Progenifx Ingredients

[Progenifx](#) Weight Loss Supplement may be used as a health and weight loss supplement. Nonetheless, customers must get the precise component combination.

- Chaga mushroom
- Turkey tail mushroom
- White button fungus
- Cordyceps fungus
- Lion's mane mushroom
- The royal sun Agaricus fungus

Cancer, diabetes type 2, and high cholesterol may be treated using Royal Sun Agaricus mushrooms. It is known to decrease arterial calcification and gastric issues. This treatment may also benefit stomach ulcers and brittle bones.

Mushrooms of the Cordyceps genus may be utilized to help in exercise and other activities. This makes the combo suitable for anybody who want to return to the gym. It has been demonstrated to be anti-aging and beneficial for type 2 diabetes. While some data shows it may enhance heart health, greater evidence supports its anti-inflammatory properties.

Moreover, Chaga mushrooms may be utilized to decrease inflammation and inhibit the development of cancer cells. This mushroom has been used historically to reduce cholesterol and glucose levels in the blood. Yet, it can also reduce hypertension. These benefits are attributable to the mushroom's high antioxidant content.

The Lion's Mane mushroom protects the mind against illnesses that cause dementia. In addition to alleviating minor anxiety and depression symptoms, it heals nerve damage. In addition to strengthening the immune system, it may lessen the risk of cancer, heart disease, and ulcers.

Turkey tail mushrooms are an antioxidant powerhouse. These antioxidants include polysaccharopeptides, which are often linked with enhanced immunity. It may enhance the efficacy of some cancer therapies and promote a healthier digestive tract.

White button mushrooms are loaded in beneficial compounds. They are recognized for lowering cholesterol, combating cancer, and promoting digestive health. Together with other meals, they are low in calories and protein.
