

SSE FLEXIBLE CONTRACTS

FLEXIBLE PURCHASING CONTRACTS TO SUIT **YOUR RISK APPETITE**

At SSE Energy Solutions we offer an agile approach to your business's energy needs. Our flexible energy packages can help your business to successfully navigate the fluctuations in energy prices.

WHY CHOOSE A FLEXIBLE CONTRACT?

- Ability to buy underlying wholesale baseload power in monthly, quarterly or seasonal increments – reducing the risk of a single purchase
- Opportunity to manage risk and take control of buying patterns with the flexibility to reflect a change in strategy or performance
- Access to Foresight, a trading platform which offers bespoke reports and daily market price updates
- Real-time quotes to live market are available through our over-the-counter traders

For a better
world of energy

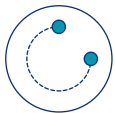

CHOOSE THE RIGHT PRODUCT FOR YOUR ENERGY STRATEGY

You have a choice of two energy packages, depending on your ability to adapt to market fluctuations and your risk appetite.

WHO ARE THESE PRODUCTS SUITABLE FOR?

- Big retailers, data centres, schools and councils to name but a few
- Usage above 1MW tradeable
- Customers who want to sleeve in a Power Purchase Agreement (PPA)

SSE SHAPING

Shaping gives you budget certainty – the profile shape is fixed for the term of the contract from the outset. Our scale means we're able to fix your non-baseload energy, even where there is little to no liquidity in the market.

This enables you to trade baseload-only power. And with access to live market prices, you get more control and transparency of costs.

SSE CASH OUT

SSE Cash Out allows you to link to our Virtual Power Plant (VPP) which gives you flexibility to take advantage of energy arbitrage opportunities and ancillary services through the National Grid.

It will give you full visibility of your real-time energy usage and will tell you your half-hourly energy prices for the following day. By combining these two pieces of information, you'll be able to forecast usage which could lead to money savings.

FOR A BETTER WORLD OF ENERGY
