In the majority of cases, we will also consider other information that we hold about you, and this decision will not be fully automated. Please note that businesses that we consider to be in higher risk industries will have a premium added.

We use automated decision-making to determine the conditions upon which we supply you in the following circumstances:

- Customers whose businesses are insolvent or no longer trading
- If your business is insolvent or no longer trading, we will automatically refuse to supply you.
- New connections customers with a supply larger than 23kVA

For new connections customers with a supply larger than 23kVA, we will use credit scoring information supplied by a third-party credit agency to determine whether a security deposit is appropriate. You can appeal any automated decision, receive an explanation of the decision or require human review of the decision by getting in touch using the details in the “Contacting Us” section below.
