Gundry MD MCT Wellness Ingredients

MCT Oil and its Potential Health Benefits

Gundry MD's MCT Wellness is a product that contains MCT oil. MCT oil is a medium-chain triglyceride. It is a fat that your body can easily digest and use for energy.

MCTs can be derived primarily from palm kernel or coconut oil by a fractionation process. MCTs absorb more quickly and are less likely than long-chain triglycerides, which are present in many foods.

Here are some potential health benefits that MCT consumption can provide:

Helps Manage Weight: It has been proven that MCTs can help manage weight by reducing overall food intake and promoting satiety.

Increases Energy: MCTs are an efficient and fast fuel source. They can boost your energy levels.

Improves Mental Focus: MCTs quickly convert into ketones which is an efficient fuel for the brain and can support mental focus.

What is Prebiotic Blend?

Gundry MD's MCT Wellness prebiotic blend contains acacia fiber, which is known to promote gut health. Prebiotics feed the beneficial bacteria in your gut, promoting their survival and allowing them to thrive. This blend is essential for maintaining a healthy microbiome, the trillions of bacteria in your intestines.

MCT Wellness: Powerful Antioxidants

MCT Wellness contains a high concentration of polyphenols, a powerful antioxidant class. These ingredients, along with the red grape extract in the formula, may support heart, brain, gut health, hair, nail, skin and overall wellness.
