What exactly is Vive Biotics?

Perfect Origins produces the probiotic supplement Vive Biotics.

Vive Biotics, which contains 15 types of probiotic bacteria, is claimed to promote several aspects of gut health, including improved digestion, immunity, and weight reduction.

The health of your gut is vital to your overall wellbeing. Unfortunately, many individuals have unbalanced intestinal microbiota. Dietary and lifestyle variables may impede the function of probiotics in the gut, leading to immunological difficulties, poor energy, weight gain, and other complications.

Therefore, many individuals take probiotic supplements. A quality probiotic supplement provides your gut with the necessary live microorganisms to flourish. Vive Biotics aspires to be an all-inclusive gut health supplement with 15 strains of probiotics for everyone interested in boosting gut health.

Charles Livingston, DC, CCWP, is the inventor of Vive Biotics. To restore your stomach, Dr. Livingston suggests taking three bottles of Vive Biotics.

Who Can Use Vive Biotics?

Vive Biotics is marketed by Perfect Origins to anybody suffering the following symptoms:

Bloating's Gas

Abdominal discomfort

Fatigue's Constipation

Heartburn

According to Perfect Origins, Vive Biotics may treat all of these conditions by supplying your body with the necessary probiotics. Among other advantages, these probiotics may block the development of dangerous bacteria, aid in the breakdown of toxic chemicals, and halt bloating.

How does Vive Biotics function?

Vive Biotics comes as a liquid tincture. This liquid medicine has a 24-month shelf life. Each dose of the tincture includes billions of colony-forming units (CFUs) of probiotic bacteria to maintain your gut microbiota and gut health.

Up to 95% of the beneficial bacteria in Vive Biotics survive the trek to the intestines due to the supplement's specialized delivery method. With other probiotics, live

bacteria may be destroyed by stomach acid before reaching the intestines, reducing the supplement's efficacy. This is not a problem with Vive Biotics; the liquid administration technique assures optimal absorption and efficiency.

Vive Biotics Features and Advantages

Dr. Charles Livingston and the Perfect Origins team claim that Vive Biotics may give the following features:

Inhibits the Growth of Nasty Bacteria: When you have an imbalance of gut bacteria, bad bacteria are able to grow in your stomach. Probiotics are beneficial organisms. They combat harmful microorganisms and eliminate poisons from the body. Without a proper mix of probiotics in the gut, the good and harmful bacteria struggle to coexist. Vive Biotics assists by reducing the development of harmful microorganisms.

Vive Biotics is reportedly able to help healthy fat reduction. As evidence, Perfect Origins mentions a 12-week trial in which participants received probiotic pills or a placebo. People in the probiotic group dropped 5% of their abdominal fat, whereas those in the control group lost none. If you are struggling to lose weight while eating well and exercising, Vive Biotics may assist you.

Vive Biotics does not just promise to stop the development of harmful germs; the product also claims that it will boost your body's defenses against invading toxins. The natural fermentation process allows probiotic microorganisms to circumvent stomach acid and enter the intestines without incident.

Helps Repair Intestinal Damage Caused by Gluten If gluten has harmed your intestines, Vive Biotics may be able to assist you. Probiotics in Vive Biotics aid in the healing of intestinal damage caused by gluten and other causes. Gluten may induce leaky gut syndrome in certain individuals. Gluten causes intestinal pain in some individuals. If gluten has harmed your gastrointestinal tract, Vive Biotics may be able to help heal the damage while protecting the gut lining.

Aids in the Degradation and Elimination of Harmful Toxins: 70% of the immune system resides in the stomach. If your gut lacks the proper proportion of probiotics, you will struggle to break down and eliminate dangerous pollutants. Vive Biotics includes probiotics that aid in the separation of beneficial and harmful substances from the meals you consume.

Helps Prevent Bloating: Bloating may be an indication that your body is not breaking down food properly. Vive Biotics decreases bloating by administering 15 probiotic strains to the intestines. Foods are broken down by probiotic strains, preventing them from blocking the digestive system and causing painful gas and bloating. Frequent bloating is not normal, particularly if you consume a balanced diet. If you are often bloated, it may be an indication of a probiotic imbalance in your stomach.

