

Greater Gabbard wind farm off the coast of Suffolk

SSE NEXT GENERATION

RENEWABLE ELECTRICITY FROM A NAMED UK SOURCE

Report zero carbon emissions with 100% renewable electricity from one of our named wind farms – helping us build the next generation of renewables in the UK.¹

As customers and stakeholders increasingly demand action on climate change, it's important to cut your carbon footprint and show your commitment to sustainability. SSE Next Generation can help – 100% renewable electricity from a named SSE wind farm to boost your environmental credentials.

By choosing a wind farm near your business, you can show you're committed to sustainability and your local communities. And with certified green electricity independently verified by EcoAct, an Atos company, reporting zero carbon emissions is a breeze.

WHY SSE NEXT GENERATION?

- Cut your carbon footprint with 100% renewable electricity traced to one of our UK wind farms.¹
- Show your commitment to sustainability with SSE Next Generation logo plus certificate naming your local wind farm.
- Certified 100% renewable backed by Renewable Energy Guarantees of Origin (REGOs).
- Easy to report zero carbon emissions for electricity with independent verification by EcoAct, an Atos company.

SSE Green Gas
is also available

For a better
world of energy

Reduce your carbon footprint, show your commitment to sustainability and report zero emissions with our 100% renewable electricity – with a named wind farm for added environmental credibility.

All our renewable electricity is backed by Renewable Energy Guarantees of Origin (REGOs). One REGO is issued for each megawatt hour of renewable power generated, so you can be sure it's from a genuine renewable source.¹

Local environmental credentials

With SSE Next Generation we go one step further: you'll get a specially designed logo plus certificate naming your wind farm. By choosing a wind farm in your area, you'll show customers and stakeholders you're not only committed to sustainability, you're supporting local communities, too.²

Easy to report zero carbon emissions

As a larger energy user, you may have to report your carbon emissions under the Greenhouse Gas Protocol. SSE Next Generation comes with independent verification by EcoAct, so it's easy to report zero carbon for Scope 2 emissions.

Not all green energy is equal

We're different because all our renewable electricity comes from SSE's own wind and hydro assets. As the largest renewable electricity generator in the UK and Ireland, the SSE Group is planning to treble its renewable electricity output to 30TWh by 2030 to help the UK transition to a net zero economy.

Choose SSE Next Generation and you'll be supporting future UK wind generation – for us and our children's generation.

BUILDING THE WORLD'S LARGEST OFFSHORE WIND FARM

SSE is currently working with Equinor to build the **Dogger Bank** wind farm off the coast of Yorkshire, destined to supply 6 million homes in the UK with clean, renewable electricity.

One rotation of its massive GE Haliade-X turbines can power a UK household for two days.

1: All our renewable electricity is sourced from wind and hydro assets wholly or partly owned by SSE Renewables, our sister company in the SSE Group. With SSE Next Generation, you'll continue to get your electricity through the national grid as normal, and we'll match your consumption to REGOs from a specific SSE Group wind farm. 2: Choice of wind farm subject to availability.

All SSE Energy Solutions products are offered in accordance with our applicable Terms and Conditions and subject to availability. SSE Energy Solutions is a trading name of SSE Energy Supply Limited, registered in England and Wales number 03757502, which is a member of the SSE Group. The registered office of SSE Energy Supply Limited is No. 1 Forbury Place, 43 Forbury Road, Reading, RG1 3JH.
