You wake up frequently during the night for the bathroom. Sleeping through the night because of an urge to pee is not good for your health. It can also reduce your quality of sleep.

You have a condition called "benign prostatic hyperplasia" (BPH). After the age of 25, most men will experience a slower growth in their prostate. A small number of men do not experience the growth of prostate tissue slowing down, which can lead to BPH.

**PROSTAPURA ADVANTAGE SUPPLEMENT:**  
**OFFICIAL WEBSITE**

In men in their 60s, hormonal imbalances can also cause prostate tissue to grow. This can lead to discomfort when sitting for long periods of time, an embarrassing need to pee, or incontinence where you dribble even after peeing.

BPH can be devastating to your mental health. Adult diapers could be worn to control the problem. You could also ask your doctor to prescribe Proscar, Finasteride or other drugs that will reduce the size your prostate.

***What if you could solve the problem with a natural supplement?***

**ProstaPure advantage - the solution to incontinence & BPH**

There's now a way to treat BPH-induced urinary incontinence and enlarged prostate. ProstaPure advantage is an innovative prostate health supplement that has been formulated to protect the gland and ensure it functions properly.

ProstaPure is the culmination of years of research on what causes BPH in men and prostate problems. In January 2024, a groundbreaking study on the health of men's prostates was published by German scientists.

It is surprising that the key to improved prostate health and function is not better nutrition and regular exercise.

This is what many doctors recommend to men with prostate problems, such as BPH. It's still the wrong way to approach the problem. It's not your responsibility if you follow this conventional medical advice but still don't see any improvement in your prostate function or health.

This study, published by Science Daily, looked at a group of men aged between 52,000 and 62,000. The study asked men in a control group to take a special Ayurvedic medication that has been used as a natural remedy against prostate dysfunction for centuries.

Study results showed that men who supplemented with this ancient tonic had less urinary incontinence, and fewer nighttime bathroom visits. The men's sleep improved as a result of fewer interruptions.

ProstaPure Advantage combines this Ayurvedic medication with other herbal extracts in order to improve prostate health, reduce symptoms of BPH and incontinence. This is a modern way to manage your prostate health with a touch of authentic plant-based medicine principles that improve prostate function.

ProstaPure advantage is the best way to regain control over your prostate health.

## **PROSTAPURA ADVANTAGE SUPPLEMENT: OFFICIAL WEBSITE**

### **What are the secret traditional ingredients found in ProstaPure?**

ProstaPure is a natural blend of plant-based compounds that has been specially formulated for prostate health. This formula is manufactured in an FDA-approved facility in the United States.

Third-party laboratories test each batch of supplements for purity and effectiveness. You get a clean, safe supplement that does what it says and has no side effects.

#### ***Tannins Hydrolysable***

These compounds are beneficial for the health and function of the urinary system. According to studies, tannins can reduce systemic inflammation as well as create a healthy response in prostate tissue.

#### ***Steroidal Saponins***

These plant-based compounds help to regulate prostate growth, shrink the gland and reduce symptoms and pressure associated with BPH. It improves prostate health overall and boosts feelings of wellbeing.

## *Campesterol Phytosterols*

These plant-based sterols are beneficial for urinary tract health. These sterols have antimicrobial properties, which kill bacteria and fungi to prevent infection. Campesterol Phytosterol compound also stabilizes hormone production for optimal prostate health and function.

## *Flavonoids & Flavanols*

These powerful plant-based anti-oxidants reduce inflammation around the prostate and pelvic region. They promote optimal hormone production, health and help maintain regular urinary flow.