Vive Biotics promotes healthier digestion by supplying your stomach with the probiotics it requires. Probiotics are live microorganisms that are essential for breaking down the meals you consume, extracting nutrients from those foods, and removing hazardous substances from those foods. Additionally, they support intestinal regularity. If you have battled with bloating, digestion, constipation, diarrhea, and other digestive disorders, a probiotic supplement such as Vive Biotics may be of assistance.

Improve Nutrient Absorption: If your stomach is out of equilibrium, it struggles to break down and absorb the nutrients you consume. Even if you consume a healthy, nutrient-rich diet, it is irrelevant if your gut is not functioning properly. Vive Biotics promises to greatly

improve digestion, hence assisting in the elimination of vitamin shortages.

Vive Biotics is intended to sustain the ideal gut bacteria ratio of 85% good bacteria and 15% bad bacteria, allowing your immune system to operate at peak performance. 70% of your immune system is located in your gut, and an imbalance of gut bacteria may cause immune system problems.

Other probiotic supplements comprise between one and five probiotic strains. This supplement contains fifteen distinct bacterial strains. However, Vive Biotics comprises fifteen types of probiotic bacteria. Each strain promotes digestive health in a unique manner. Instead of employing the same handful of strains as other probiotic supplements, Vive Biotics incorporates 15 strains not seen in competitor products, which may give you and your stomach with additional advantages.

How to Take Vive Biotics Perfect Origins suggests taking Vive Biotics as follows:

Twice day, take 4 drops of Vive Biotics.

Under 100 lb children take 2 drops twice a day.

Children weighing above 100 pounds should take 4 drops twice day.

Vive Biotics Components

Vive Biotics has 15 probiotic microorganisms blended with filtered water and grape flavoring.

The whole list of active substances consists of:

15 Strain Probiotic Blend: Vive Biotics comprises 15 strains of probiotic bacteria that are intended to provide various targeted benefits throughout the body. The mix contains well-known and popular strains such as *Lactobacillus plantarum*, *Lactobacillus rhamnosus*, and *Bifidobacterium bifidum*. *Pediococcus acidilactici*, *Streptococcus thermophilus*, and *Lactobacillus sakei*, to name a few, are also present. Each strain has unique benefits on the digestive system, promoting digestion, health, immunity, and the intestinal lining in diverse ways.

Humarian Unique Combination: Vive Biotics comprises the Humarian proprietary blend of minerals. This formulation contains B vitamins, essential minerals, benzoic acid, and tartaric acid, among other active components. To operate, your body need critical minerals. Without magnesium, for instance, the health of your

neurological system suffers. Without potassium and sodium, electrolytes are lost. The exclusive combination of Vive Biotics Humarian contains, among other active substances, benzoic acid, tartaric acid, nicotinamide, pyridoxine, thiamine, calcium, cobalt, iron, manganese, selenium, magnesium, potassium, molybdenum, and sodium.

As a component of the Humarian unique mix, benzoic acid is used to lower the risk of illnesses caused by bacteria. The presence of harmful bacteria in the stomach might result in severe infection problems. Vive Biotics includes benzoic acid to combat this impact, which may

be advantageous if hazardous bacteria are already flourishing in your gut.

Vive Biotics incorporates tartaric acid as part of their unique Humarian mix. In addition to having anti-inflammatory properties, tartaric acid supports the digestive system and intestines.

How Vive Biotics Probiotic Strains Operate

Vive Biotics includes 15 strains of probiotics. Each strain promotes digestive health in a unique manner. These are the probiotic strains:

According to Perfect Origins, the *Lactobacillus plantarum* in Vive Biotics inhibits the development and penetration of alien bacteria, defends against invading viruses and fungus, and shields the nervous system from mold and toxins, among other advantages.

Lactobacillus Rhamnosus: Another popular probiotic strain, *Lactobacillus rhamnosus* allegedly resists strains on your stomach acid and bile while clinging to your intestinal wall, allowing it to combat with harmful bacteria. Among other advantages, *Lactobacillus rhamnosus* downregulates inflammatory responses, boosts

immunity, and lowers symptoms of irritable bowel syndrome.

Vive Biotics includes *Bifidobacterium bifidum*, which is beneficial for inflammation, allergies, digestion, and colon health, among other things.

Vive Biotics includes *Bifidobacterium infantis* to alleviate irritable bowel syndrome, protect against infections such as salmonella, and assist with gastroenteritis, among other benefits.

