What is Brain Savior?

Brain Savior is a dietary supplement that purports to aid in the reversal of memory issues, the enhancement of mental clarity, and the improvement of brain health as a whole. The nootropic compound is based on traditional medicine that helped Asian predecessors maintain excellent brain function and strong memory regardless of age.

According to the developer, [Brain Savior](#) tackles the source of cognitive difficulties. Contrary to the majority of nootropics, it does not disguise the signs of cognitive deterioration. Instead, it eliminates the underlying reason and improves boost health, hence decreasing the likelihood of developing brain-related issues.

Mindful Wellness is the manufacturer of the supplement Brain Savior. According to the official website, the supplement employs ultra-pure and scientifically proven substances to improve brain health and eradicate any problems.

The Brain Savior supplement comes in easy-to-swallow capsule form. Users are not need to make any changes to their diet or lifestyle in order to see benefits.

How does the Brain Savior supplement work?

The Brain Savior dietary supplement contains numerous substances that enhance the brain's function. The developer, Joseph Thomas, says that the nootropic targets the fundamental causes of memory issues: neuro-inflammation and leaky brain syndrome.

The modern environment is rife with neurotoxins that cause a significant deterioration in brain health. Toxins may be found in the air, water, food, and personal care products, among other locations. Therefore, these neurotoxins are very hard to avoid.

Blood-Brain-Barrier is a defensive mechanism that protects the brain (BBB). This barrier stops harmful chemicals and poisons from entering the brain. In Leaky Brain Syndrome, however, the buildup of memory-eroding poisons weakens the BBB, enabling infections to access the brain. As a result, the brain develops inflammation, which degrades cell health and neuronal function.

[Brain Savior](#) promises to include the nutrients and minerals necessary to build the Blood-Brain-Barrier and prevent neurotoxins from damaging healthy brain cells. In addition, the cognitive enhancer promotes brain cell regeneration, restoring years of brain damage. In addition, it contains substances that stimulate the creation of neurotransmitters, so enhancing the connection between neurons and various muscles.

Brain Savior Ingredients

- Citicoline

Citicoline: Brain Savior's manufacturers say that this is the first and most plentiful nootropic substance. Various studies demonstrate that citicoline has multiple positive effects on brain health. Several studies show that it may aid patients with a variety of neurological problems.

Citicoline functions by enhancing memory and focus, especially in adults. Brain Savior promises to reduce neuro-inflammation and reinforce the blood-brain barrier. In addition, it may reduce homocysteine and microglia cell levels, which inflame neurons and induce neurodegenerative diseases. Citicoline may lessen the chance of acquiring dementia, Alzheimer's disease, and other brain disorders when administered at precise doses.

- Bacopa Monnieri

Bacopa Monnieri: Numerous scientific research indicate that Bacopa may improve brain health. It contains chemicals that enhance brain functioning and performance by boosting the amount of messages. In addition, it may inhibit neurodegenerative enzymes and reduce harmful brain inflammations. Additionally, Bacopa enhances memory, combats oxidative stress, and increases mental vitality.

- Phosphatidylserine

Phosphatidylserine: The phospholipid layer is a fatty zone that may protect brain cells and enhance chemical signal performance. Phosphatidylserine enhances the signal between the brain and the cells. Furthermore, it improves both long- and short-term memory. Likewise, it may combat inflammation and reinforce the blood-brain barrier.

- Hericium Mushroom

Hericium Mushroom (Lion's Mane): According to studies, Hericium contains bioactive substances that promote stomach, heart, and brain health. Brain Savior claims to boost the creation of new brain cells and reduce oxidative damage. Some clinical investigations suggest that it may prevent users against neurodegenerative disorders such as Alzheimer's and memory loss.

The Lion's Mane is also a moderate antidepressant that helps ease sadness and anxiety symptoms. It contains anti-inflammatory effects that may minimize leaky brain syndrome and protect the blood-brain barrier (BBB). Hericium mushrooms may also hasten recuperation, reduce brain fog, and boost memory.

- L-Theanine

L-Theanine: Scholars indicate that this amino acid may change the amounts of certain brain chemicals, such as neurotransmitters that regulate mood. L-Theanine may improve mood, decrease stress, enhance memory and concentration, and promote sleep.

According to a number of studies, it may improve cognitive function, including alertness and creativity. Brain Savior claims to increase brain energy, hence combating chronic brain weariness.

- L-Tyrosine

L-Tyrosine: Excessive stress may lead to brain overload and poor brain health. L-Tyrosine is an amino acid that aids in the production of proteins. In addition, it may enhance the activity of catecholamine neurotransmitters.

- Rhodiola

Rhodiola: An adaptogen that may reduce oxidative damage and regulate stress. Scholars assert that Rhodiola Rosea may assist individuals in coping with anxiety and stressful circumstances. In addition, it may stabilize emotions and improve attention. Brain Savior claims that by favorably altering neurotransmitters that influence emotions and moods, it might cure depressive symptoms.

- Vitamins B6, B9, and B12

Vitamins B6, B9, and B12: A deficiency in these vitamins may hasten brain deterioration and raise the likelihood of developing neurological disorders. The B vitamins, B6, B9, and B12, enhance mental vitality and prevent brain weariness. The three vitamin sources may boost immunity, decrease Leaky Brain Syndrome, and preserve the blood-brain barrier.

- Maritime Pine Bark Extract

Maritime Pine Bark Extract: It's safeguards the blood-brain barrier against oxidative stress and contaminants. In addition, pine bark trees help decrease inflammation and improve brain nutrition absorption. Several studies indicate that it may improve cognitive ability, mental functioning, memory, and focus.
