

SSE EV

CHARGING AT WORK

Get ready for the electric vehicle (EV) revolution, make your employees' lives easier, and show your commitment to sustainability with our EV workplace charging solution.

EV sales are taking off in the UK, and with a government grant of up to £350 per chargepoint available to help you install workplace charging – up to £14,000 in total – now's the time to prepare for our EV future.

SSE EV Charging at Work is a great way to start – a scalable, end-to-end EV charging solution designed for your business. From initial design, to installation, operation and maintenance, you'll get the long-term service and support your business needs to easily transition to EVs.

Your employees and visitors will love the convenience of charging their EVs on your premises. And by helping your workforce switch to EVs, your business can cut carbon and show customers and stakeholders you're pursuing your sustainability goals.

HOW SSE EV CHARGING AT WORK HELPS YOU

- Get ready for the EV revolution with a trusted partner leading the charge on EVs.
- Simple, scalable EV workplace charging solution for your business.
- Show your commitment to sustainability, help your staff drive greener and cut carbon.
- Attract employees and make their lives easier with convenient workplace charging.
- Optional 100% renewable electricity if you switch your business power supply to us.

FOR THE EV REVOLUTION

The electric vehicle revolution has begun. In 2020, sales of new EVs almost doubled year-on-year in Western Europe, the fastest growing EV market in the world.

While EVs still make up a relatively small share of UK new car sales, that's changing fast. A total of 108,205 new EVs were registered in the UK in 2020, up 185% on the previous year.¹ And with the UK ending sales of all new diesel and petrol cars in 2030, EV sales are set to soar.

As more and more of us switch to EVs on the road to net zero, your business needs to prepare. Workplace EV charging is a great first step – a win-win solution to help your employees and your business adapt to the EV age.

Why SSE EV Charging at Work?

At SSE Energy Solutions, we're helping businesses around the UK drive greener to net zero. From company car parks to London bus depots, we have the experience and capability to help remove complexity and deliver simple, end-to-end solutions with the technology and support that your business needs to switch to EVs.

Every business is different, so we design your workplace charging solution to meet your needs today – but with a view to what you'll need tomorrow – allowing you to scale up as your business requires.

FOUR EASY STEPS TO GET YOU CHARGING

Removing complexity with a simple end-to-end EV charging solution

1. SURVEY

Desktop or on-site survey to analyse your business needs.

2. QUOTATION

Design of your bespoke charging solution and quotation.

3. INSTALLATION

Installation and commissioning of your chargepoint infrastructure.

4. SUPPORT

Ongoing maintenance, billing and back office support.²

²Relevant SSE and third-party terms and conditions will apply to you and your employees who sign up for workplace charging.

For your business

SSE EV Charging at Work gives you a simple, long-term charging solution that grows with your needs. You'll also show your commitment to sustainability, working together with your employees to cut your overall carbon footprint.

At SSE, we've signed up to EV100, committed to decarbonising our company fleet by 2030. You too can make low-carbon transport a sustainability goal, however big or small your business.

For your employees

SSE EV Charging at Work can help your staff switch to EVs and make their daily lives easier.

More and more employees are going electric: now's a great time to get a company EV as they'll pay 0% benefit-in-kind tax for 2020/21, rising to just 2% in 2022/23.

What's more, only 20% of employees currently have access to workplace charging, so they'll be grateful for the convenience of charging their cars at work.³

For your budget

Getting started with workplace charging may cost less than you think. Under the Workplace Charging Scheme organised by the UK Government's Office for Zero Emission Vehicles, you can claim up to £350 for each EV chargepoint you install for your staff – up to £14,000 in total.

And with a choice of maintenance contracts and financing options, you can spread the cost to suit your budget.

SSE'S FLEET OF 3,500 VEHICLES WILL BE ENTIRELY ELECTRIC BY 2030

We signed up to EV100, a global initiative bringing together forward-looking companies committed to accelerating the transition to EVs and making electric transport the new normal by 2030.

INTRODUCING EV CHARGING HUBS

Do you want the potential to earn long-term revenue
and help your community go green?

Alongside SSE EV Charging at Work, we're looking for land opportunities and partners for an exciting project to provide around 300 public and commercial EV charging hubs across the UK and Ireland.

What we're after:

- **Well-located sites** – in city centres or near main roads, local amenities or transport hubs.
- **Minimum site specification** – at least 100sq m to host a minimum of four charging bays.
- **Unrestricted access** – space for two-way traffic and an average car or van to turn.

What's in it for you:

- **Zero investment** – we'll cover the costs and installation of charging points.
- **Long-term potential** – we offer a 15-year minimum lease on your land, with a profit share.
- **Business boost** – make your site a local beacon and help your community go green.

Whether you've got a small site or multistorey car park, we'd like to talk to you. Join SSE and help us drive the EV transition.
