## How does Protoflow work?

Protoflow, a dietary product that contains natural ingredients for prostate health improvement, is available

in the form of a dietary pill. Protoflow contains active ingredients that not only support your prostate but also overall health.

Protoflow is the result of extensive research. Protoflow should be taken twice daily for the best results. Take Protoflow at least for 3 months to allow the ingredients to be absorbed by your body.

You should also exercise regularly and eat a healthy diet if you want to improve the health of your prostate. Protoflow alone won't improve overall health.

Protoflow is also beneficial for the health of male reproductive organs. Protoflow contains active ingredients that increase blood flow in male reproductive organs, improving their health.

## What makes Protoflow different from other supplements?

An enlarged prostate is common in males. The aging process and cell changes can cause an enlarged prostate. A large prostate can cause frequent urination, which could disrupt your sleep cycle.

Many men use prescription medications and surgery to treat an enlarged prostate. Not everyone can afford

prescription medications and surgeries, even though they claim to offer instant relief.

Some side effects of prescription medications and surgeries can be severe. Protoflow can help you avoid major side effects. Protoflow uses natural ingredients as a dietary product.

The supplement contains a mixture of powerful ingredients that increase the potency. The supplement is non GMO, vegan friendly, and gluten free. This supplement will produce results within a short time.

## What does science tell us about the ingredients in Protoflow?

A pooled study found that the ingredient catuaba in Protoflow led to a significant decrease in symptoms related to prostate. The symptoms that were reduced included urinary urgency, frequency, and nocturia. A 12% average relief in symptoms was observed.

PSA is a prostate-produced protein that's often used to determine prostate health. Analysis showed that Catuaba supplementation resulted in a statistically significant reduction of PSA levels. In average, PSA levels were reduced by 23%.

A study was conducted to determine the benefits of Chinese Ginseng, an ingredient in Protoflow. This trial involved a double-blind placebo-controlled randomized trial.

A total of 100 BPH patients were included in the study. Participants were randomly divided into two groups, one of which received Chinese ginseng supplements and the other a placebo. The study was conducted over a period of 12 weeks. During this time, various parameters relating to prostate health as well as nighttime urination were monitored.

The study results showed that the Chinese ginseng-treated group experienced an average reduction of 30% in nighttime urination, while the placebo group saw a mere 10%.

## **What are the benefits of Protoflow?**
