like activity, decreasing resistance to insulin, and increasing glucose metabolic rate. This type also has anti-inflammatory and antioxidant

properties that help to manage blood pressure and improve how the brain reacts to insulin.

Raw Cacao

Raw cacao has therapeutic properties and is the last ingredient in coffee. Cacao comes from the Theobroma cocoa evergreen tree of the Malvaceae. Cacao in its natural state can help maintain blood pressure, improve metabolic health by increasing the efficiency of food conversion to energy, increase insulin secretion and inhibit oxidative stress.

CALM ENERGY, BLISS + FOCUS

Theobromine, found in cacao, offers unique benefits that make it a superior alternative to caffeine.

BENEFITS:

- Gentle, Long-lasting Energy
- Increases Brain Bloodflow
- Blissful Mood
- Enhances Focus
- Heart Friendly
- Gut Healthy

OMYUM SuperNatural™: Purchase

- Buy three bags of OMYUM SuperNatural™ for only \$39.99 each bag
- Buy six bags of OMYUM® SuperNatural™ for only \$29.99 each

FAQs (Frequently Asked Questions)

Q. Is OMYUM SuperNatural™ a safe alternative to coffee?

OMYUM SuperNatural™ has been deemed a safe alternative to coffee because it increases energy and regulates mood without the negative effects of caffeine. People who drink coffee regularly, especially excessively, report feeling agitated and losing sleep. They also experience bowel disturbances, muscle loss, and dependence. These effects are not common with OMYUM SuperNatural (tm).

Q. How should OMYUM superNatural™, be taken?

The creators suggest drinking a cup of OMYUM SuperNatural™ each day. This drink must be part of your daily regimen to achieve the best results.

Q. Does OMYUM SuperNatural™ contain caffeine?

Each OMYUM SuperNatural™ serving has 6 mg of caffeine. OMYUM's SuperNatural™ contains only 6 mg of caffeine, compared to the 400 mg in an average cup of coffee.

Do the mushrooms in OMYUM SuperNatural™ contain oats, fillers or both?

A: All the mushrooms in OMYUM SuperNatural™ are organic. The mushrooms are grown on wood, and harvested by hand when they are fully mature. The creators said they would never add oats, fillers or any other ingredients.

Q. What is the taste of OMYUM SuperNatural™?

A: OMYUM SuperNatural™ should taste like melted dark chocolate with a twist of cherry fruit and cinnamon. For a sweeter flavor, maple syrup or sugar can be added. If you prefer a creamier taste, add milk or your favorite

creamer. OMYUM's SuperNatural™ has been designed with versatility in the mind.

Q. Can OMYUM SuperNatural™ be used for other recipes?

Yes, there are many unique recipes that can be found on the website. These include coffee alternatives, smoothies and baked goods.

Q. How many servings of OMYUM SuperNatural™ are there in each bag?

A : Each bag yields 30 cups

Q. How long can a bag of OMYUM® SuperNatural™, last?

A. Each bag of OMYUM SuperNatural™ should last for one month.

Q. Is OMYUM superNatural™, vegan-friendly or not?

A: OMYUM SuperNatural™ has been proclaimed to be 100% plant-based. This makes it a vegan product.

Q. How long does it take to receive OMYUM SuperNatural™ shipments?

A: It can take up to 7 business days for an order to arrive.

Q. Does a money back guarantee protect my purchase.

A: The creators offer a 180 day money back guarantee. They want to ensure that their customers get the best possible results. You can ask for a refund if **OMYUM SuperNatural™** does not produce the results you want. The request must, of course, be made in the time frame allotted. Contacting customer service is easy.

Final Remarks

OMYUM SuperNatural™ is a natural coffee substitute that uses superfoods and plant-based herbs to burn fat and maintain healthy brain and cognitive functions. The richness of coffee and the energy it provides can be stimulating at first, but as the hours pass, the effects of caffeine diminish.

OMYUM SuperNatural™ is different in that it provides the benefits previously listed, and also offers additional benefits that coffee does not. Each serving has not only 6mg caffeine (a small amount), but also antioxidant, anti-inflammatory and nootropic properties. The creators claim that those who love the taste of coffee will enjoy

the rich, raw cacao powder combined with functional mushrooms and a touch of cinnamon.

While OMYUM SuperNatural™ may work wonders, it is not enough to achieve a complete transformation of the body and mind. Feeling good depends on what you feed your body, and how much exercise you do each day will determine whether or not you feel strong and energetic. Our editorial is of the opinion that OMYUM SuperNatural™ and nutrition combined with exercise can improve weight loss, mental clarity and fat burning.