Bifidobacterium Longum: The *Bifidobacterium longum* in Vive Biotics promotes gut health, reduces inflammation, boosts the immune system, and is resistant to stomach acid and bile, allowing more of the active components to reach their intended destination.

Lactobacillus Acidophilus: Harmful mold and yeast growth may raise your body's toxic burden. Vive Biotics claims to include *Lactobacillus acidophilus*, which may aid with diarrhea and other digestive disorders.

Lactobacillus Casei: Vive Biotics includes *Lactobacillus casei*, which aids in the management of chronic

constipation, reduces lactose intolerance, and promotes a healthy immune system, among other advantages.

Lactobacillus Helveticus: Vive Biotics includes lactobacillus helveticus to resist the breakdown of stomach acid and bile, cling to intestinal walls, improve the immune system, avoid diarrhea, and lessen allergy effect, among other advantages.

Lactobacillus Salivarius: Unlike other strains, the Lactobacillus salivarius in Vive Biotics keeps your teeth and gums healthy by preventing the formation of plaque-forming bacteria in your mouth. Additionally, it may minimize the incidence and severity of ulcers.

Pediococcus Acidilactici: According to Perfect Origins, this strain may balance gut bacteria to improve general health, lower the quantity of harmful bacteria and parasites in the body, and aid multiple sclerosis sufferers.

Streptococcus Thermophilus: The Streptococcus thermophilus in Vive Biotics may strengthen the immune system, compete with harmful bacteria in the body, and lower the incidence of colic in infants and children. Several studies demonstrate that it may also aid in the

treatment of lactose intolerance, functioning similarly to lactase by aiding in the digestion of dairy proteins.

Bifidobacterium Lactis: The *Bifidobacterium lactis* in Vive Biotics has been used historically to treat diarrhea in both children and adults. Additionally, there is evidence that the popular probiotic strain may assist with cold and flu symptoms, lactose intolerance, hepatitis, and Lyme disease.

Lactobacillus brevis is a probiotic strain that may reduce or halt the effects of harmful bacteria, making it more difficult to get unwell. When taking antibiotics, some doctors suggest taking *Lactobacillus brevis* to preserve gut health.

Lactobacillus Reuteri: *Lactobacillus reuteri* is not as well-known as the probiotic strains listed above, but it has been found to stimulate the development of beneficial gut bacteria while limiting the growth of harmful bacteria.

In addition to its other advantages, *Lactobacillus sakei* supports healthy sinus cavities and avoids sinusitis. Similar to *L. reuteri*, it is not as well-known as other Vive Biotics strains, but it may have unique benefits on your body and sinuses.

Perfect Biotics supports its claims with hundreds of research on each probiotic strain.

Vive Biotics Components Label Perfect Origins reveals the whole list of ingredients and doses, making it simple to compare Vive Biotics to other popular probiotic supplements.

Each dose of the liquid tincture contains the following substances:

Humarian's unique combination of filtered water containing fermented probiotics, benzoic acid, tartaric acid, nicotinamide, pyridoxine, thiamine, calcium, cobalt, iron, magnesium, manganese, selenium, molybdenum, potassium, and sodium.

Mix of 15 strains of probiotics, including *Lactobacillus plantarum*, *Lactobacillus rhamnosus*, *Bifidobacterium lactis*, *Lactobacillus brevis*, *Lactobacillus reuteri*, *Lactobacillus sakei*, *Bifidobacterium bifidum*, *Bifidobacterium infantis*, *Bifidobacterium longum*, *Lactobacillus acidophilus*, Lac

Vive Biotics has a natural grape taste and is free of dairy, wheat, soy, and gluten.

Each Vive Biotics bottle includes 0.5 ounces of formula. However, Perfect Origins does not mention the volume of liquid per serving, making it impossible to estimate the duration of each bottle.

Each bottle of Perfect Origins is advertised as a one-month supply. If you follow the suggested dosage of 4 drops twice day, each bottle of Vive Biotics would contain 240 drops of liquid substance.

We are also unaware of the overall number of colony-forming units (CFUs) included in each bottle. CFUs are the fundamental unit of measure for probiotic dose, and they assist differentiate highly potent probiotic supplements from those that are less potent.

Vital Biotechnology Pricing

Vive Biotics costs \$57 each bottle, however the price reduces to \$46 to \$50 per bottle when many units are purchased.

Here is how pricing breaks down for online orders placed at GutHealthHazard.com today:
