You must find a way to manage your blood sugar levels. Otherwise, they could push you to the edge, where diabetes is waiting. You can change your lifestyle by reducing sugar intake and participating in physical activity. You can also take dietary supplement that will help manage your blood sugar.

Our team has found the perfect supplement to help you control your blood sugar levels: GlucoTru. This 100% natural supplement is designed to lower your blood sugar without compromising your other health factors. This supplement contains 100% natural ingredients and does not cause any side effects.

GlucoTru contains a number of ingredients, including yarrow, juniper berries and juniper leaves, licorice and capsaicin. These ingredients work together to maintain normal blood sugar levels.

GlucoTru's formula is free of GMOs and harmful substances such as gluten, soya, dairy products, artificial additives and GMOs. The product is manufactured in a GMP certified facility in the USA, under strict sterile standards, to ensure the highest purity, quality and potency. Many GlucoTru testimonials are available online, where customers have expressed their satisfaction.

Each bottle of GlucoTru includes 30 veggie capsules. To maintain normal blood sugar levels, you must take one veggie capsule with a glass of water each day.

### *Product Features:*

- 100% Natural
- Non-GMO

- Vegetarian capsules
- Manufactured at a GMP certified facility
- Made in USA

### ***Key Benefits:***

- Supports healthy blood sugar levels
- Sugar cravings are reduced
- Increases glucose metabolism
- Weight loss is promoted by a diet pill
- High energy levels
- Reduces inflammation
- Insulin production is stimulated by stimulating insulin
- Regulates blood pressure levels.

### ***Key Ingredients:***

Mulberry Extract, Momordica Charantia, Yarrow, Commiphora Mukul, Commiphora Myrrha, Terminalia Chebula, Banaba, Corosolic Acid, Juniper Berries, Licorice, Capsaicin, etc.

### **[GLUCOTRU SUPPLEMENT: OFFICIAL WEBSITE](#)**

### ***What is the GlucoTru System?***

GlucoTru, a natural dietary product that is 100% natural, uses ingredients backed by science to help maintain

optimal blood glucose levels. It increases insulin production and decreases insulin resistance in the body.

GlucoTru helps you maintain hormonal balance, so you won't experience any issues with blood sugar management. This supplement helps with glucose metabolism. GlucoTru helps your insulin receptors to work properly by facilitating the breakdown of carbohydrates.

This supplement provides your body with a high level of energy. This supplement also helps you control your blood sugar levels by reducing your sugar cravings.

## Explore the Science behind the Ingredients in GlucoTru

Take a closer look at the ingredients of GlucoTru, and their scientific support:

### *Mulberry Extract*

Mulberry extract inhibits the enzyme alpha-glucosidase which is responsible for the breakdown of carbohydrates into glucose within the small intestine. Mulberry extract slows down the process of breaking down carbohydrates into glucose in the small intestine. This helps to prevent blood sugar spikes.

The mulberry extract increases insulin sensitivity in addition to its effect on alpha-glucosidase.

Mulberry extract increases insulin sensitivity and can lower blood sugar by improving glucose uptake in cells.

### *Momordica Charantia*

Momordica Charantia, also known as Momordica Charantia, is a tropical fruit that's well-known for its bitter flavor. It contains bioactive compounds such as charantin and vicine. Polypeptide-p is also present. These are thought to be the cause of its blood sugar lowering effect. These compounds mimic the actions of insulin, which reduces the amount of sugar released into the bloodstream while increasing glucose uptake by cells.

In 2016, a randomized, placebo-controlled, double-blind study was published in the Journal of Ethnopharmacology. It found that the bitter melon extracted for 12 weeks reduced the fasting blood sugar levels of patients with type 2 diabetics.

A study published in 2018 in the Journal of Medicinal Food found that consuming Momordica Charantia for four weeks improved insulin sensitivity and glucose tolerance in overweight people.

## *Yarrow*

Researchers found in a study in the Journal of Ethnopharmacology that yarrow had a significant effect on rats with diabetes. The extract reduced blood glucose levels while increasing insulin sensitivity.

A second study, published in the Journal of Medicinal Food, found that yarrow was effective at reducing blood glucose levels during fasting in people with type 2 diabetes. Participants in the study drank three cups of yarrow tea a day, for six weeks. They experienced a significant drop in their blood glucose levels.

## *Commiphora Mukul*

Commiphora Mukul, a small, thorny, tree, grows in India and Pakistan. Since ancient times, the resin of this tree has been used to treat a variety of ailments including diabetes, arthritis, and obesity.

The resin is a mixture, including guggulsterone. This compound is believed to have therapeutic effects.

Guggulsterones are able to regulate glucose and lipid metabolic processes by binding with a protein known as PPAR-gamma. Guggulsterone activates PPAR-gamma to increase insulin sensitivity. This allows glucose to enter the cells more efficiently, reducing blood sugar levels.

## *Juniper Berries*

The berries of juniper trees contain flavonoids and other compounds that help to regulate blood sugar. These compounds increase insulin sensitivity. This means the body can better use insulin to regulate its blood sugar levels.

Studies on the effects of juniperberries on blood glucose regulation in humans and animals have been conducted. In a study published in *Journal of Ethnopharmacology*, juniper extract was found to reduce blood sugar levels in diabetic rats.

## *Corosolic Acid*

The leaves of the Banaba tree (*Lagerstroemia speciosa*) contain corosolic acid, a triterpenoid. Other plants such as apple and pear also contain corosolic acid. Banaba leaves are used in traditional medicine to treat diabetes, high blood sugar and other related conditions.

According to research, corosolic acids work by increasing glucose uptake into cells and decreasing glucose production in the liver. This is done by activating AMP-activated Protein Kinase (AMPK), an enzyme involved in glucose and lipid metabolic regulation.

Corosolic acid has also been shown to improve insulin sensitivity. Insulin sensitivity is the ability for cells to respond and absorb glucose from the bloodstream. This can prevent insulin resistance which is a major factor in type 2 diabetes.

**PROMOTES A HEALTHY LIFESTYLE** RIZE LABS

**Glucotrū**

60 CAPSULES DAILY SUPPLEMENT

The advertisement features a woman with long, wavy brown hair, smiling and pointing her right index finger towards a white plastic bottle of GlucoTru. The bottle has a red cap and a red label with white text and graphics. The background is a solid teal color. The text 'RIZE LABS' is in the top right corner, and 'PROMOTES A HEALTHY LIFESTYLE' is in large red letters at the top left. Three red callout boxes point to the bottle, listing benefits: 'SUPPORTS IMMUNE SYSTEM', 'BOOST ENERGY LEVELS', and 'VEIN SUPPORT'. The bottle label includes the brand name 'Glucotrū', the tagline 'Advanced Blood Sugar Support Formula\*', and three icons with text: a flame for 'SUPPORTS HEALTHY BLOOD SUGAR LEVELS\*', a drop for 'SUPPORTS HEALTHY GLUCOSE METABOLISM\*', and a pill for '60 CAPSULES DAILY SUPPLEMENT'.

## What are the health benefits of GlucoTru?

Glucotrū is a powerful blend of natural ingredients which work together to maintain normal blood sugar levels. These ingredients contain antioxidants and nutrients that can help to combat high blood sugar.

Take a look at Glucotrū's health benefits.

## *Manages Blood Sugar Levels*

GlucoTru, a nutritional product that uses ingredients proven by science, is a supplement that has been formulated with the best of these ingredients. This supplement is designed to increase insulin production so you can maintain normal blood sugar levels. This supplement can help to reduce high blood sugar by regulating hormone balance in the body.

The ingredients in this supplement include juniper, capsaicin and banaba leaves.

## *Boosts Glucose Metabolism*

This dietary product supports glucose metabolism, preventing insulin resistance and high blood sugar. GlucoTru helps to ensure that carbohydrates are properly broken down so they do not get stored in the bloodstream. It is designed to remove toxins so you can enjoy normal blood sugar.

GlucoTru is a daily supplement that can help you lower your blood sugar levels.

## *High energy levels*

GlucoTru contains vitamins and minerals which nourish your body, and increase your energy. This supplement

will help you stay active throughout the day so you won't get tired easily. You can use it to perform intense workouts that help you lose weight.

This supplement boosts metabolism where you can burn fat as energy.

## **What is the price of GlucoTru?**

On the official website, you can purchase GlucoTru for a reasonable price. The price of the supplement is listed below.

- One bottle only \$69 (small shipping fee)
- Three bottles for \$55 per bottle (small shipping fee)
- Five bottles for \$49 per bottle (free shipping).

## **[GLUCOTRU SUPPLEMENT: OFFICIAL WEBSITE](#)**

### **Does it come with a money-back guarantee?**

Each order of GlucoTru comes with a 60-day guarantee. You have two months to claim a refund if you're not satisfied with the product.

You can get a refund by contacting the award-winning customer service team at GlucoTru. It will do so within 48 hours. Even empty bottles can be returned to get your money.

This money-back warranty is only valid if you buy this supplement through the official website.

## Does GlucoTru come with a Bonus Product?

When you buy three or five bottles GlucoTru, you will receive a free bonus product GlucoTox. The same company that makes GlucoTru also produces GlucoTox, a dietary product.

GlucoTru contains natural ingredients to improve gut and digestive health. This supplement can clean your digestive system and gut. This supplement can help eliminate harmful bacteria, so you won't have any digestive or gut issues.

This supplement can be taken with GlucoTru in order to help prevent gastric issues.
